

Electronic Invoice in Portuguese Public Administration

Integrated and Collaborative Project

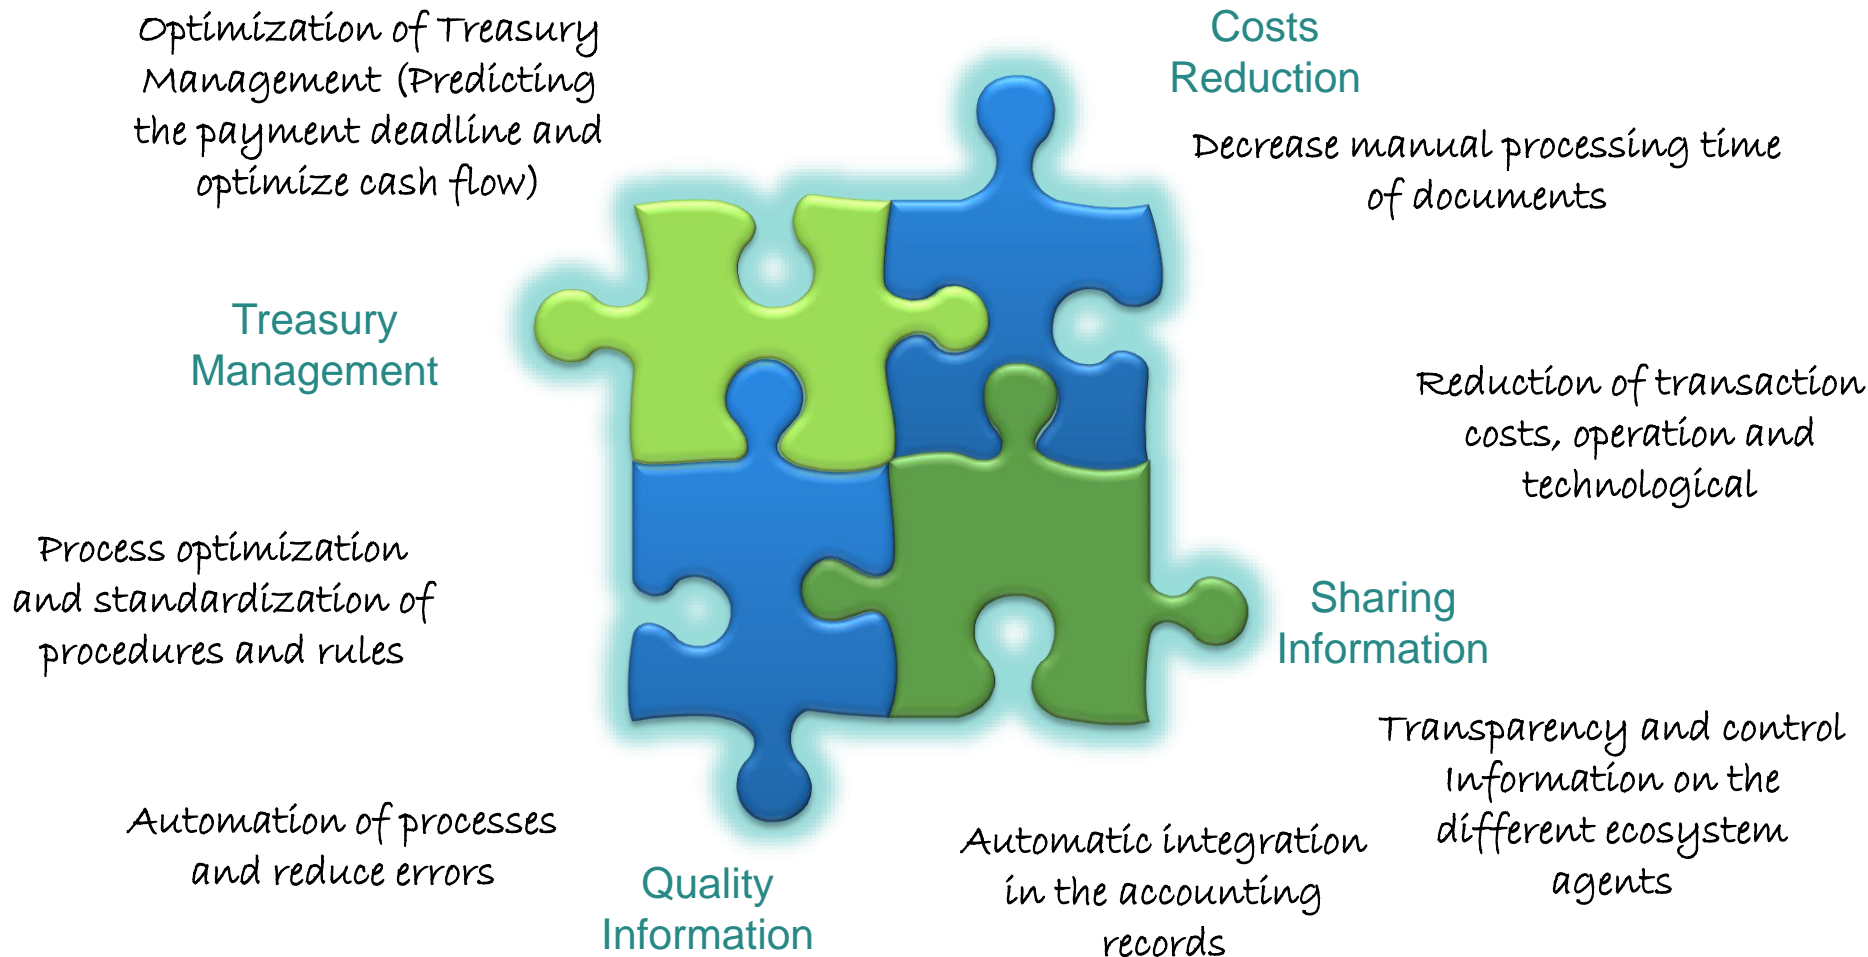

10-10-2019

Acquisition process in Public Administration (regulated process)

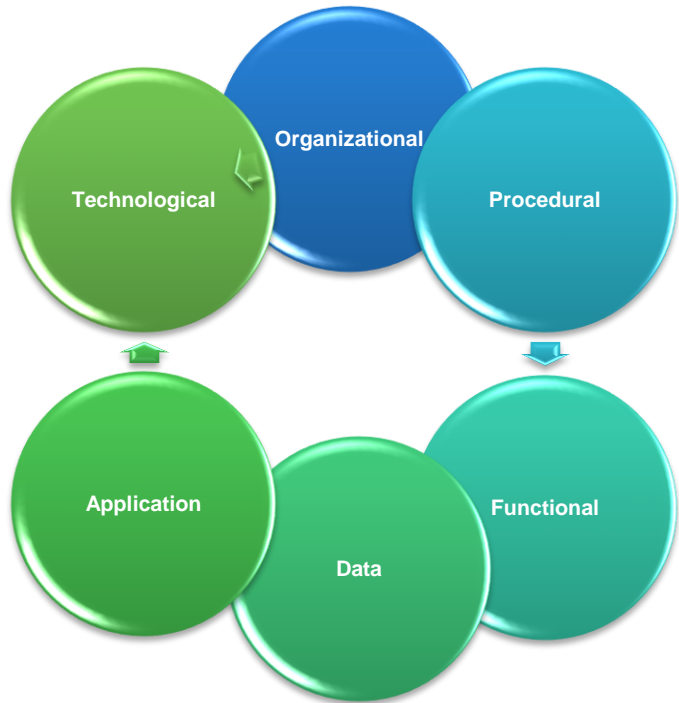

There is a set of activities (administrative and accounting) whose invoice can act as the linking element. The einvoice is the element that allows us to create a traceability, interoperability, quality data driven integration and further possibilities throughout the chain.

