SHORT DESCRIPTION OF THE PROJECT:

The proposal covers the development of the advanced European Strategic Command and Control (C2) system, which will contribute to the achievement of the EU new level of ambition. The foreseen activities include a feasibility study and a system design. They will provide an integrated set of solutions, exploiting the emerging technologies in key domains such as the Information Technology and Communication Systems. The project aims at delivering a C2 system fully interoperable with the Command and Control structures / systems from EU, Member States, NATO, and civilian agencies.
