10:20 - Panel discussion focusing on technology enablers

Concept / Panel 1 narrative:

The new technology enablers - broadband and cloud - are game changers for a digital transformation of both the economy and the society. They bring benefits in the shape of content and creative and are fundamental to permitting the rollout of new, efficient and essential digital services such as health and public services. The narrative of the panel was the following:

- Roll-out of broadband, the benefits this brings compared to a "before/after" situation, particularly in rural areas and for SMEs in these areas.
- How demand can be stimulated e.g. showing businesses how using cloud services helps them to become more productive at lower cost, and creates more growth.
- New technology enablers also require trust and security in the internet and the necessary ICT skills./digital-agenda/en/file/9601DAA 2013 - Morning plenary panel.jpg

Concept / Panel 2 narrative:

"Digital mindset" is no longer a novelty or a marginal phenomenon. It is mainstream and essential for everyday life, for creating businesses, for employment and for creating growth and jobs. The digital mindset needs to be developed in the EU and passes through:

- Digital skills, for both youth and elderly, for ICT practitioners but also as a centre-piece in education or further education, particularly in socially challenged populations and areas.
- Improving the general framework conditions - including innovative sources of funding - for the entrepreneurs and their digital mindset as they create innovative solutions and new sources of growth.
