

Rapid Alert System for dangerous non-food products

Alert number	A12/0110/16
Category	Motor vehicles
Risk level	Serious risk
Product user	Consumer
Product	Passenger car
Brand	Nissan
Name	Note and Micra
Type / number of model	Mote (E12) and Micra (K13)
Batch number / Barcode	Production date Note from 06/08/2015 to 11/01/2016 and Micra from 09/07/2015 to 05/01/2016;
OECD Portal Category	77000000 - Automotive
Description	Passenger car
Country of origin	India, United Kingdom
Alert submitted by	Portugal
Risk type	Injuries
Risk	As a result of a design change to the engine ignition coils fitted, the internal electrical components of the coil may short circuit resulting in an engine misfire. In the worst case, this short circuit may cause a fuse inside the Power Distribution Module (IPDM) to fail, stopping power to the ignition relay. This may cause the engine to stall.
Measures adopted by notifying country	Measures taken by economic operators: Recall of the product from end users (By: Distributor)
Products were found and measures were taken also in	Bulgaria, Denmark, Finland, Greece, Malta, Norway, Slovakia, Slovenia, Sweden, The Netherlands, United Kingdom
