

**Opinion of the Romanian Chamber of Deputies on the  
Joint Communication to the European Parliament and the Council  
on the Action Plan on Military Mobility**

**JOIN(2018) 5**

The Chamber of Deputies:

1. Draws attention over the necessity to ensure compliance of EU's environment conditions in developing dual-use infrastructure and taking them into consideration from the programming and design stage.
2. Strongly recommends that measures which will be taken at EU level for targeting military mobility objectives maintain the integrity of financial resources allocated for economic convergence objectives between Member States.
3. Underlines that EU's policy in the area of transport infrastructure could benefit from synergies between defence needs and development of the trans-European transport network - "TEN-T", which determines institutions of the Union to proceed with greater determination for supporting its extensive and balanced development in the European Union.
4. Underlines the civil relevance of exercises such as the pilot analysis carried out for countries in the North Sea-Baltic Corridor of the trans-European transport network, involving defence and transport representatives from the Member States and recommends carrying out periodically such regional exercises, especially in the Eastern area of the Union, given the specific geographical conditions from this area.
