

eDelivery Sweden

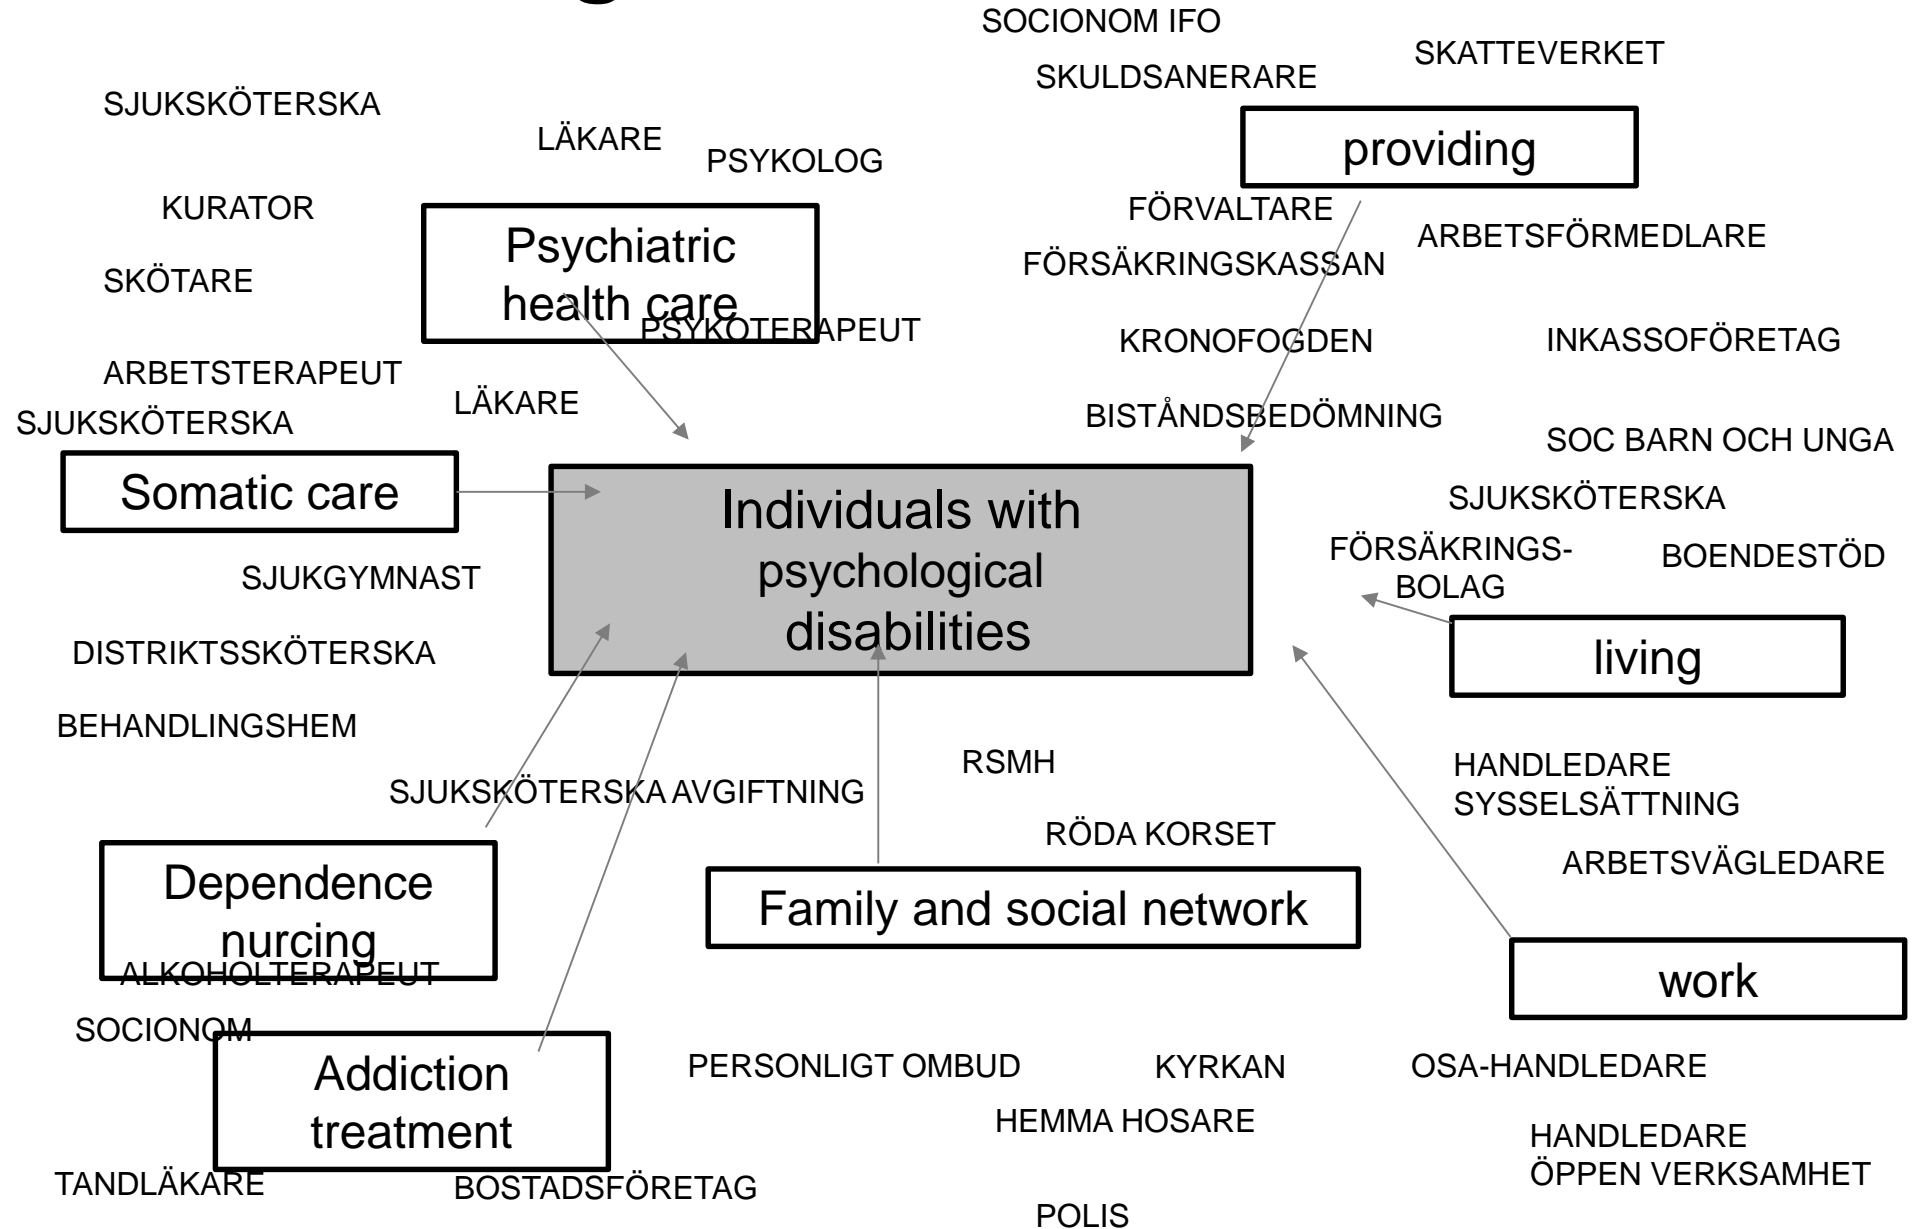

Martin Völcker

Swedish eDelivery co-ordinator

Status

- Active in cross-border projects (TOOP, EESSI, e-Evidence....)
- The Swedish financial Management Authority is Swedish eDelivery co-ordinator
- Start up National project
 - Outdata (Send XBRL economic information between public agencies)
 - SDK (Secure data communication) send pdf cross domain

Alla meetings...

