

THE SENATE
OF THE PARLIAMENT OF THE CZECH REPUBLIC

10TH TERM

200th

RESOLUTION OF THE SENATE

Delivered on the 10th session held on 23rd July 2015

on the Proposal for a Regulation of the European Parliament and of the Council amending Regulation (EC) No 1829/2003 as regards the possibility for the Member States to restrict or prohibit the use of genetically modified food and feed on their territory

(Senate Print No. N 016/10)

The Senate

I.

1. Perceives,

in general, positively the European Commission's proposal for the Member States to have the power to modify the scope of the use of genetically modified food and feed on their territory;

2. Notes, however,

that any prohibition of or restriction on the use of genetically modified food and feed in one Member State must not impose limitations on the transport of food and feed through the territory of that State, as this could limit their import into the Member States which did not adopt prohibition of or restriction on their use, which would constitute a distortion of the single market and international trade;

II.

1. Requests

the Government to inform the Senate about the way this position was taken into account and to provide the Senate with further information on the proceeding of negotiations;

2. Authorises

the President of the Senate to forward this Resolution to the European Commission.
