

'p-medicine - From data sharing and integration via VPH models to personalized medicine' is a 4-year Integrated Project co-funded under the European Community's 7th Framework Programme aiming at developing new tools, IT infrastructure and VPH models to accelerate personalized medicine for the benefit of the patient.

In p-medicine 19 partners from 9 European countries and Japan have dedicated themselves to create support and sustain new knowledge and innovative technologies to overcome current problems in clinical research and pave the way for a more individualized therapy.