Setting up a Centralized Model will ensure benefits in 4 main areas which are fundamental in this multidimensional transformational context

Not exhaustive

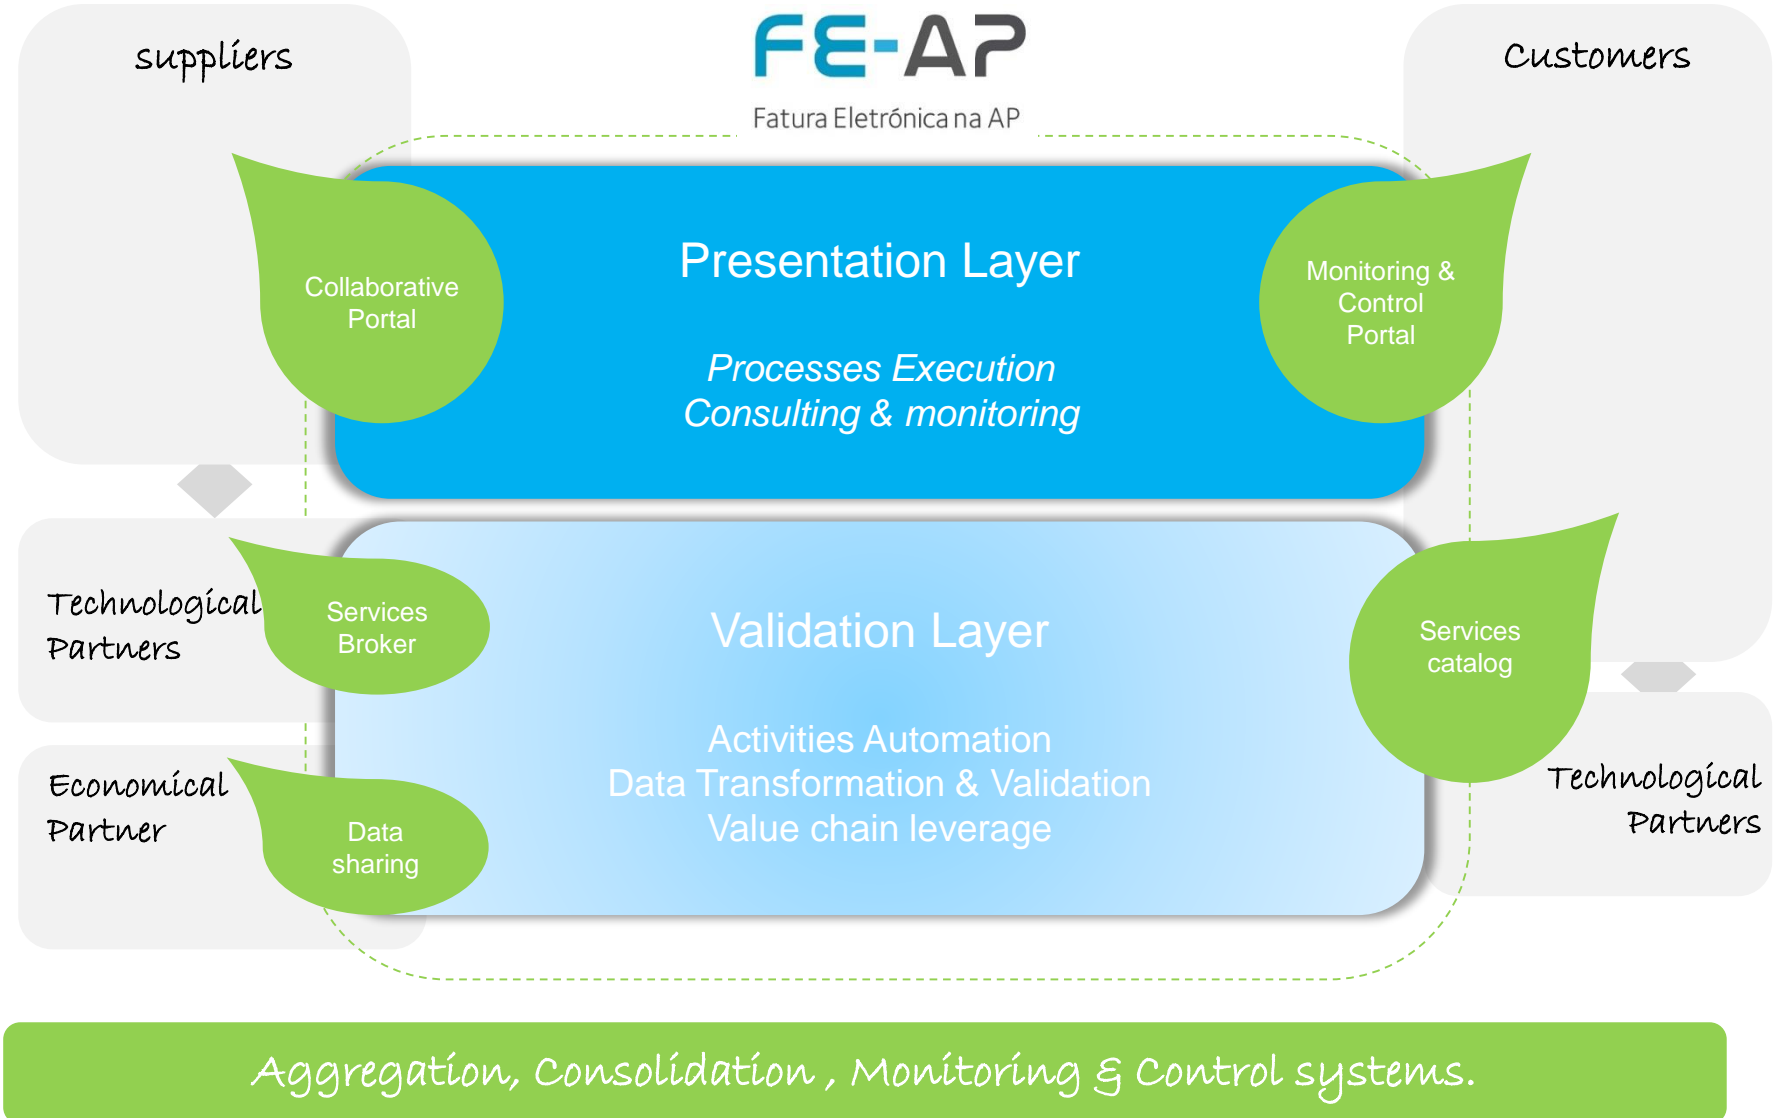

- **Standardization of processes and rules** - Definition of single invoice semantics aligned with the rules of the AP, with the CIVA, sectorial rules and addressing different business scenarios.
- **Technical solution** - Provision of adequate technology (software and hardware), as a platform for electronic billing, archiving, communication channels, among others. Ensuring alignment with business requirements, with the challenges of scalability, performance and integration (SOA).
- **Time To Market** - Elaboration of a concerted adherence program, ensuring alignment with strategy and vision, adoption of good practices and structured to ensure rapid adherence, change and successful transformation.
- **Market Specialization of competences** - In electronic invoicing processes, accounts payable and treasury. In the dissemination of the solution in public entities. In support of data quality, accounting records, participation in value added activities and dissemination of good practices. In the management and relationship with economic operators and business partners

The introduction of Electronic Invoicing in Public Administration requires a holistic approach contemplating areas of change whose approach coupled with the shared services model

✓ Acceleration
implementation

✓ Rationalization
of resources

✓ Quality of
data
