## Project Management

### Project Indicators:

#### EVM Chart

#### EVM Table

Month	Jan-16	Feb-16	Mar-16	Apr-16	May-16	Jun-16	Jul-16
Baseline (PV)	15%	29%	46%	60%	67%	72%	78%
Earned Value (EV)	0%	18%	18%	36%	46%	71%	73%
Actual Cost (AC)	0%	17%	17%	45%	57%	57%	60%

#### Project progress:

- Baseline was redefined in for the last project report due to expansion of the project scope. Upon the conclusion of Domibus 3.1 FR, there was an increase in the planned activities due to the issues detected (that led to the intermediate release 3.1.1). Moreover the scope of the domibus 3.2 release was changed in order to emphasize the AP robustness and focus on implementing quality control and improvement mechanisms.

Following the conclusion of the new Domibus release plan and project resource stabilization a new baseline will be calculated.

- Due to the well documented staffing issue, aggravated by the recent departure of another developer, there was no capacity to tackle the planned activities for the SML and SMP, which were postponed, 1.5 months and 3 months, respectively (new planning to be validated by the OMB)
