**COMP/M.4834 - ALSTOM / ECOTECNIA**

**SECTION 1.2**

**Description of the concentration**

The proposed concentration is the acquisition by ALSTOM España IB, S.L. ("ALSTOM España") of sole control of the Spanish-based Ecotècnia, Societat Cooperativa Catalana Limitada ("Ecotècnia"). Ecotècnia is currently a cooperative and will be converted to a limited liability company and all of its shares acquired by ALSTOM España. An agreement between the parties was signed on 25 June 2007.

Ecotècnia is active in the manufacture and installation of renewable energy products (wind turbines and solar photovoltaic systems) and in the provision of related services.

ALSTOM España is part of the ALSTOM Group, a world leader in transport and energy infrastructure. The ALSTOM Group is under the de facto control of the Bouygues group, a diversified industrial group focussed on construction and telecommunications/media.

There is no horizontal relationship between the activities of Ecotècnia and those of the ALSTOM Group or the Bouygues group.

Ecotècnia is involved in the building of turnkey wind farms. Bouygues has provided a very small volume of non-specialised electrical civil works services (to companies other than Ecotècnia) for wind farms as a subcontractor. There is no Member State in which Bouygues is active upstream in this market and where Ecotècnia is active downstream.

The parties do not consider that the concentration will have any appreciable impact on competition in any market.
