1. BACKGROUND

1.1. Context

Creating and fostering an ever-closer union among the peoples of Europe has been a priority of the European Union for many years. In addition, EU aims to contribute to the flowering of the cultures of the Member States, while respecting their national and regional diversity and at the same time bringing the common cultural heritage to the fore.

This objective was further confirmed in the Laeken Declaration annexed to the conclusions of the European Council of 14 and 15 December 2001. One of the basic challenges to be resolved by the European Union is how to bring citizens closer to the European design and the European institutions.

In addition, the European Union has always ascribed a particular importance to the role of networks of cultural organisations in Cultural cooperation in Europe and has agreed to encourage the cultural organisations in their countries to participate actively in non-governmental cooperation on a European Scale. This objective has been particularly stressed by the Council and the Ministers of Culture within the Council, in the Resolution of 14 November 1991 on European cultural networks .

Further to the resolutions of the European Parliament on minority languages and cultures, the European Union has engaged in action to promote and safeguard the linguistic diversity in the Union, in order to preserve languages as an element in Europe's living cultural heritage. The most recent European Parliament resolution on regional and lesser-used European languages was adopted on 13 December 2001

and called for a more active policy from the European Union with respect to regional and minority languages.

From the 1980s until 2001, on the basis of a specific budget line, the Commission funded around 1500 projects to safeguard and promote regional and minority languages. This separate action was terminated for a lack of a legal basis. A large number of projects involving or affecting these languages have been financed through mainstream programmes, namely Socrates and Leonardo Da Vinci.

In the light of the resolution adopted on 11 February 1993 by the European Parliament on European and International preservation of the sites of Nazi concentration camps as historical memorials, the Community aspires to improve the knowledge and dissemination of the culture and history of the European peoples and to conserve and safeguard of cultural heritage of European significance.

In order to achieve these different objectives, a Community action programme to promote bodies active at European level in the field of Culture was established on 21 April 2004 for a period of three years and with a financial framework of EUR 19 millions (The programme starts the 1st January 2004 and shall end the 31st December 2006). This programme put together three different actions which have been supported in the past through the EU budget without any specific legal base. These actions were implemented through the ex-A line of the budget as follows:

- Heading A-3015 which provided annual operating grants to organisations pursuing an aim of general interest and promoting the language diversity in Europe: (1) European Bureau for Lesser-Used Languages (EBUL), organised as a network of national committees working in the Member States and (2) the Mercator research, information, and documentation network composed by three centres having each one its own thematic programme and specialist role: Mercator Media at the University of Wales Aberystwyth (UK) researches the media; Mercator Legislation at the CIEMEN foundation, Barcelona (E), is concerned with language legislation; and Mercator Education at the Fryske Akademy, Ljouwert (NL) studies education at all levels.

- Heading A-3042 which provided annual operating grants to organisations of European cultural interest. The budgetary authority earmarked each year the organisations as well as the specific amount they were supposed to receive.

- Heading A-3035 which provided action grants for the preservation of the sites of Nazi concentration camps as historical memorials

As a consequence of the introduction of the new Financial Regulation (Council Regulation (EC, Eurotom) N° 1605/2002 of 25 June 2002) which requires a basic act to cover these existing actions, the Community action programme mentioned above has been established on 21 April 2004. The three different actions take respectively the form of Part I (ex A-3015), Part II (ex A-3042) and Part III (ex A-3035).

It is also important to note that this programme comes definitely to an end by 31st December 2006; no successive programme shall be established in the present form. However, these three different community

actions should be integrated in other framework programmes as the new “Integrated Programme for Lifelong Learning” for the Part I, the new Programme “Culture 2007-2013 for the part II and the new programme “Citizens for Europe 2007-2013” for the Part III.

1.2 The programme/actions to be evaluated

1.2.1 Aim of the programme to be evaluated

According to the Decision N° 792/204, the programme aims to strengthen Community action in the field of Culture and increase its effectiveness by supporting the activities of bodies active at European level in this field. The programme covers the following activities:

- (a) the ongoing work programme of a body which pursues an aim of general European interest in the field of culture or an objective forming part of the European Union's policy in this area;

- (b) a specific action in this area.

These activities must contribute, or be capable of contributing, to the development and implementation of Community cooperation policy and actions in the field of culture. According to the programme, the main activities of these bodies that are likely to contribute to the strengthening and effectiveness of Community action in the field of culture are as follows:

- Representation of stakeholders at Community level,
- Dissemination of information on Community action,
- Networking of bodies active in the cultural field,
- Representation and informing of the regional and minority language communities of the European Union,
- Finding and disseminating of information in the legislation, education and media fields,
- Fulfilling the role of cultural ‘ambassador’, promoting awareness of Europe's common cultural heritage,
- Preservation and commemoration of the main sites and archives associated with the deportations, symbolised by the memorials which have been raised on the sites of the former camps and other places of mass-civilian martyrdom and extermination, and the keeping alive of the memory of the victims at these

1.2.2 Instruments of intervention

According to the decision, grants may be awarded to support activities carried out by the bodies eligible for Community funding under the programme that fall within the three following areas:

Part I: Permanent activities of the following bodies pursuing an aim of general European interest in the field of Culture:

- European Bureau for Lesser-Used Languages
- Centres of the Mercator network

This support takes the form of an annual operating grant to co-finance expenditure associated with the permanent annual work programme of these organisations.

The grant shall not fund all their eligible expenditure in the calendar year for which it awarded; at least 20 % of the bodies' budgets must be co-financed from non-Community sources. The decision mentions also that the principle of gradual reduction shall not apply to operating grants awarded to European Bureau for Lesser-Used Languages and Centres of the Mercator network since they are bodies pursuing an objective of general European interest.

These operating grants may be awarded to the above mentioned organisations on the basis of an appropriate work programme and budget provided that they comply with all the requirements of the Financial Regulation and its implementing rules, and the basic act.

Part II: Permanent activities of other bodies pursuing an aim of general interest in the field of culture or an objective forming part of the European Union's policy in this area.

This support takes the form of an annual operating grant to support the conduct of the permanent work programmes of organisations or networks promoting European Culture and cooperation in the field of the cultural sector and making a contribution to cultural life and the management of culture.

The grant shall not fund all their eligible expenditure in the calendar year for which it awarded. At least 20 % of the bodies' budgets must be co-financed from non-Community sources. Such co-financing may be partly contributed in kind, provided the contribution is valued at no more than the cost actually incurred and evidenced by accounting documents or the cost generally obtaining on the market in question.

The decision mentions also that the principle of gradual reduction shall apply to operating grants awarded under this part of the programme. This reduction shall apply from the third year onwards, at a rate of 2,5 per cent per year. In order to observe this rule, which applies without prejudice to the co-financing rule mentioned above, the percentage of Community co-financing corresponding to the grant awarded for a given financial year shall be at least 2,5 points below the percentage of Community co-financing corresponding to the grant awarded for the previous financial year.

In order to award grants under this part of the programme, the Commission shall publish call for proposals. However, in 2004 and 2005, grants may be awarded to the organisations mentioned in Annex II provided that they comply with all the requirements of the Financial Regulation and its implementing rules, and the basic act.

It is important to note that under this part of the programme, the legislator was concerned of ensuring an appropriate funding stability and continuity for organisations to which the European Community has

granted support over previous years. In that context, the “earmarking system” came to an end in 2005 and a first open call for proposals has been published in August 2005 to award operating grants for the year 2006.

Part III: Actions to preserve and commemorate the main sites and archives associated with the deportations, symbolised by the memorials which have been raised on the sites of the former camps and other places of mass-civilian martyrdom and extermination, and to keep alive the memory of the victims at these sites.

This support takes the form of an action grant to co-finance a specific project in this area. A grant award under this part may not cover more than 75 % of the eligible costs of the action concerned.

The projects must help:

- to preserve and commemorate the memory of victims of deportations and incarceration in the camps;
- to explain why, how and what happened in the former camps and other places of mass-civilian martyrdom and extermination;
- to facilitate the dissemination of the European Populations History and improve the knowledge of the present and future generations on that period.

In order to award grants under this part of the programme, the Commission publish annual call for proposals.

1.2.3 Funding of the programme

According to the decision, the financial framework for the implementation of the programme for the period 01/01/2004 to 31/12/2006 is hereby set at EUR 19 million. This global budget has been shared out as follows between the different actions:

	2004	2005	2006	Total		
Part I	1,200 Mio €			1,224 Mio €	1,248 Mio €	3,672 Mio €
Part II	5,308 Mio €		4,158 Mio €	3,462 Mio €	12,928 Mio €	
Part III	0,8 Mio €		0,8 Mio €	0,8 Mio €	2,4 Mio €	

1.2.4 Actions launched to date

Part I: Co-funding of permanent activities of bodies pursuing an aim of general European interest in the field of Culture (European Bureau for Lesser-Used Languages and Centres of the Mercator network)

In 2004, 2005 and 2006, operating grants have been awarded to the bodies listed in Annex point 2.1 of the Decision (Earmarking system) .

Part II: Co-funding of permanent activities of other bodies pursuing an aim of general interest in the field of culture or an objective forming part of the European Union's policy in this area

In 2004 and 2005, operating grants have been awarded to organisations listed in Annex II of the Decision (Earmarking system). Among the 40 organisations mentioned in Annex II of the Decision, operating grants have been awarded respectively to 36 organisations in 2004 and 35 organisations in 2005 (some of them have been considered as non-eligible and some of them did not applied). The maximum amount of grant awarded has been earmarked each year by the budgetary authorities. The earmarked beneficiary organisations come from different Member States as follow:

Countries	2004	2005
Belgium	9	8
Netherland	6	6
United Kingdom	5	5
Deutschland	6	7
France	4	4
Danemark	3	2
Italy	1	1
Finland	1	1
Spain	1	1

For the financial year 2006, a call for proposals has been published on 18/08/2005 with the deadline 28/10/2005 for submission of proposals. The Commission received 220 applications.

Further information about this call for proposal is available on the following web address:

http://ec.europa.eu/comm/culture/eac/other_actions/support_eur_org/part2_form_en.html

Part III: Action to support the preservation and the commemoration of the main sites and archives associated with the deportations, symbolised by the memorials which have been raised on the sites of the former camps and other places of mass-civilian martyrdom and extermination, and to keep alive the memory of victims at these sites.

The Action is carried out through the publication of an annual call for proposals.

For 2004 and 2005, 53 projects have already been selected via the publication of two calls for proposals (EAC 33/2004 and EAC 91/2004).

The lists of the projects funded are available on the following web address:

http://ec.europa.eu/comm/culture/eac/other_actions/support_eur_org/pdf_word/resultsEAC33_2004.pdf

http://ec.europa.eu/comm/culture/eac/other_actions/support_eur_org/pdf_word/results_call_91_04.pdf

For 2006, the call for proposal has been published on 02/03/2006 . The deadline for submission is 21/04/2006.

