European Commission raises serious doubts over contradictory Polish proposal on broadband market

Published by Editor Connect on 11/12/2012

The European Commission has expressed serious doubts over plans by the Polish telecoms regulator UKE to deregulate part of the Polish wholesale broadband access market. UKE's proposal is based on an out-dated market assessment from March 2011. Moreover, the proposal contradicts a more recent market analysis dating from March 2012 where UKE concluded that no single area was competitive enough in Poland to propose complete deregulation. The Commission has therefore suspended UKE's plans and started a two month in-depth investigation.
