

**Decision of the Romanian Chamber of Deputies to adopt
the Opinion on the Proposal for a Decision of the European Parliament and of the
Council
establishing the 2030 Policy Programme “Path to the Digital Decade”**

COM(2021) 574

The Chamber of Deputies:

Supports the approach and actions of the 2030 Policy Programme “Path to the Digital Decade” and the full harmonization of the conditions for the provision of services by mobile operators in all Member States.

Underlines the need for harmonized support for small and medium-sized enterprises in all Member States of the European Union in order to increase participation, engage more closely in the development of the data economy and their competitiveness on the international market.

Recommends maintaining a fair competitive market in the mobile communications sector, stepping up efforts to ensure an EU regulatory framework conducive to the accelerated and safe development of digital techniques in human medicine, and stepping up support for R&D and innovation, the exchange of experience between local authorities and civil society for the development of broadband internet, with a view to increasing its accessibility for citizens, farms and small businesses in remote rural areas, and that the monitoring and cooperation mechanism be put in place in such a way as not to increase the administrative burden.