SDK project

- Send pdf to public and private organisation
- Pre-study

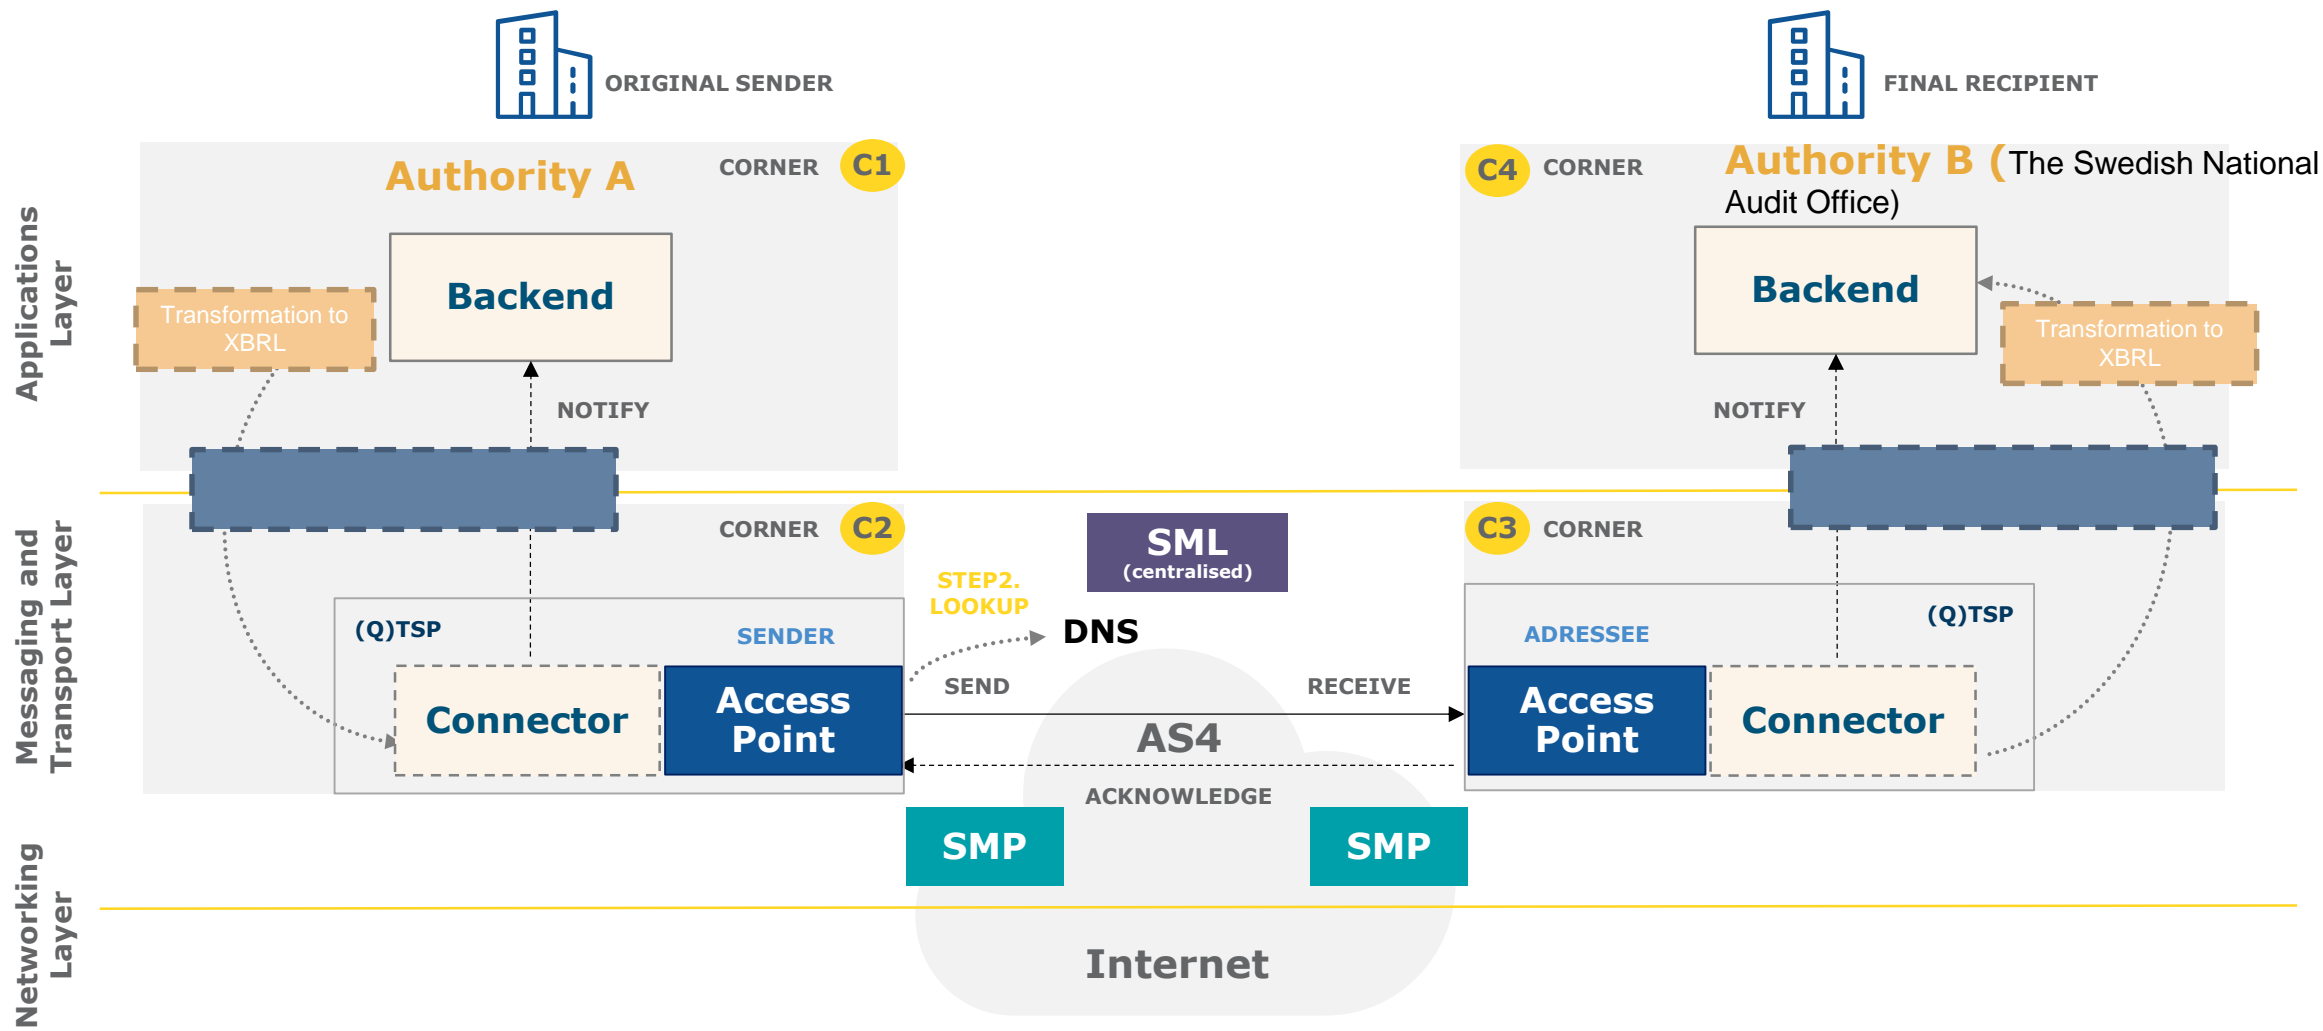

Challenges

- How to do so an end user find the right organisation and function easy?
 - Extended PEPPOL directory (ex e-commerce@esv.se)
- How do we easily handle certificate for small organisations?
 - Static – Dynamic? Trust list CA?
- Legal aspects (we cannot have all participants write agreement with each other)
- Tendering (how can we make private och public sector to have solutions to low costs)?
- Governance
 - Cross domain makes challenges more difficult than cross-border.

Out data project

- Development of standards to transfer economic data information The Swedish National Audit Office in XBRL
- Development to use CEF eDelivery between authorities to send and receive payload.

ESV utdataprojekt