Further information about this call for proposals are available on the following address:

http://ec.europa.eu/comm/culture/eac/other_actions/support_eur_org/mem_form_en.html

1.2.5 Management of the programme

- Part I of the programme is managed by Unit A5 – Multilingualism Policy

- Part II and part III of the programme have been managed by Unit C1 – Culture. From 1st January 2006, the management of these two actions has been transferred to the Executive agency “Education, Audio-visual and Culture” to Unit P5 “Culture”.

1.2.6 Previous evaluations

An external evaluation of the budgetary line A-3042 (Cultural bodies of European Interest) was carried out on behalf on the European Commission in 2002 .

An external evaluation of the activities in the field of regional and minority languages (1998-2002) was carried out on behalf on the European Commission in 2004 .

2. CONTRACT OBJECTIVES & EXPECTED RESULTS

2.1 Overall objectives

The overall objectives to which this contract should contribute are as follows:

- Possible improvements in the implementation of any future EU-programme. Even if the current programme comes to an end by the end of 2006, the three actions are supposed to be implemented through other framework programmes (Part I through Life long learning programme, Part II through the “programme Culture 2007-2013” and Part III through the programme “Citizens for Europe 2007-2013” for the Part III).
- Detailed assessment report to be provided by the Commission on the implementation of the current programme by 31 December 2007 in conformity with Decision 792/2004/EC

2.2 Specific objective

The specific objective of this contract is to procure an external, independent final evaluation of the current (2004-2006) programme. This evaluation should focus on the entire programme period (2004-2006).

2.3 Results to be achieved by the contractor

The results to be achieved by the contractor are as follows:

- A final external evaluation of the current “Community action programme to promote bodies active at European level in the field of Culture”.

- Recommendations for the improvement of the implementation of these actions in any future DG-EAC programme.
- A presentation of the final results in the premises of the Commission in Brussels.

3. THE EVALUATION

3.1 Scope and coverage of the evaluation

The evaluation should focus on the implementation of the current programme (2004-2006)

The specific issues to be evaluated are as follows:

- Effectiveness of the programme ;
- Its efficiency and cost-effectiveness ;
- Its sustainability

3.2 Main evaluation questions

The main evaluation questions have been grouped under 3 main headings. It is expected that the contractor will provide conclusions on the “programme European Cultural Organisations” as a whole as well as on the three different parts of the programme.

- i) Effectiveness
- ii) Efficiency
- iii) Sustainability

In each heading, the main evaluation questions have been further detailed in order to propose some judgement’s criteria to the contractor. These criteria aim to guide the contractor to provide concrete answers to the main evaluation question.

It is also expected that the contractor selected will use their knowledge and experience to refine these questions and propose further questions to the Steering Group.

- i) Effectiveness

It is anticipated that some research by the contractor, both documentary and on the basis of interviews with relevant players, will be required in order to clarify the current interpretation of official goals.

In order to provide an answer to the following questions the contractor should focus on the effectiveness of each part of the programme with respect to their specific objectives and priorities. Nevertheless, the contractor is expected to provide a conclusion on the overall effectiveness of the programme.

- To what extent does the programme as a whole contribute to the development and implementation of Community cooperation policy and actions in the field of culture?

In particular, as example of judgement's criteria it is proposed to the contractor to determine to what extent is the programme on track to:

- a) stimulate exchanges of experiences in order to promote greater cultural diversity and cultural dialogue and to enhance mutual knowledge between cultures
 - b) contribute to the mobility of art and artists in Europe
 - c) improve the knowledge and dissemination of the Culture and history of the European peoples
 - d) preserve and commemorate of the main sites and archives associated with deportations, symbolised by the memorials which have been raised on the sites of the former camps and other places of mass-civilian martyrdom and extermination, and the keeping alive of the memory of the victims at these sites
 - e) foster the impact of the implemented activities on the general public (visibility and accessibility)
 - f) dissemination of information on Community action to regional and minority language communities in the 25 Member States (Eblul and Mercator Centres)
 - g) research and dissemination of information on regional and minority languages in the fields of legislation, education and media (Mercator Centres);
 - h) representation of regional and minority language communities in the 25 Member States (Eblul)
- Looking at the implementation of the programme, what have been the major constraints on the achievement of the global objectives?

ii) Efficiency

In order to provide an answer to the following question the contractor should focus on the efficiency of each action of the programme with respect to their specific objectives and priorities. Nevertheless, the contractor is expected to provide a conclusion on the overall efficiency of the programme.

- How, economically, have the various inputs of the programme (financial and human resources) been converted into outputs (projects and complementary activities) and results? To what extent are the current mechanisms of intervention the most appropriate in terms of cost-effectiveness? To what extent could other mechanisms of intervention improve the cost-effectiveness of the programme?

Here are some sub-questions in order to guide the contractor to answer to the above main evaluation question:

- a) How appropriate has the frequency and timing of calls for proposals (invitation to

submit an application in case of earmarking) been?

- b) How user-friendly have the calls for proposals / infopack (in case of earmarking) been?
- c) How efficient has the selections process in the different parts of the programme been?

- d) How efficiently have agreements with beneficiaries been prepared, dispatched, monitored, controlled and liquidated?
- e) To what extent are the budget of the programme and the resources deployed for its implementation commensurate with its intended outputs and results?
- f) Grant amounts: to what extent are small scale bodies/activities/projects which require small amounts of funding able to achieve the objectives of the programme?

iii) Sustainability

- To what extent has the financial community support created some synergies in order to allow a long-term and lasting development of the beneficiaries' activities in the future?

3.3 Methodology to be followed in data collection and analysis

This section gives broad guidelines on the data collection tools and analysis methods to be followed by the contractor. It is expected that the contractor will use their knowledge and experience to refine the suggested approach in discussion with the Steering Group. Tenderers should justify their choice of evaluation techniques and point out relative advantages and disadvantages.

The evaluation should be approached in 6 stages:

- a) Reconstruction of the intervention logic
- b) Basic data and information-gathering
- c) Structured surveys
- d) In depth interviews
- e) Case studies
- f) Analysis and assessment.

All data used or referred to in the final evaluation report must be linked to comprehensive metadata (i.e., information enabling users to interpret the data correctly, such as definitions of variables used, sampling decisions, how the data was processed, etc). The sources of all information cited or otherwise referred to must also be given.

- a) Reconstruction of the intervention logic

The reconstruction of the intervention logic of the programme should be used to identify the data and information needed to carry out an analysis and assessment.

b) Basic data and information-gathering

Data and information should be gathered from published sources (programme documentation, Programme web site , evaluation reports, speeches etc.) and directly from the parties (applications, final reports, projects database, etc.).

c) Structured surveys

The evaluation should draw on information and views supplied by key programme stakeholders including:

- Project co-ordinators
- Project participants
- Project applications rejected
- Commission staff

The Key tool for gathering such views should be one or several structured questionnaire scripts. Focus group could be also considered. The contractor should invite questionnaire respondents to provide objectively verifiable evidence in support of their views.

d) In depth interviews

A sample of project coordinators should be interviewed in depth.

e) Case-studies

Case-studies should be undertaken of an illustrative sample of best-practice projects, and consideration given to examining less successful projects.

f) Analysis and assessment

Considerable emphasis should be placed on this stage of the evaluation. The detailed evaluation of the Programme should be guided by the data and information gathered from published sources, internal information from the administrators of the action and key stakeholders, information and opinion gathered by interviews, surveys etc. The contractor must support findings and recommendations by an explanation of the degree to which these are based on opinion, analysis, and objectively verifiable evidence. Where opinion is the main source, the degree of consensus and the steps taken to test the opinion should be given. Where overall judgements in terms of standard evaluation criteria are made, the criteria used should be explained.

3.4 Management

The contract will be managed by Unit C1 – Culture of the Directorate –General for Education and Culture. A stakeholder Steering Group will be involved in the management of the evaluation. The responsibilities of the Steering Group will include ensuring that the monitoring and supervision of the contractor does not compromise the contractor’s independence in evaluating the action.

4 LOGISTICS AND TIMING

4.1 Location

The operational base for the evaluation will be the contractor’s home office. It is anticipated that the contractor might need to carry out some interviews in some of the countries which participate to the programme.

The meetings with the steering committee (see point 4.4) shall take place in Brussels at the services of the Commission.

4.2 Starting date

The indicative starting date is by the end of December 2006. The contract will actually start after both parties have signed the contract.

4.3 Period of execution

The period of execution of the contract is a maximum of 7 months.

4.4 Work-plan and timetable

The following outline work plan and timetable is envisaged:

Deadline (from starting date) Task

Inception phase

One month Kick off meeting in Brussels (within one week from the signature of the contract from both parties). Contractor prepares inception report (within three weeks from the signature of the contract from both parties) and presents to Steering Group in Brussels.

Data and information collection phase

Middle of month 4 (105 days)

Desk and field research completed. Contractor presents interim report to the Steering Group in Brussels.

Analysis phase

End of month 5 (150days) Contractor presents draft final report and draft executive summary to Steering Group in Brussels.

In compliance with points 6. 1, 6.4 and 6.5 of these terms of reference Within 21 calendar days of the date when the Commission has sent its comments on the draft final report, contractor sends its final report in both paper and electronic version. .

The reporting requirements are specified in detail in section 6 below.

4.5 Budget

The estimated total budget, covering all the results to be achieved by the contractor as listed in section 2.3 above, is between 50.000 €- 70.000 €

5. REQUIREMENTS

5.1 Personnel

5.1.1 Overall requirements

The tenderer should propose an allocation of resources that they believe will best achieve the desired results, taking into account the evaluation scope and indicative methodology described in section 3 above.

5.1.2 Key experts

All experts who have a crucial role in implementing the contract are referred to as key experts. The profiles of the key experts for this contract are set out below. It is not necessary that each of these profiles correspond to a single individual. One expert may have the skills and experience required to cover more than one role in the project. Equally, one role may be divided between two or more experts if the Tenderer believes that this will be the most effective way to achieve the desired results. In addition, a higher number of experts may be proposed than indicated below. Whatever the case, the team proposed by the Tenderer must possess all the skills and experience described below:

Key expert 1: Team Leader

Qualifications and skills

Graduate qualification. Excellent project planning and project management skills. Excellent oral and written communications skills. Team-building and management skills.

Professional experience

In-depth, up-to-date knowledge of and practical expertise in leading-edge evaluation techniques. A minimum of 5 years of experience of the evaluation of policies or expenditure programmes. Significant experience of leading evaluation projects in international settings. In-depth knowledge of EU policies dealing with Culture policies. In-depth knowledge of EU policies dealing with Language policies.

Key expert 2

Qualifications and skills

Graduate qualification. Excellent project management skills. Excellent oral and written communications skills. Excellent survey, questionnaire and structured interview design skills. Skilled in manipulating and analysing survey data.

Professional experience

In-depth, up-to-date knowledge of and practical expertise in leading-edge evaluation techniques. At least 3 years of experience of the evaluation of expenditure programmes. Significant experience of taking a prominent role in evaluation projects in international settings. Experience in conducting interviews.

Key expert 3

Qualifications and skills

Graduate qualification. Excellent communications skills.

Professional experience

Knowledge of evaluation techniques. Experience of the evaluation of expenditure programmes. In-depth knowledge of EU policies dealing with culture policies.

