

**Opinion of the Romanian Chamber of Deputies on the
Communication of the Commission to the European Parliament, the Council and the
European Economic and Social Committee
Harmonised standards: Enhancing transparency and legal certainty for a fully
functioning Single Market
COM(2018) 764**

The Chamber of Deputies supports the extension of European standards and their alignment to international standards, with a view to increasing trade flows and opportunities for European enterprises.

It also shows that standardisation applied to innovative solutions should be adapted to their development stages, so that they not turn into a critical administrative burden for emerging and disruptive technologies. In addition, it would be useful to introduce innovative aspects in the management of the standardisation process, as well as their increased dissemination in the Member States below the Union average in terms of the level of innovation.
