Enhanced cooperation allows a group of at least nine nations to implement measures if all Member States fail to reach agreement. Other EU countries keep the right to join when they want. The procedure is designed to overcome paralysis, where a proposal is blocked by an individual country or a small group of countries who do not wish to be part of the initiative. It does not, however, allow for an extension of powers outside those under the EU Treaties. The possibility was first introduced by the 1999 Amsterdam Treaty, with the 2009 Lisbon Treaty formalising the procedure and extending the possibility for enhanced cooperation to include defence.

**PROCEDURE**

The adoption of the decision authorising enhanced cooperation requires a **qualified majority of Member States** within the Council and the **consent of the European Parliament**. The adoption of the new rules then requires **unanimity by the Member States participating** in enhanced cooperation and the **consultation of the European Parliament**. The other Member States are free to join the enhanced cooperation at any time.

**EUROPEAN UNITARY PATENT**