Key expert 4

Qualifications and skills

Graduate qualification. Excellent communications skills.

Professional experience

Knowledge of evaluation techniques. Experience of the evaluation of expenditure programmes. In-depth knowledge of the EU policies dealing with culture policies.

5.2.3 Facilities to be provided by the Contractor

The Contractor shall ensure that experts are adequately supported and equipped. In particular it shall ensure that there is sufficient administrative, secretarial and interpreting provision as necessary, to enable experts to concentrate on their primary responsibilities.

6. REPORTS

6.1 Reporting requirements

10 copies of the final report must be submitted to the responsible body (see section 3.4 above) in printed form. Each report (inception, interim, draft final report, final report) must also be sent to the responsible body by email. Electronic files must be in Microsoft Word for Windows format. The language and style required for each report are specified in sections 6.2 to 6.6 below.

The period within which the responsible body will comment on all reports is specified in sections 6.2 to 6.6 below. In the absence of observations from the responsible body within the deadlines specified, the report will be considered as being approved. If not specified in the articles here below, within 21 calendar days of receiving the responsible body's observations, the contractor must submit the report in definitive form, taking full account of these observations, either by following them precisely, or by explaining clearly why they cannot be followed. If the responsible body still considers the report unacceptable, the contractor will be invited to amend the report until the Commission is satisfied.

6.2 Inception report

The inception report must be submitted in English within twenty one calendar days of the date of signature of the contract by the last of the two parties. The responsible body will comment on the inception report within 21 calendar days of its receipt. It should detail how the methodology proposed by the contractor is going to be implemented in the light of an examination of the quality and appropriateness of existing data, and in particular how the methodology will answer each evaluation question and provide a judgement.

6.3 Interim report

The first interim report must be submitted in English by the middle of month 4 from the date of signature of the contract by the last of the two parties. The responsible body will comment on the interim report within twenty one calendar days of its receipt. The aim of this first interim report is to provide information about the initial phase of data collection in the field (primary data) and secondary data.

The report should contain information on possible problems encountered in the data collection activity as well as a calendar for the remaining activities to be carried out. The contractor may be in a position to provide preliminary answers on some of the evaluation questions. This report will provide the basis for a dialogue between the contractor and the Steering Group about the adequacy of the data collection activity.

6.4 Draft final report

The draft final report, including a draft executive summary, must be submitted, in English, by the end of month 5 of the date of signature of the contract by the last of the two parties. The responsible body will comment on the draft final report within twenty one calendar days of its receipt.

This document must provide the conclusions of the evaluator in respect of the evaluation questions in the terms of reference, and must be clearly based on evidence generated through the evaluation. The draft final report should also contain some exploratory recommendations developed on the basis of the conclusions reached by the evaluator.

It is essential that the report be clear, unambiguous and comprehensible for the non specialist.

Any potential reader must be able to understand:

- the purpose of the evaluation;
- exactly what was evaluated;
- how the evaluation was designed and conducted;
- what evidence was found;
- what conclusions have been drawn on the basis of this evidence;
- what recommendations are being made / lessons learnt on the basis of these conclusions.

The structure of the report should reflect its different uses and follow a broad classification into three parts:

- Executive summary. This must provide, in a maximum of 10 pages, a synthesis of
 - a) general description of the programme/action etc. to be evaluated

- b) purpose of the evaluation
- c) scope of the evaluation
- d) methodology
- e) Strengths and weakness of the chosen evaluation design
- f) the main conclusions of the evaluation and the key items of evidence that underpin them, g) the resulting recommendations.

- Main report. This must be aimed at those directly involved in the evaluation and the management of the Programmes. The main report must present in full the results of the analyses, conclusions and recommendations arising from the evaluation. It must also contain a description of the activity to be evaluated, the context of the evaluation, and the methodology used (with an analysis of the latter's strengths and weaknesses).

- Technical annexes. These should collate the technical details of the evaluation, and must include the terms of reference, questionnaire templates, interview guides, any additional tables or graphics, and references and sources.

More details about the structure of the main part of the draft final report will be provided to the selected contractor by the responsible body .

The draft final report will be subjected to a preliminary quality assessment that will verify the extent to which it respects the relevant criteria contained in the contracting authority's Evaluation Standards .

6.5 Final report

The final report and executive summary must be submitted within 21 calendar days of the date when the Commission has sent its comments on the draft final report. The responsible body will comment on the final report within fifteen calendar days of its receipt.

The body of the report must be written in English. The executive summary must be written in English, French and German. It must take into account the results of the quality assessment of the draft final report and discussions with the Steering Group about the draft final report, insofar as these do not interfere with the autonomy of the evaluator in respect of their conclusions.

6.2 Table concerning the recall of evaluation questions

■ A. Effectiveness of the programme and of its Parts

The questions raised by the task specifications concerning the effectiveness of the programme and its Parts have been summed up into three evaluation questions, which will be answered for each Part of the programme. Some of those questions raised by the terms of reference will be answered through the feeding of adequate effectiveness indicators in relation to the objectives each of these questions refers.

Questions asked by the terms of reference	Proposed evaluation questions	Parts involved
To what extent is the programme on track to represent regional and minority language communities in the 25 Member States (Eblul)? (part I)	A1. What are the outputs of the programme or one of its Parts? Has the programme or its Parts achieved its operational objectives ? A2. What are the results of the programme or one of its Parts? Has the programme or its Parts achieved its specific objectives ?	Parts I, II and III
To what extent is the programme on track to disseminate information on Community action to regional and minority language communities in the 25 Member States (Eblul and Mercator Centres)? (part I)		
To what extent is the programme on track to search for and disseminate information on regional and minority languages in the fields of legislation, education and media (Mercator Centres)? (part I)		
To what extent is the programme on track to enhance mutual knowledge between cultures? (part II)		
To what extent is the programme on track to stimulate exchanges of experiences in order to promote greater cultural diversity and cultural dialogue? (part I and II)		
To what extent is the programme on track to contribute to the mobility of art and artists in Europe? (part II)		
To what extent is the programme on track to improve the knowledge and dissemination of the Culture and history of the European peoples? (part III)		

<p>To what extent is the programme on track to preserve and commemorate of the main sites and archives associated with deportations, symbolised by the memorials which have been raised on the sites of the former camps and other places of mass-civilian martyrdom and extermination, and the keeping alive of the memory of the victims at these sites? (part III)</p>		
<p>To what extent is the programme on track to foster the impact of the implemented activities on the general public (visibility and accessibility)? (part I, II and III)</p>		
<p>To what extent does the programme as a whole contribute to the development and implementation of Community cooperation policy and actions in the field of culture?</p>	<p>A3. To what extent does the programme as a whole contribute to the development and implementation of Community cooperation policy and actions in the field of culture?</p>	<p>programme</p>
<p>Looking at the implementation of the programme, what have been the major constraints on the achievement of the global objectives?</p>		

■ **B. Implementation and efficiency of the programme Parts**

Questions asked in the task specifications	Evaluation question	Parts
<p>How appropriate has the frequency and timing of calls for proposals (invitation to submit an application in case of earmarking) been?</p> <p>How user-friendly have the calls for proposals / info pack (in case of earmarking) been?</p>	<p>B1. To what extent has the call for proposals procedure (conception, publication and implementation) allowed an effective implementation of the programme or of one of its Parts? ¹</p>	<p>Parts II and III</p>
<p>How efficient has the selections process in the different parts of the programme been?</p>	<p>B2. To what extent has selection procedure allowed an effective² implementation of the programme or of one of its Parts?</p>	<p>Part II (from 2006), and part III</p>
<p>How efficiently have agreements with beneficiaries been prepared, dispatched, monitored, controlled and liquidated?</p>	<p>B3. How effectively have agreements with beneficiaries been prepared, dispatched, monitored, controlled and liquidated? Has it increased over the period?</p>	<p>Parts I, II and III</p>
<p>How, economically, have the various inputs of the programme (financial and human resources) been converted into outputs (projects and complementary activities) and results?</p> <p>To what extent are the budget of the programme and the resources deployed for its implementation commensurate with its intended outputs and results?</p> <p>Grant amounts: to what extent are small scale bodies/activities/projects which require small amounts of funding able to achieve the objectives of the programme?</p> <p>To what extent are the current mechanisms of intervention the most appropriate in terms of cost-effectiveness?</p> <p>To what extent could other mechanisms of intervention improve the cost-effectiveness of the programme?</p>	<p>B4. To what extent are the budget of the programme and the resources deployed for its implementation commensurate with its intended outputs and results? Are the current mechanisms of intervention the most appropriate in terms of cost-effectiveness?</p>	<p>Parts I, II and III</p>

¹ It was decided with the steering group to not analyze deeply the effectiveness of the earmarked selection procedure, but to put the emphasis on the call for proposal procedure.

² It was decided with the steering group to analyze the effectiveness of the selection procedure, and not the efficiency, as it was set forth in the call for tender.

■ **C. Sustainability of the programme Parts**

Questions asked in the task specifications	Evaluation question	Parts
To what extent has the financial community support created some synergies in order to allow a long-term and lasting development of the beneficiaries' activities in the future?	C1. To what extent has the financial community support created some synergies in order to allow a long-term and lasting development of the beneficiaries' activities in the future?	Parts I, II and III

PRESENTATION OF MERCATOR EDUCATION

- ✓ Mercator is an information and documentation network which aims at improving the exchange and circulation of information on minority languages and cultures. It provides the general public as well as people with special interests with up to date and reliable information on the situation of the linguistic communities.
- ✓ Mercator Education specializes in the theme of education of minority languages in Europe. It collects information on regional languages educating, teaching and learning through a local expert's network. Those experts initiate, support and publish the elaboration of technical dossiers on these languages. They provide research material as well as pedagogical material on their website, and answer all technical questions from different publics.

Financial elements

During the programme period, Mercator Education relied on European funding for 60 to 73% of its resources. A more detailed analysis is presented in the Efficiency assessment.

Table 3 : Evolution of Mercator Education grant funding in € (2004-2006)

	2004	2005	2006
EU grant	72 400	140 000	140 000
Own resources	19 746	53 978	38 277
Total	94 150	195 983	180 283

Source: Mercator Education final financial statements for 2004, 2005, 2006.

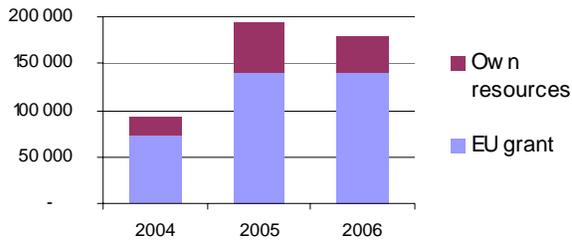

In 2005, only part of the grant was used within the legal year, and almost half was used in the first month of 2006, which allowed for a peak in activity and staff (8 persons).

An important part of its functioning costs are covered by the Fryske Academy (Ljouwert Frisian university) which shelters the Mercator Education project and structure.

