

**Opinion of the Romanian Chamber of Deputies on the  
White Paper on Artificial Intelligence  
A European approach to excellence and trust  
COM(2020) 65**

The Chamber of Deputies, supporting in principle the provisions of the White Paper on Artificial Intelligence, recommends:

- Ensure the implementation of measures to protect free competition and entrepreneurship, guarantee market access and finance for micro-enterprises and start-ups;
- Increased attention to the behaviour and attitudes of the younger generation, its reactions in the general context of digital society;
- Sustained consultation of the business environment so as not to call into question the competitiveness of the European Union on the global market;
- Expanding the artificial intelligence component in as many areas as possible in “Horizon Europe” programme;
- Support non-formal and informal education for data initiation and the development of skills needed in this field;
- Review of the European Data Protection Framework.
