

Safety Gate: Rapid Alert System for dangerous non-food products

Alert number	1315/07
Category	Motor vehicles
Type of alert	Products with serious risks
Product user	Consumer
Product	Passenger car - Brake vacuum pump in Ford passenger car
Brand	Ford
Name	
Type / number of model	Passenger cars, models Focus, C-Max, S-Max & Galaxy with 2.0L DW10 Diesel engine (Recall Ref: 7C127).
Batch number / Barcode	
OECD Portal Category	
Description	The recall concerns 2006 and 2007 model year FORD Focus, C-Max, S-Max & Galaxy cars. More information 
Country of origin	Germany
Alert submitted by	Greece
Risk type	Injuries
Risk	This product poses a risk of injuries because during engine warm up in low ambient temperatures, it is possible that the non return valve within the brake vacuum pump may fail to release and will not continue to supply vacuum to the brake booster. Although the system will continue to meet all legal braking requirements, the customer may experience a hard brake pedal with increased stopping distances if the vacuum stored in the booster is used before the non return valve releases once the engine has reached normal operating temperature.
Measures adopted by notifying country	Voluntary corrective actions taken by the importer.
