## Consultation on Network and Information Security - Publication of individual responses

Published by Newsroom Editor on 26/06/2013

The Directorate-General for Communications Networks, Content & Technology has published the individual responses to the public consultation on network and information security that it conducted between July-October 2012.

The overall results of the public consultation were published as part of the Impact Assessment SWD (2013)32 that underpinned the draft Directive on network and information security (NIS) COM (2013)48, which the Commission adopted on February 7, 2013.

The updated summary report shows the major views per category of respondent –individuals, businesses, public authorities, NGOs and academia – and the origin of respondents. The Commission was in its Impact Assessment work assisted by an external study team, under specific contract SMART 2012/0002.

The external study, the Terms of Reference as well as the individual responses can be found attached.