The Fryske Academy provides Mercator with legal base, bank account, and support staff. Mercator research staff all work at the Fryske Academy, in the Department of social sciences. Mercator has its own budgetary line.

The Province of Friesland (local government) and the Royal Netherland Academy of Arts and Sciences specifically support the "Digiby" project (digital Library) managed by Mercator Education.

Figure 125 Evolution of Mercator Education resources (in €)

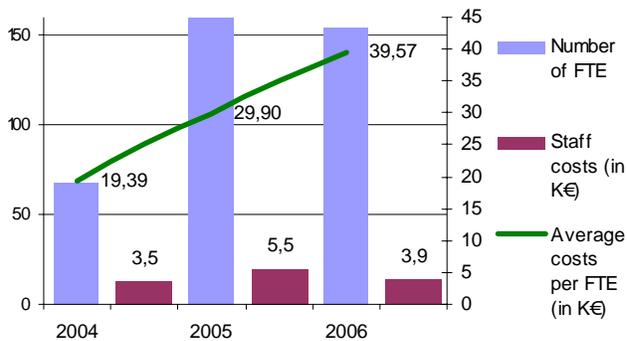

Source: Mercator Education final financial statements 2004, 2005, 2006.

Mercator Education has a stable proportion of own private resources, which has evolved from 27% in 2004 to 39% in 2005, to return to 27% in 2006.

It is interesting to note that the important increase of the EU grant, which almost doubled between 2004 and 2006, has not lead to a decrease of Mercator Education own resources.

This highlights the lever effect of the EU grant for other funding, whether they are private or public. According to the stakeholders, the EU funding plays the role of a positive signal for other potential financial supporters.

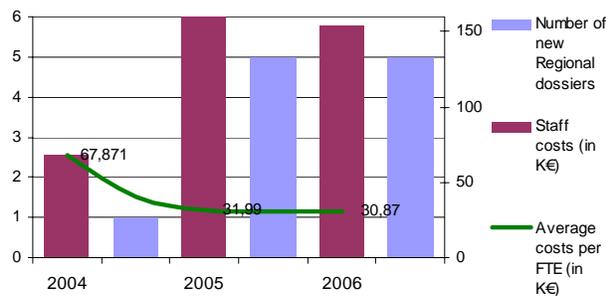

Figure 126 Mercator Education expenditure distribution, in € (2004-2006)

Source: Mercator Education final financial statements 2004, 2005, 2006.

- Staff costs represent the major share of expenses by large. It amounts to 83% (on average) of expenditure overall, which hides an evolution between 2004 and 2005-2006. In fact, the staff costs evolved from 74% in 2004 to 82% in 2005, to 87% in 2006. The gap between 2004 and 2005 is explained by the late use of the first year grant, which was mostly used in 2005. The delayed use of the 2004 grant in 2005 generated both a peak in activity (Actions and dissemination) and 8 recruitments. These two elements make 2005 a special year, both in terms of staff costs and of action costs, which appear higher or lower than their overall trend.

Figure 127 Mercator Education expenditure distribution, per year (in €)

Source: Mercator Education final financial statements 2004, 2005, 2006.

- Travel costs decreased throughout the period, as well and conferences and seminars. This cost item is higher in 2004 because the 3rd international Mercator Symposium was organized by Mercator Education and took place in Ljouwert/ Leeuwarden. This corresponds to the rotation between the 3 Mercator centers established in order to avoid making the cost of such a conference weigh on the same centre.
- Operating costs remained low and constant throughout the period. It reflects the fact that the Fryske University supports Mercator for the basic costs (premises, electricity etc).

EFFECTIVENESS : OUTPUTS ASSESSMENT

Overview of Mercator education main activities in the past three years

The realizations of Mercator have remained at the same level over the period: this consistency seems to be very useful to develop expertise and popularity among the countries.

✓ Regional dossiers

The Regional dossiers are compact booklets aiming at “providing policy-makers, teachers, students, researchers, journalists and others with compact, basic information on schooling in minority language regions in the European Union”. The number of existing dossiers reaches 38 in 2006. They are being updated every 5 years, to ensure the relevance of its content. They are written by expert authors selected by Mercator Education staff, and reviewed by a second expert before publication.

Table 4: Evolution of Regional dossiers realized by Mercator Education

	2004	2005	2006	Total

Number of downloads	9 764	18 254	na	na

✓ European network of schools

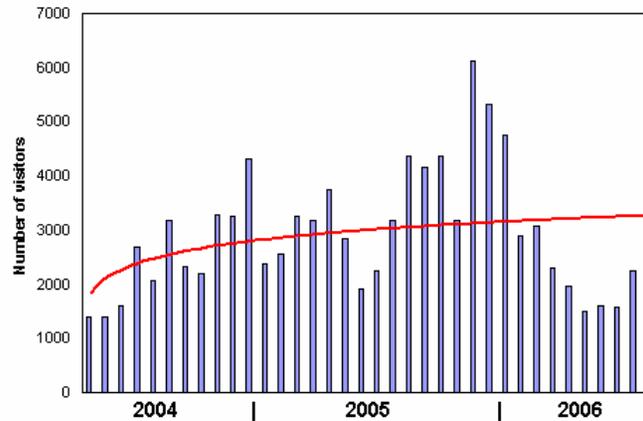

In January 2003 Mercator-Education started a digital network for bi- or trilingual pre-primary and primary schools in the European minority language regions, before expanding the network with multilingual secondary schools in those regions. This initiative aims at creating links between teachers in minority languages and pupils, in order to improve the diffusion of specific methods and to fight the minoritarian feeling among children, through sharing common experiences.

✓ Website:

- Mercator education fulfils many roles: visibility of Mercator,
- dissemination of research, networking of experts and stakeholders,
- sharing of documentary resources
- sharing of good practices and experiences

As the chart shows, there has been a steady increase in the number of visitors on Mercator's website.

✓ Mercator Education also participates in several joint projects with the other Mercator centres and EBLUL :

- Symposia (annual conference gathering the 3 Mercators)
- Promotional material (editing and publication of joint promotional material)
- Common website (Visual identity for the Mercator websites, leading to more harmonization)
- Monthly newsletter

	Disseminating at European level information in the field of education	<p>The information gathered by Mercator Education appears to be very efficiently re-disseminated on as wide a scale as it was collected from. The diversity of nationalities interested in Mercator Education’s realization is a sign of wide dissemination “at European level”.</p> <ul style="list-style-type: none"> • Among the weaknesses concerning Mercator Education outlined in the 2004 evaluation report was the issue of dissemination : <p><i>“Dissemination of the centres’ output and their visibility beyond their own and neighbouring states needs addressing, as they tend not to be too well known among regional and minority language constituencies”.</i></p> <p>There was no strong communication to reach the target groups in the school community. It remains uneasy to assess the level of notoriety of Mercator Education in the RML communities. However, two elements clearly point out an improvement in this matter: first, the increase in the number of persons reached through common dissemination tools (website visitors, downloaded regional dossiers etc), and second, the increase of participants to networks (Schools, experts network etc).</p> <p>A clear effort has been cast on the dissemination tools, with visible results.</p>	
	Disseminating European information in the minority language communities	<p>This objective derives from the Annex I to the Regulation: “dissemination of information on Community action”. It is not entirely fulfilled, as Mercator Education is not a strong relay for Community information about its cultural and linguistic policies.</p> <p>However, in a more general manner, Mercator Education contributes to disseminating information of European relevance. The interconnections established between language minorities in different countries, such as the exchange between Basques in Spain and Frisians in the Netherlands underlines the effective dissemination of European information.</p>	
<p>Conclusion on outputs :</p> <p>Considering the increasing level of Mercator Education activities over the past three years, the operational objectives can be considered as achieved.</p>

<p><i>A.1.2 What are the results of Part I? There has been a clear increase in coverage, since more countries and languages are studied in the Regional dossiers every year.</p> <p>The enlargement has been clearly taken into account, since studies were carried out on the RML in the 10 new Member states as soon as they integrated the EU, as showed in the table below.</p> <table border="1" data-bbox="726 610 1654 1076"> <thead> <tr> <th colspan="4" data-bbox="726 610 1654 646">List of RML on which information was collected</th> </tr> <tr> <th colspan="3" data-bbox="726 646 1388 737">Regional dossiers already published</th> <th data-bbox="1388 646 1654 737">Regional Dossiers to be published</th> </tr> </thead> <tbody> <tr> <td data-bbox="726 737 869 769">Asturian</td> <td data-bbox="869 737 1129 769">Gaelic</td> <td data-bbox="1129 737 1388 769">Occitan</td> <td data-bbox="1388 737 1654 769" rowspan="10">Võro in Estonia Polish in Lithuania</td> </tr> <tr> <td data-bbox="726 769 869 802">Basque</td> <td data-bbox="869 769 1129 802">Galician</td> <td data-bbox="1129 769 1388 802">Romani & Beash</td> </tr> <tr> <td data-bbox="726 802 869 834">Breton</td> <td data-bbox="869 802 1129 834">German</td> <td data-bbox="1129 802 1388 834">Sami</td> </tr> <tr> <td data-bbox="726 834 869 867">Catalan</td> <td data-bbox="869 834 1129 867">Hungarian</td> <td data-bbox="1129 834 1388 867">Scots</td> </tr> <tr> <td data-bbox="726 867 869 899">Cornish</td> <td data-bbox="869 867 1129 899">Irish</td> <td data-bbox="1129 867 1388 899">Slovak</td> </tr> <tr> <td data-bbox="726 899 869 932">Corsican</td> <td data-bbox="869 899 1129 932">Kashubian</td> <td data-bbox="1129 899 1388 932">Slovene</td> </tr> <tr> <td data-bbox="726 932 869 964">Croatian</td> <td data-bbox="869 932 1129 964">Ladin</td> <td data-bbox="1129 932 1388 964">Sorbian</td> </tr> <tr> <td data-bbox="726 964 869 997">Finnic</td> <td data-bbox="869 964 1129 997">Lithuanian</td> <td data-bbox="1129 964 1388 997">Swedish</td> </tr> <tr> <td data-bbox="726 997 869 1029">Frisian</td> <td data-bbox="869 997 1129 1029">North Frisian</td> <td data-bbox="1129 997 1388 1029">Turkish Occitan</td> </tr> <tr> <td></td> <td></td> <td data-bbox="1129 1029 1388 1076">Welsh</td> </tr> </tbody> </table> <p>It is difficult to determine the exact number of RML in Europe, which Unesco estimates at around 120 languages. 	Promoting the linguistic diversity in the Union	<p>Mercator Education promotes the linguistic diversity by improving the general and technical knowledge about these RML in Europe. Through its conferences, network of schools, and publication, Mercator Education acts strongly in favour of linguistic diversity in the Union, and facilitates the integration of minority languages in education.</p> <ul style="list-style-type: none"> • Among the weaknesses concerning Mercator Education outlined in the 2004 evaluation report was the issue of recommendations : <p><i>“Considering the expertise of the Mercator Education as a centre of information brokers and the already proven quality and usefulness of the dossiers, it might be a fruitful task to include, in future revised editions of the dossiers, a set of recommendations for each of the linguistic communities studied.”</i></p> <p>This element has not been included in the regional dossiers. The “promotion” objective is not fulfilled through activism in the countries concerned or recommendations leading to a better acknowledgement of a language. The part of Mercator is not to take position on a political and institutional given situation, but to inform about it, and not to make practical recommendations.</p>	✓
	Safeguarding the linguistic diversity in the Union	<p>Safeguarding a minority language means increasing or stabilising the number of speakers. It appears very difficult to find data on the number of speakers in minority languages. Learners and teachers are targeted by Mercator Education. The increased number of dossiers and the increased use of the website is a step forward in the contribution of Mercator Education to the safeguarding of language diversity.</p>	✓
<p>Conclusion on results:</p> <p>Considering the remarkable quality and scope of the realisations, Mercator Education has achieved the strategic objectives.</p>			

ADDED VALUE AND SUSTAINABILITY

Added value of EC support

There is a strong added-value of the EC support. It allows arousing confidence in the public, as well as in the other supporters. According to the Mercator Education staff, it brings credibility and visibility to Mercator activities and boost its impacts on users.

- Among the weaknesses concerning Mercator Education outlined in the 2004 evaluation report was the issue of allocation of tasks between the 4 organisms in Part I :

“Asymmetry in the size and scope of EBLUL and MERCATOR should lead to clearer distribution of functions between the 4 institutions”.

The 3 Mercator centres are organised on the basis of autonomy. The thematic division of study fields allowed a limited overlapping. The coordination issue seems to be solved by the coordination meetings organised regularly between the Mercator centres, combined with the annual Symposia gathering the 3 Mercator. Moreover, the limited role of EBLUL has reduced considerably the problem, although the risk of overlapping is not suppressed.

Sustainability : perspectives for 2007-2013

For the coming years, Mercator Education managed to find other projects, supported by other institutions, such as a pilot study on the viability of a language research on multilingualism in Frisian. This project has materialized itself under the form of a city covenant with the city of Ljouwert.

Mercator education will also apply to the Lifelong learning programme. Finding new partners didn't worry Pr. Gorter, as they were already in contact with many experts and partners trough their network.

The end of their operating grant is seen as an opportunity to restructure Mercator, launch new projects and rethink the Centre's strategy and purposes.

PRESENTATION

- ✓ Mercator Legislation and Linguistic rights belongs to the Mercator Centers network, which are research and documentation centres dealing with the regional and minority languages.
- ✓ Mercator Legislation and Linguistic rights is a centre specializing in documentary resources relative to EU RML through a legal focus; it gathers documents and realizes studies about the RMLs legal acknowledgment, their use in the administration, and the issue of linguistic rights. They publish regularly updated overviews on local legislation on RMLs, as well as judicial watch at international and European level.

Financial elements

Mercator Legislation has relied in European Union grant for 73 to 74% percent of its total budget in 2005 and 2006. Besides its own resources, it receives a subsidy from a foundation (Fundació pels Drets Col·lectius dels Pobles).

An important part of its functioning costs are covered by the CIEMEN (Centre Internacional Escarré per a les minories ètniques i les nacions) which shelters the Mercator Legislation project and structure.

Realizations of Mercator legislation per year

Mercator Legislation has several projects, which can be organized into three kinds:

Information and documentations services

✓ Database and resource centre

Approximately 400 new documents were uploaded in the database on 2006.

The information available on the database mainly consists in legal texts, which are both difficult to find on institutional websites. The database was re-structured and reorganized in 2005 and 2006, in order to incorporate new legal and regulatory documents and facilitate access to them.

In 2006, the database has known an important increase in interest: a convention with the Linguistic policy Secretary (SPL) of the Generalitat de Catalunya signed in November 2006 creates a convergence between Mercator database and the SPL database, with more than 16000 entries concerning state legislation.

✓ Information and documentation demands.

Mercator Legislation plays an important of expert in the field of linguistic rights. Therefore, its Q&A service answers many queries, from different categories of public.

An archive section was introduced to the Newsletter page, in order to offer all previous newsletters to the readers.

Research and studies

✓ Bulletins

The Mercator Bulletins are a quarterly publication, edited in electronic as well as paper version. Mercator Legislation Bulletins contain a in-depth overview of constitutional and legal changes concerning RMLs in European countries. It also includes the most important judicial decisions with an incidence on the use of RMLs. The Bulletin also includes a bibliography of recent publications of interest. Bulletins convey the original legal texts and their translation.

✓ Dossiers

The Dossiers focus themselves on theme, with the aim of analyzing a concrete situation rather than disseminating primary documentation. They are written in English and Catalan. It can be realized whether by a Member of Mercator Legislation team, or by an external expert.

✓ Work papers

The Work papers are monographs realized by external contributors, which can propose a work theme or be ordered by Mercator Legislation.

Dissemination and publications.

✓ Website

The webpage was translated into German and Polish in 2006, which raises the number of languages available to 5.

English and French versions already existed, beside Catalan. The most consulted pages are the map of each linguistic minorities' zones, the Italian Constitution, and the "news" section.

Mercator Legislation also participates in several joint projects with the other Mercator centres and EBLUL:

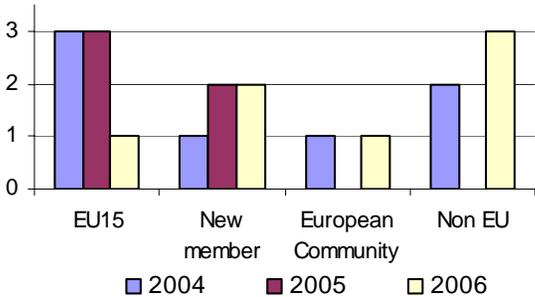

- Data base experts
- Symposia
- Promotional material
- Newsletter
- Website

Disseminating at European level information in the field of legislation

There is a clear increase in the dissemination of information during the period. First, an increase in the number of visitors of Mercator Legislation website can be noted. In 2006, the average number of hits is of 88 907 per month. They were of 75 000 in 2005, which reveals an increase of 18,5%. It follows the trend observed since 2004, and reveals an increase in interest from the site visitors.

However, the Consultancy service receives information demands from only 3% of persons from one of the 12 new Member states. This shows that there is still a small proportion of new European citizens in the users of Mercator Legislation services.

Figure 3 Geographical origin of Mercator Legislation information service users

Among the weaknesses concerning Mercator Legislation outlined in the 2004

		<p>evaluation report was :</p> <p>“Difficulties encountered when facing languages from the EU’s candidate and accession countries, which complicate speed in adding documents to databases reproducing them in the centre’s own publications.”</p> <p>This weakness seems to have been tackled. One of the main realizations of 2006 was the translation of the webpages into Polish. This effort towards a language that is not in the usual area of Mercator is a clear sign of inclusion of the EU latest Member states in its scope of action.</p>	
	Disseminating European information in the minority language communities	<p>In its evaluation report, Interact mentioned that one of Mercator Legislation’s strengths was: “Research generally focused on issues of interest to the EC and relevant to ongoing EU debates, as well as to subjects of a wider international relevance, with ability to change according to emerging issues.”</p> <p>Indeed it remains a strong point of Mercator Legislation’s work. Special edition of both Dossiers and Work papers were dedicated to the RMLs issues regarding EC law and the European constitution:</p> <ul style="list-style-type: none"> - The Juridical Regime of Languages and the Recognition of Linguistic Diversity in the European Constitution - Dossiers n°17, fourth quarter 2004: “The rules governing the languages of the European Union: which languages and to what extent? A practical guide ». <p>European information is considered and well disseminated.</p>	✓
	Conclusion on outputs		
	Mercator Legislation’s realizations are very well in line with the operational objectives of the Programme, and designed in order to be the most effective possible. There has been a visible increase in the range and tools of these realizations since 2004, which has allowed a better inclusion of new European Union Member states. It could still be increased.

	<p>Promoting the linguistic diversity in the Union</p>	<p>Among the weaknesses concerning Mercator Legislation outlined in the 2004 evaluation report was the lack of visibility.</p> <p>An optimal promotion of linguistic diversity cannot be lead without a strong visibility. This point seems to have been improved, through the work realised on the website. The increase in number of the visitors on the website, and the numerous conference to which Mercator Legislation took part (19 in 2006), is an important tool for promotion.</p> <p>Moreover, Mercator Legislation has worked on and promoted a Universal declaration of Linguistic rights, presented by the UN Council of Human Rights in 2007.</p>	<p style="text-align: center;"></p>																																																				

	Safeguarding the linguistic diversity in the Union	The safeguard of linguistic diversity has been taken in the narrow sense by Mercator legislation, which contributes effectively to a legal protection on linguistic diversity. The work of legal watch and dissemination it realizes is an important and useful tool in the field of RMLs. Mercator Legislation contributes greatly to safeguarding the linguistic diversity in the Union.	
<p>Conclusion on results</p> <p>Considering the quality of the outputs, the strong expertise and the coverage on European RMLs, Mercator Legislation has achieved the strategic objectives of the programme.</p>			

QUALITY OF IMPLEMENTATION

- Among the weaknesses concerning Mercator Legislation outlined in the 2004 evaluation report, it was mentioned:

“High rates of staff turnover, partly the result of insecurity about financial stability of the organization”.

This issue was mentioned during the interview. It is of course a consequence of the annual term of support, which give little long-term perspective to Mercator Legislation works, and to its staff, who can't be hired on a long-term contract. Nevertheless, the partnership implemented with the Linguistic secretary of the Catalan government is on a 9-year basis. It will certainly provide Mercator Legislation with more certainty, and therefore more stability to its team.

ADDED VALUE AND SUSTAINABILITY

Added value of EC support

- The Community support is of great value, not only on a financial basis. It is seen as a quality label, and it attracts very strongly other investor's confidence. It brings credibility, visibility, and it sparks often the path to financial autonomy.

Sustainability : perspectives for 2007-2013

Mercator legislation definitely benefits from the **local sensitivity to RML** in Catalunya. The team also believes that the issue of RMLs recognition will at a time gain in visibility in the European Union, for two reasons: most new Member states have an official language with low speakers' community, and there is an increasing "legalization" of the issue of linguistic rights. As a consequence, the increasing in time interest and relevance of their research seems likely.

In terms of **financial support**, Mercator Legislation has followed the path of the other Mercator centres, and has found new resources. There are many savings banks in Spain, and a banking sector law requires every savings bank to have a foundation, dedicated to social works. It is a very important source of funding for non-profit organization, and many different saving banks are already partners for some of the CIEMEN's projects.

Contracts have already been signed between Mercator Legislation and some Catalan language agencies on specific projects, which make Mercator Legislation a sort of sub-contractor.

Mercator Legislation applied to the Lifelong learning programme. The privileged "exit strategy" from the 2004-2006 Programme is to **create a wider Mercator Network** with the 3 centres already in place, including new Member states partners. Contacts have already been firmly established with France, Italy, Slovenia, Czech Republic, Hungary, Slovakia and Estonia, to create a RML research network.

PRESENTATION OF MERCATOR MEDIA

- ✓ Mercator is an information and documentation network which aims at improving the exchange and circulation of information on minority languages and cultures. It provides the general public as well as people with special interests with up to date and reliable information on the situation of the linguistic communities.
- ✓ Mercator Media specializes in the theme of Media, related to minority languages in Europe, but the term media is defined widely, to include radio, television, film, newspapers, magazine and book publishing, archives and libraries and electronic data storage and networks. The work programme has included conferences, study visits, discussion groups, international publications and research work for the television and film industries.
- ✓ The Mercator Media project is now hosted at the Department of Theatre, Film and Television of the University of Wales in Aberystwyth, which is the biggest department in this University.

Financial elements

Mercator Media relies for broadly 80 % of its budget on European funding, and 20% provided by the University of Wales. Mercator staff works at the University of Wales, in the Department of theatre, film and television studies, but it is dedicated to Mercator projects.

Overview of Mercator Media main activities in the past three years

Media covers several projects, with different aims :

1. Consolidation of works with the enlargement countries

- ✓ Extend the network of informants, especially in the enlargement countries

For 2004, 65 new informants coming from the 12 new Member states:

	Latvia	1
	Lithuania	1
	Poland	: 3
	Estonia	: 3
	Hungary	: 2
	Slovakia	: 1

| Czech Republic : 1

✓ Translation of questionnaires into languages of the enlargement countries

Translation in Russian and Polish. These versions are valuable for eastern countries.

✓ Contact Media institutions in new Member states

260 institutions in new Member states were contacted (television, radio broadcasters, on line media, printed press, book publishers, etc.)

✓ New entries from new Member states in the database

145 entries in the media database from new Member states.

✓ Overviews of media in enlargement countries

State by state overviews of the broadcast media have been added for the Czech Republic, Estonia , Malta, Slovakia and Slovenia along with specific language overviews

2. Development of Website

✓ Updating information on the Database

The basis is updated once a month. Except at the beginning of 2004, this rythm was followed.

✓ Improvement of the accessibility of website

Review of Mercator's ranking on six major search engines : ranked first on two, good ranking on others

6 new links from other minority language related websites (22 requests)

New section added to the front page

Subscription facility to the monthly electronic newsletter

Expansion of the news archive section

Improvements mainly concerned consistency of fonts, updating of links, and hierarchisation within the listing of publications. Links between University of Wales and Mercator.

On the year 2005-2006, 535 unique visitors to the website per week (former year, 466). A total of 27 820 through the year.

✓ Creation of FAQ

Answers provided within one working week.

✓ Reorganisation of overviews

10 overviews were added. Activity on going. The objective is to provide access according to language and state.

✓ Creation of a Webcasting Directory of Minority Language Media

Links with 41 media institutions undertaking webcasting (15 different states, 26 different languages)

✓ Translation of Website

French translation on going but part of it is achieved.

Example : 43 overviews of the 49 are available in French.

3. Publications

✓ Mercator Media Forum

Year 2004-2005: 200 pages with a large list of contributions provided by Mercator. 300 copies were sent to the OSCE.

Articles on media in enlargement countries. Source of the article: the office of the High Commissioner for National Minorities of the Organisation for Security and Cooperation in Europe , a conference held in October 2003 concerning a set of guidelines on the use of minority languages in the broadcast media.

Distributed in large numbers at the Commission's own conference on minority languages in education systems in April 2006.

✓ Mercator Monographs

On going (Templates were produced and texts for 2 monographs as pilot projects are prepared)

4. On line consultation in dubbing and subtitling

On line questionnaires on the public's practices and preferences concerning dubbing and subtitling. The 100 questions were submitted in three languages (Welsh, English, French)

5. Networks

✓ Network related to academics researching

2 new Members, 20 network Members

✓ Network related to informants

65 new informants.

✓ Network related to professionals (broadcasters, journalists, editors...)

Lack of results because not enough staff dedicated to this task.

6. Participation to events

20 major events mentioned in the final report, in adequacy with targets of the workplan

✓ Attendance to the International conference "Regional Languages in the New Europe"

Cooperation with EBLUL, MERCATOR centres and Commission

✓ Coordination meeting with Mercator centres and European Commission

✓ Mercator International Symposium

✓ Mercator electronic newsletter (monthly)

✓ Cooperation with EBLUL

Difficulties with the Lingualia project : discussions between EBLUL and CIEMEN foundation did not take place. The projects seems to be dropped.

EFFECTIVENESS : RESULTS ASSESSMENT

Evaluation question	Objective	Analyse					Assessment
A.I.2 What are the results of Part I? Has the part I of the programme achieved its specific objectives?	Representing all regional or minority language communities in the EU	As It was already mentioned, is difficult to determine the exact number of RML in Europe, which Unesco estimates at around 120 languages, and Euromosaic survey at 138. Mercator Media covers 63 RML in 2006. A substantive increase in the coverage rate was noticed. The enlargement has been taken into account.

<i>Promoting the linguistic diversity in the Union</i>	<p>Effort was carried out to promote fora. Leaflets in 5 languages were distributed, quite early before forum.</p> <p>The main tool of website is however the website.</p> <ul style="list-style-type: none"> Among the weaknesses concerning Mercator Media outlined in the 2004 evaluation report was the issue of recommendations : <p><i>“the context in which Mercator Media works is strictly University related and departmental. It does not therefore count with the specialised prestige and resources that the CIEMEN (a research and cooperation centre for minorities), or the Fryske Academy (a renowned scientific centre for research and education with a strong Frisian emphasis) can provide to the other two Mercator centres. This is a major factor to take into account when comparing the visibility, output and cooperation activities of the three centres..”</i></p> <p><i>“A substantial part of its work is technical – updating the database, working on enquiries, preparing applications, administration and management, preparation of work plan, coordinating projects or conferences, and so on. Nonetheless, their focus is more academic.”</i></p> <p>A substantial work was done about visibility related to Website (ranking on search engines, requests links from other websites, website ergonomics).</p>						□
<i>Safeguarding the linguistic diversity in the Union</i>							□
Conclusion on results:							

Mercator Media manage to carry out outputs (see above) with very small budget :

Heading	Amount (€)
Publication	9 000€
Dissemination	770€

However, analysis with the global budget split implies a more detailed assessment :

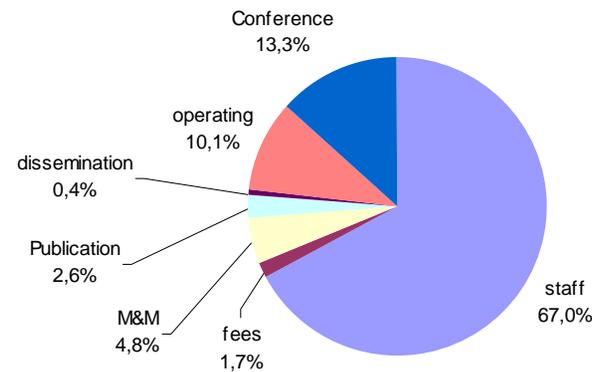

Figure 4 Mercator Media budget split between headings

3,15 equivalent full time workers were dedicated to the project for the year 2005-2006. Cost by equivalent full time worker is therefore 39 800,6€. This cost seems relatively high for an average salary. It is true that 256% of staff is a managing staff, and 59% is administration staff. However, the question is : is it relevant to dedicate more than 80% of its staff to the management ?

Moreover, Mercator Media have mainly focused its strategy of dissemination/promotion/communication on an achieved website. Even if publications and participations to events take part to this strategy, diversification of means could be intensified.

Therefore, efficiency could probably be improved with a slightly different allocation between headings.

Added value of EC support

Concerning Mercator Media, EC support offers a strong added value for two major reasons :

- European support offers an independency for project. They don't need to focus on territories or national issues.
- European support offers credibility with some partners and allow to strengthen relationships with partners, notably part of media institutions or national informants

Sustainability : perspectives for 2007-2013

The split between EU funding and self-financing shows a clear dependency of Mercator Media body on EU funding

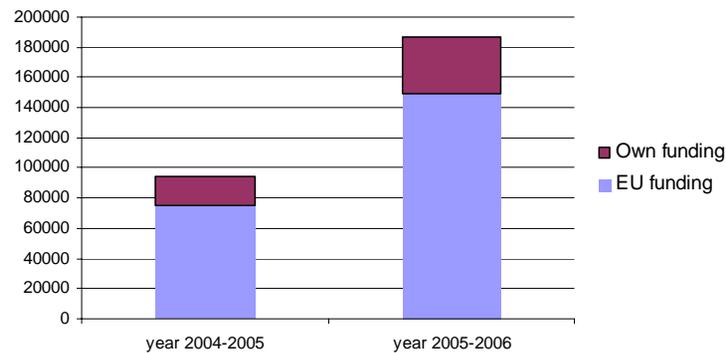

Figure 5 Split EU funding/self-financing Mercator Media

Source : Mercator Media monitoring data and final report

	EU funding	Self-financing	Total
Year 2004-2005	74 993,21€	19 525,2€	94 518,41€
	79%	21%	
Year 2005-2006	149 638€	37 409,68€	187 047,7€
	80%	20%	

The level and the quality of outputs mainly rely on human resources investment Changes occurred in the project-s personnel during the year 2005-2006 shows that MERCATOR Media is relatively exposed :without the high level of contribution of the Director, projects outputs would have been limited..

DATA COLLECTED

- Primary data

- ✓ Face-to-face interview:
 - Neasa Ni Chinneide, EBLUL's president
 - Davyth Hicks, Eurolang's Editor-in-chief interviewed in Brussels on June 8th 2007.

- Secondary data :

- ✓ Final reports :
 - EBLUL final activity reports 2004, 2005 and 2006
 - EBLUL final financial statements 2004, 2005 and 2006.
- ✓ Interart evaluation report

PRESENTATION

- ✓ The European Bureau for Lesser-Used Languages (EBLUL) is a Non-Governmental Organisation (NGO) promoting languages and linguistic diversity. It disseminates information on Community action in the field of languages and represents and informs lesser-used language communities on EU policies and funding programmes. EBLUL is based on a network of Member State Committees (MSCs) in the EU Member States. Through the Member State Committees, it serves European linguistic communities, and local and regional authorities' activities through supporting administrative procedures for applications and seeking adequate partnerships. It also provides information at the European level, through the Information and Documentation Centre, publications, seminars and other presentations of European policies.
- ✓ In 2004, EBLUL went through a management crisis within the team, which led to the closing of Brussels' office. The work plan for 2004 was signed only in September 2004, which explains the smaller amount of grant awarded, and the relatively reduced activities.

As a consequence, the European Bureau translated to Dublin, a new team was gathered, and there was an important reduction in the scope of activities and projects. In 2005, a new president and a new board of directors were elected. EBLUL's activities became less of a lobbyist, and turned themselves more to the dissemination of information in European Union funding possibility and kept organising its main yearly event: the partnership for diversity. (Source: interviews with DG EAC, EBLUL direction team)

Financial elements

EBLUL relies for between 54 and 74% of its budget on European funding.

	2004	2005	2006
EU grant	133 940	448 445	233 030
Own resources	34 958	204 456	68 500
Total	168 898	652 901	303 536

EBLUL had some financial difficulties, in relation with a bank guarantee achievement in 2005; consequently, it didn't receive as large a grant as expected.

Realizations of EBLUL per year

EBLUL has several projects:

✓ Networking Project: Member states committees

EBLUL seeks to extend its European network of Members, which counts 19 Members in 2006.

The Estonian MSC was created in 2005. EBLUL's ambition is focused on having the 5 new Member states left join and create a MSC.

An MSC audit was launched, so to have a good overview of the human and financial resources of the organization as well as of the internal and external contact (co-operation and networking) possibilities.

✓ Eurolang Press Agency

EUROLANG	2004	2005	2006
Web visitors	1 million hits 350,000 readers per month	1 million hits 450,000 readers per month	1 million hits 350,000 readers per month
Articles published	113 articles	370 articles	na
Journalists	21	23	25

On average, the news agency carries 1–2 full-length articles per day. These include both full-length articles (500 words plus) and 'News in Briefs' (NiB, around 300 words).

Eurolang sends out a weekly newsletter via e-mail, for thousands of recipients.

Volunteers translate Eurolang articles into other languages.

2005 : The new website launched in July 2005. It now includes a magazine section featuring the cultural life of Europe's RML communities, including film, music, books, and theatre.

In addition, the website provides updated information on EU funding opportunities, upcoming conferences and events as well as authoritative sociolinguistic data on Europe's lesser used languages.

Eurolang also participated in various public debates (eg the Café Babel debates in Brussels).

✓ Partnership for diversity

This project aims at creating a network of expertise in the promotion of regional and minority languages. It counts 33 Members, which are national, regional and local authorities, official language-planning agencies and private foundations. The regional/local authorities and the organisations that decide to support the Bureau financially become *Associate Members of the Bureau*.

Six conferences have already taken place: Pfd Forum conferences III and IV in 2004, Pfd Forum conference V in 2005, Pfd forum Conference VI in 2006.

✓ Public service Provision in Minority Languages

The project arose from the Pfd and collaboration between the Irish and Finnish Committee MSCs. It was extended to include Wales in 2005.

The specific goal is to produce information on the experiences and methods to improve service delivery with respect to the citizens of minority language groups, and to share the results widely in the EU.

✓ Dissemination and Documentation Project

In 2004, the EBLUL brochure on EU funding possibilities (now available electronically) was translated into German and Italian. Drafting of a new and improved version of Vade Mecum has been completed, running to 133 pages, and is now available electronically.

✓ Dublin Info point

Among the 3 info points (Samorin and Slovakia), Dublin's provides services and facilities provided by the INFO Point during 2004 :

Disseminating information on the European Union

- Information on European Union treaties and instruments relating to language, education and cultural matters.
- Information on European Union Institutions, on their policies etc.
- Advice on the European programmes available for funding for projects and schemes relating to language and educational issues.
- Provided information for Eurolang (on-line news service for lesser-used languages) and the media in the region

Disseminating information on RMLs

- Information on lesser-used language matters in the European Union (status of lesser-used languages in different countries)
- Provided information for Eurolang (on-line news service for lesser-used languages) and the media in the region

Supporting administrative procedure

- Partnership between EBLUL's office in Brussels and the Info Point in Dublin on certain projects, activities and administration.
- Dealt with general enquiries on a daily basis, by post, email, fax, phone etc.
- When necessary certain enquiries were forwarded to the main office in Brussels, or to the relevant region, in particular with the Celtic languages' communities.

Seeking partnerships

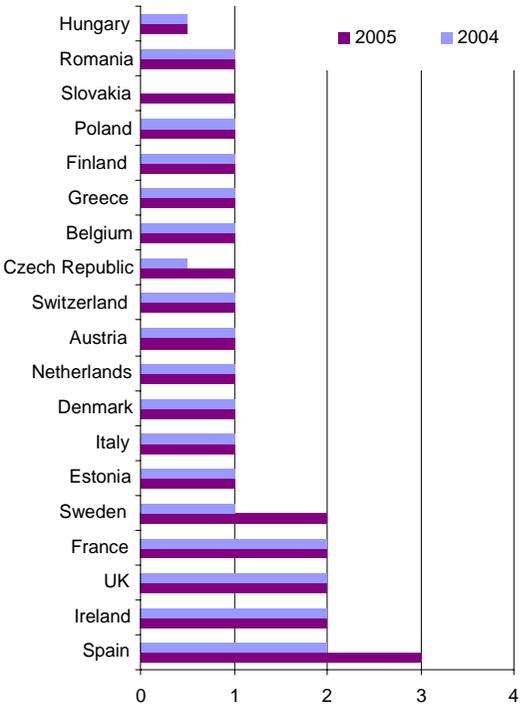

- Search for different financing resources, as well as the possibilities for particular projects.
- Search for co-partnership on certain projects.

EFFECTIVENESS : OUTPUTS ASSESSMENT

Evaluation question	Objective	Analyse	Assessment
<p>A.I.1 What are the outputs of Part I ?</p>	<p>Disseminating European information in the minority language communities</p>	<p>EBLUL and EUROLANG constitute a major relay for EU institutional information:</p> <p>Its “funding” entry constitutes a very useful page on <u>EU programmes</u> in relation with RML. EBLUL brochure on EU funding is also an interesting tool. Reports by the <u>European parliament</u>, communications by the <u>European Commission</u>, or the European council are also available at EBLUL’s website. <u>Call for proposals</u> are also relayed.</p> <p>Not only institutional EU information is broadcast on both EBLUL and Eurolang websites. EBLUL’s most important tool for disseminating European information in the minority language communities is Eurolang. The news agency constitutes a very effective information conveyor, with a direct entry point to the minority language communities, with information translated into 28 languages.</p>	
<p>Has Part I of the programme achieved its operational objectives ?</p>	<p>Supporting administrative procedures for applications</p>	<p>In 2005, several <u>Member State Committees</u> have organised workshops in their countries to inform on opportunities to access European funding and discuss future developments within their regions: Germany, Finland, the Netherlands, Spain, UK, Ireland, Estonia, Slovakia, France, Greece, and Sweden.</p> <p>The workshops have been supported with the updated EBLUL “European funding information pack”.</p> <p>The <u>info-points</u> are also a tool for supporting administrative procedures for applications. The Dublin info-point has provided precious assistance for the project bearers. Some projects were directly steered by the Info Point, in particular those pertaining to regional language issues in the Celtic region of Europe. They answered enquiries, helped with the application dossiers, and played a transmission role between the applicants and EC services when necessary.</p> <p>EBLUL’s local info-points can be compared with the national “Relais culture Europe”, with a specific focus on RMLs.</p>	

	<p>Seeking adequate partnerships</p>	<p>EBLUL has created a major partnership, with local, regional and national authorities, official language-planning agencies, universities, and private foundations, call partnership for diversity. It is an important step taken towards an institutional collaboration, on a more powerful level than NGOs or associations.</p> <p>Through the PFD network, EBLUL has consolidated contacts in many minority languages communities. The annual forum conference allows for Members to meet and exchange about the situation of the own minority language community.</p> <table data-bbox="869 550 1444 901"> <tr> <td>Luxembourg</td> <td>1</td> <td>Denmark</td> <td>3</td> </tr> <tr> <td>Ireland</td> <td>1</td> <td>UK</td> <td>1</td> </tr> <tr> <td>Germany</td> <td>4</td> <td>Belgium</td> <td>3</td> </tr> <tr> <td>Netherlands</td> <td>2</td> <td>Finland</td> <td>11</td> </tr> <tr> <td>Spain</td> <td>4</td> <td>Ireland</td> <td>1</td> </tr> <tr> <td>Italy</td> <td>2</td> <td></td> <td></td> </tr> </table> <p>The number of Members increases regularly, and tops at 33 now. Moreover, EBLUL's info-point in Dublin searches partners for projects-bearers, in the perspective of co-applying to an EU programme.</p>	Luxembourg	1	Denmark	3	Ireland	1	UK	1	Germany	4	Belgium	3	Netherlands	2	Finland	11	Spain	4	Ireland	1	Italy	2

EFFECTIVENESS: RESULTS ASSESSMENT

Evaluation question	Objective	Analyse	Assessment
<p>A.1.2 What are the results of Part I? Has the part I of the programme achieved its specific objectives?</p>	<p>Representing all regional or minority language communities in the EU</p>	 <p><i>Figure 6 Number of stringers/freelance EUROLANG journalists, per year and country coverage (2004-2006)</i></p> <p>EBLUL represents most of European RML communities.</p> <p>Its 19 MSC are national satellites which cover a very important share of European Union countries, and 24% are a new Member state.</p> <p>EuroLang itself ensures a wide representation of information from the RML communities. Its stringers or free-lance journalists come from as many countries as MSC. Since the magazine section implementation, EuroLang also covers the cultural in a community, which is a very inclusive form of representation.</p> <p>In all its activities, EBLUL successfully plays its part of representation of lesser-used languages communities, with a good geographical coverage, given the 2004 difficulties.</p> <p><i>Source : EBLUL final reports 2004 ans 2005</i></p>	<p style="text-align: center;">✓</p>
	<p>Promoting the linguistic diversity in the Union</p>	<p>The Partnership for diversity aims to disseminate best practice in the field of minority language promotion. A common research project has emerged from it: Public service provision in Minority languages. This compared study aims at disseminating and emphasizing the best practices allowing a better implementation of language acts, a well as a greater recognition of RMLs.</p>	<p style="text-align: center;">✓</p>

		The project will suggest different means to improve the efficiency and impact of the tools currently employed in the delivery of language services.	
	Safeguarding the linguistic diversity in the Union	<p>According to the interviews realized with European commission officials, EBLUL plays a major role in safeguarding the linguistic diversity in the European Union. Its visibility has increased since 2004, partly thank to its many attendance of conferences, the latest being the International Conference on Minority Languages.</p> <p>Results of this safeguarding mission can be seen in the increased integration of the RML in most of European Union programmes for 2007 (Lingua, Leonardo, Lifelong learning...).</p>	
Conclusion on results			
The results achieved by EBLUL are in adequacy with the programmes planned, and in spite of difficulties in 2004, they have been well reached.			

ADDED VALUE AND SUSTAINABILITY

- EC support had a very important paper for EBLUL, given its very important share of their budget. EBLUL is a specific voice in Europe, and it assumes very well its role of intermediary between the EC and the minority language communities. The community added-value lies in the Echanges organized between European groups and in the transborder cooperation. The presence of a former EBLUL Member in the cabinet of commissioner for Education, Training, Culture and Multilingualism is a strong indicator about EBLUL's competence and recognition in the field of RMLs.

Sustainability : perspectives for 2007-2013

The more innovative action of EBLUL, the Partnership for diversity, is self-sustainable thanks to the Associate partners' fees. They also constitute a financial basis for EBLUL. Moreover, the Irish government co finances some of EBLUL's projects, and the Pfd in particular.

6.7 Questionnaires

6.7.1 Part II – English version

Final external evaluation of the Community action programme to promote bodies active at European level in the field of culture

Methodological guide to fill in the following questionnaire

Context and issues of the evaluation

- You were awarded an operating grant from the European Union as a beneficiary of the Community action programme to promote bodies active at European level in the field of culture. The European Commission launched an external and independent evaluation, lead by Ernst & Young advisory, Public Sector. Thus, the grant beneficiaries are invited to fill in the following questionnaire. We thank you gratefully in advance for your participation, which is indispensable to the achievement of the evaluation.
- All questions do not necessarily refer to your activity. In this instance please don't consider the question.
- Your answers will be treated anonymously, and in full respect of our confidentiality obligations.
- A frame at the end of the questionnaire is dedicated to receiving your comments. You may also specify or shade some of your answers. The size of this frame is not a limitation.

- **Email :** chloe.samaniego@fr.ey.com or guilhem.biancarelli@fr.ey.com
- **Fax :** (33-1) 55 61 80 96
- **Mail :** Chloé Samaniego
Ernst & Young
17th floor
17, Faubourg de l'arche

- A technical assistance through telephone (00 33 1 46 93 77 80) and email (chloe.samaniego@fr.ey.com) is available, should you meet any difficulties in answering the questionnaire, or need any further information.

Evaluation scope

- The evaluation scope deals with the whole period of the Programme 2004-2006.

How to fill in the questionnaire...

- This file is divided into 3 sheets (*click on the title to be automatically directed*) :
 - 1 - The methodological note
 - 2 - [The table of contents](#)
 - 3 - [The questionnaire](#)
- In order to answer the questions directly on the excel file, you can alternatively:
 - 1) fill in the adequate cell or tick the answer(s) with the letter: **X**.
 - 2) use the drop-down menu, by clicking on the cell, and selecting the answer you want.
- It is also possible to print the questionnaire on a A4 sheet and to fill in the paper support, so to send it back by fax or mail.

Many thanks in advance for your contribution to this questionnaire.

Table of contents

- I. You**
- II. Objectives of your organisation, choice of a target public**
- III. The activity of your organisation in general**
- IV. Your activities**

6.8 Interview guides

6.8.1 Part I – DG EAC civil servants

Interview frame – C1

Results assessment

- What is your perception of the achievement of the programme's objectives?
- How do you regard the beneficiaries selected? Do you think the selected organisations contribute to achieve the Programme's objectives?
- Do you perceive any evolution in the objectives, between 04-06 Programme, and Culture 2007? Is the perimeter constant, or are there important differences? Is it complemented by other programmes?
- What kind of change do you think the shift to Culture 2007 brought? On which aspect of the programme?
- What do you think about the kind of activities supported by the programme? To what extent do they allow to reach the objectives of the programme?

Quality of implementation

Call for proposals - Selection procedure

- Do you think the selection procedure allows selecting the best applicants? Does it help reaching the programme' objectives?
- Do the eligibility criteria (or selection criteria) favour a representative selection of beneficiaries? Is the selection relevant, to this matter, or can it be improved?
- In spite of the objective of European dimension, there is an overwhelming representation of EU15 countries. How do you regard the relatively weak number of new Member states' applicants? (10 new Members + 2)
- Does the objective of "European cultural ambassadors" imply the realisation of projects outside of the EU? Do the musical tours outside of the EU contribute to the programme's objective as well as geographically European activities?
- Is the representation of European cultural cooperation abroad a possible axis of development of the programme?

Monitoring of the agreements

- How do you regard the role of the authorities in the monitoring of the projects? Are the final reports sufficient tools to let you judge of the European added value of an organisation activity?

Efficiency

- How do you regard the amounts granted to the beneficiaries?
- Part II of the programme received additional funding, through the 1M€ grants awarded by the European Parliament, on the 2006 budget³. How was it used? How did you distribute it between the beneficiaries?

Sustainability

- Culture 2007 will still award annual operating grants. Why didn't you shift to actions grants?
- What do you think are the effects of these grants on the supported organisations?
- Is sustainability a relevant objective? Do you think the sustainability objective is reached?
- To what extent does these operating grants allow beneficiaries in the long term :
 - To become autonomous?
 - To find private funding?
 - To improve their network and contacts?
 - To improve their visibility?
- Is the support of networks of organizations more relevant than to support single organizations? To what extent is the constitution of networks an important condition to the achievement of the Programme's objectives?
- How do you regard the impact of the European tools –such as Culture 2007- on the enhancement of cultural cooperation in Europe?
- How do you perceive our evaluation? What do you expect from it?

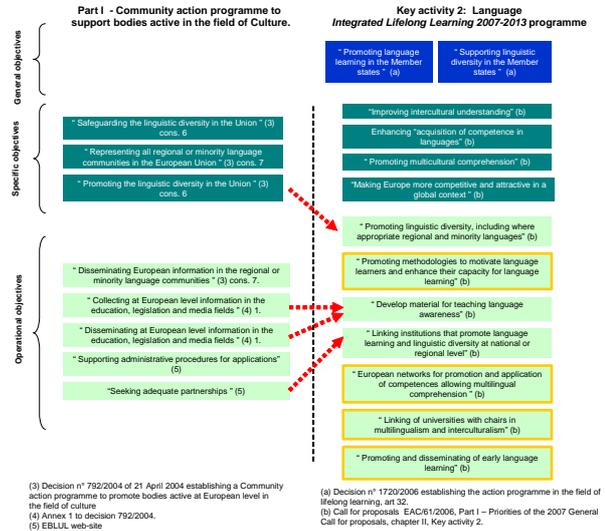

³ As mentioned in the Steering Committee of 9th, February, 2007.

6.8.2 Part II – DG EAC civil servants

Interview frame - C5 Multilingualism policy

Results assessment

- What is your perception of the achievement of the specific objectives by EBLUL and MERCATOR centres? Have they met up with your expectations?
- How will these two organisms integrate themselves in the Lifelong Learning programme? Will they still have a privileged position, in spite of the call for proposal procedure?
- How do you perceive the evolution in the objectives, between 04-06 Programme, and the Lifelong learning programme?
- How will the Socrates and Leonardo objectives complement the LL programme perimeter?
- Do you see a strong continuity between the two, or are there major changes? If yes, which ones?
- Do you think there is a scope extension of your objectives in the LL programme?
- Do you think there has been some reduction of the importance of “linguistic diversity” in the new programme?
- Is there any contradiction or divergence between the objectives of “Safeguarding linguistic diversity” and of “Promoting language learning”?
- Do you think the focus on language learning might lead to paying less attention to minority lesser-used languages, and to favour more-spoken languages?

Quality of implementation

Selection procedure

- How were EBLUL and MERCATOR centres selected ? What kind of links did the EC have previously established?
- Why did you choose them? Are they leader in the field of regional and lesser-used languages?
- Do you think that EBLUL and MERCATOR will be in a difficult position, in a call for proposal procedure? Do they have important “competitors”?
- Does the shift to a call for proposals will lead to an important increase in the number of bodies supported?

Monitoring of the grant agreements

- What kind of relations do you have with EBLUL and MERCATOR?
- Is there a close monitoring, or very few contacts between the authorities and EBLUL and MERCATOR?
- How were the working programme elaborated? Did you discuss them with EBLUL and MERCATOR?

Efficiency

- The grant amounts were rather important, compared for example with Part III of the programme
 - Was it linked to the network structure of the beneficiaries?
 - Is it more reduced in Key activity 2?
- Do you intend to change the grant amounts of order to support smaller organisations, or smaller projects?

Sustainability

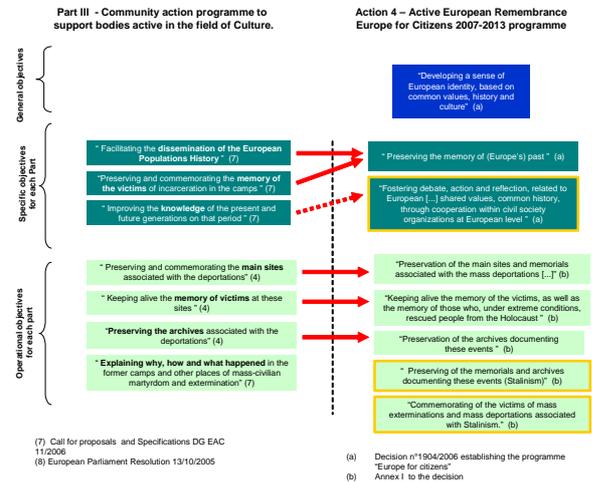

- Are EBLUL and MERCATOR very dependent on EU funding?
- Do they have other kind of resources? Are they able to generate private resources?
- Is their action likely to be carried on without European Union funding?
- What are the more sustainable actions that EBLUL and MERCATOR have implemented?

6.8.3 Part III – DG EAC civil servants

Interview frame – D4 Civil Society

Results assessment

- According to you, what are the main different types of beneficiaries?
- According to you, what are the main different types projects supported by the Action 4?
- What is your perception of the achievement of the following specific objectives?
- How do you perceive the evolution in the objectives, between 04-06 Programme, and action 4 of Europe for citizen programme?
- Do you perceive a difference in the results of EU 25 beneficiaries, and new Member states beneficiaries?
- Is it more difficult for new Member states beneficiaries to match the demands of the Programme's authorities?
- What consequences had the introduction of Stalinism crimes in the objectives of the programme?
- Do you think the new states Members will be more represented in the future, thanks to the introduction of Stalinism crimes in the objectives of the programme?
- Is there any specific objectives concerning youngsters and education?
- Do you think this axis will develop in the future, or become an objective in itself?
- Do you think there might be an extension of the scope of the action 4, with other type of historical crimes? How do you fix the limits?

Quality of implementation

- How do you account for the (almost) entire renewal of the beneficiaries between 2004, 2005 and 2006?
- In the frame of Europe for Citizens, has this trend continued (First call for proposals launched in 2006)?
- What consequences have the division of tasks between you and the Executive Agency? Do you regard it as an opportunity, or are there any drawbacks?

Selection procedure

- Do you think the selection procedure allows selecting the best applicants?
- Does it convey any kind of problem? How could it be improved?
- Schools or children-dedicated projects don't seem to be among the beneficiaries: why?

Monitoring of the grant agreements

- What kind of relations do you have with the beneficiaries? Is there a close monitoring, or very few contacts between the authorities and the beneficiaries?

Efficiency

- The grant amounts were rather small, compared for example with Part II of the programme (max: 40 000 euros).
 - Is it a choice, or was it because of budget limitation?
 - Does it correspond to the projects carried out by the beneficiaries, which are rather modest?
 - Will it change in Europe for citizens?

Sustainability

- Are the monitored projects very dependent on EU funding?
- They appeared to have other kind of resources, in majority: why? Is it easier for citizenship programmes to find private funding?
- Is sustainability a relevant issue?
 - How can beneficiaries become autonomous?
 - Do they have projects which can become recurrent, or is it not a goal?
 - How do you consider this traditional objective of European Union funding in this specific context?

6.8.4 Executive Agency
