

## #4 OOTS Implementers' Café

An interactive session with part 1 looking the OOTS Common Services and part 2 looking at how to prepare for the first of the 2023 OOTS Projectathons.

21 February 2023, 09:30-12:00

**European Commission**

**DG GROW**

Directorate-General  
for Internal Market, Industry,  
Entrepreneurship and SMEs

**DIGIT**

Directorate-General  
for Informatics

# Agenda

- 09:30-09:40** **Welcome** – *Thomas Fillis*
- 09:40-10:00** **Presentation of the Once-Only Technical System Common Services – the UX perspective** – *Nils McGrath*
- 10:00-10:20** Q&A
- 10:20-11:00** **Data Service Directory and Evidence Broker** –*Jerry Dimitriou, Carmen-Ionela Rotuna*
- 11:00-11:15** Q&A
- 11:15-11:35** **OOTS Projectathon preparation** – *Maarten Daniels and Marie-Laure Watrinet*
- 11:35-11:55** Q&A
- 11:55-12:00** **Wrap-up** – *Thomas Fillis*

# Instructions for this live webinar:

When in doubt, write in the chat – our team are there to help

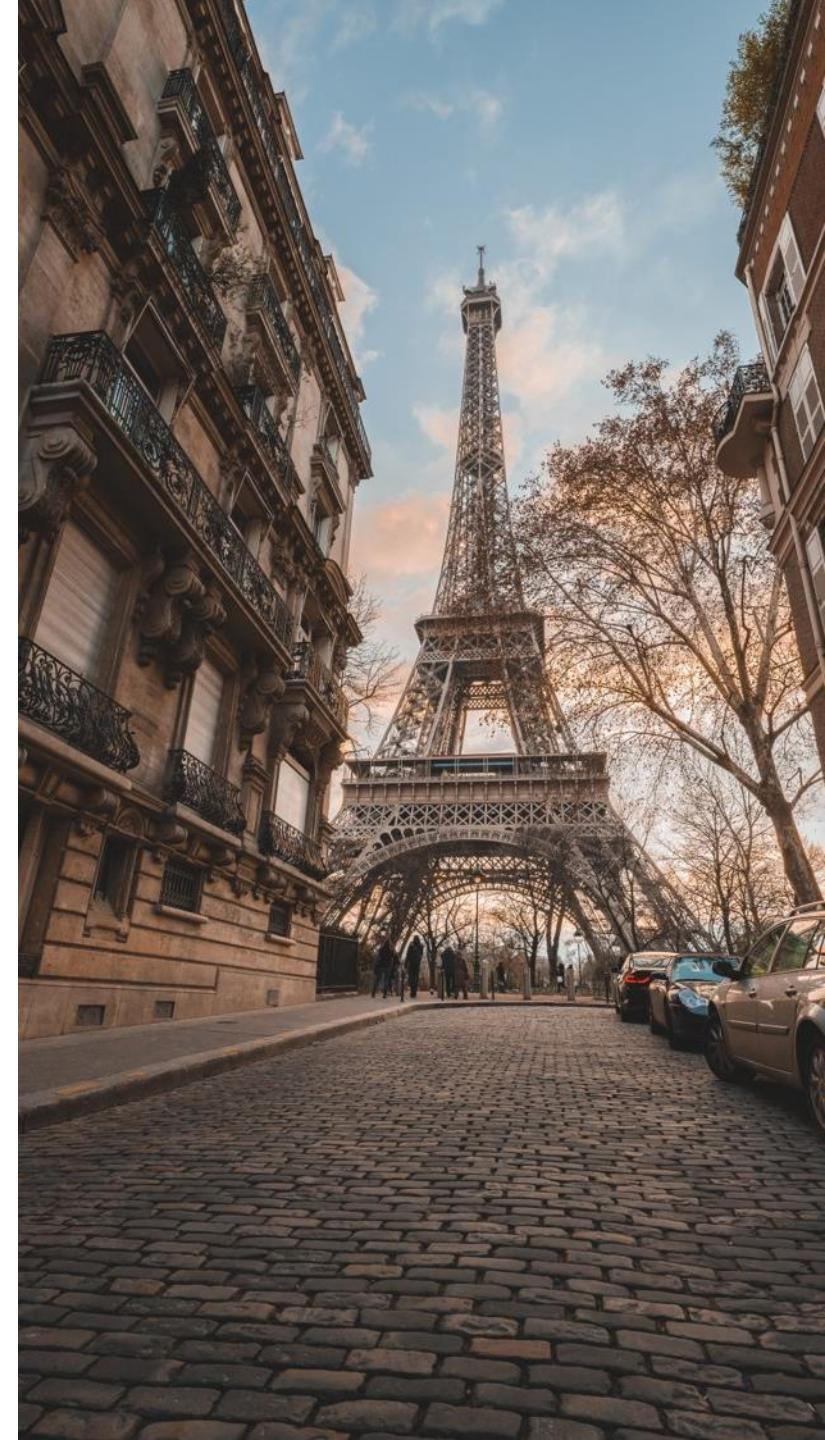

This is an interactive session.  
There will be time for questions  
and answers throughout the  
session via the chat.

Klick “Connect audio” to hear  
the presenters and please  
mute your microphones when  
not speaking.

*Please note this webinar will be  
recorded, but is not published  
publicly.*

OOTS Common Services

## User Experience

Nils McGrath

# Imagine...

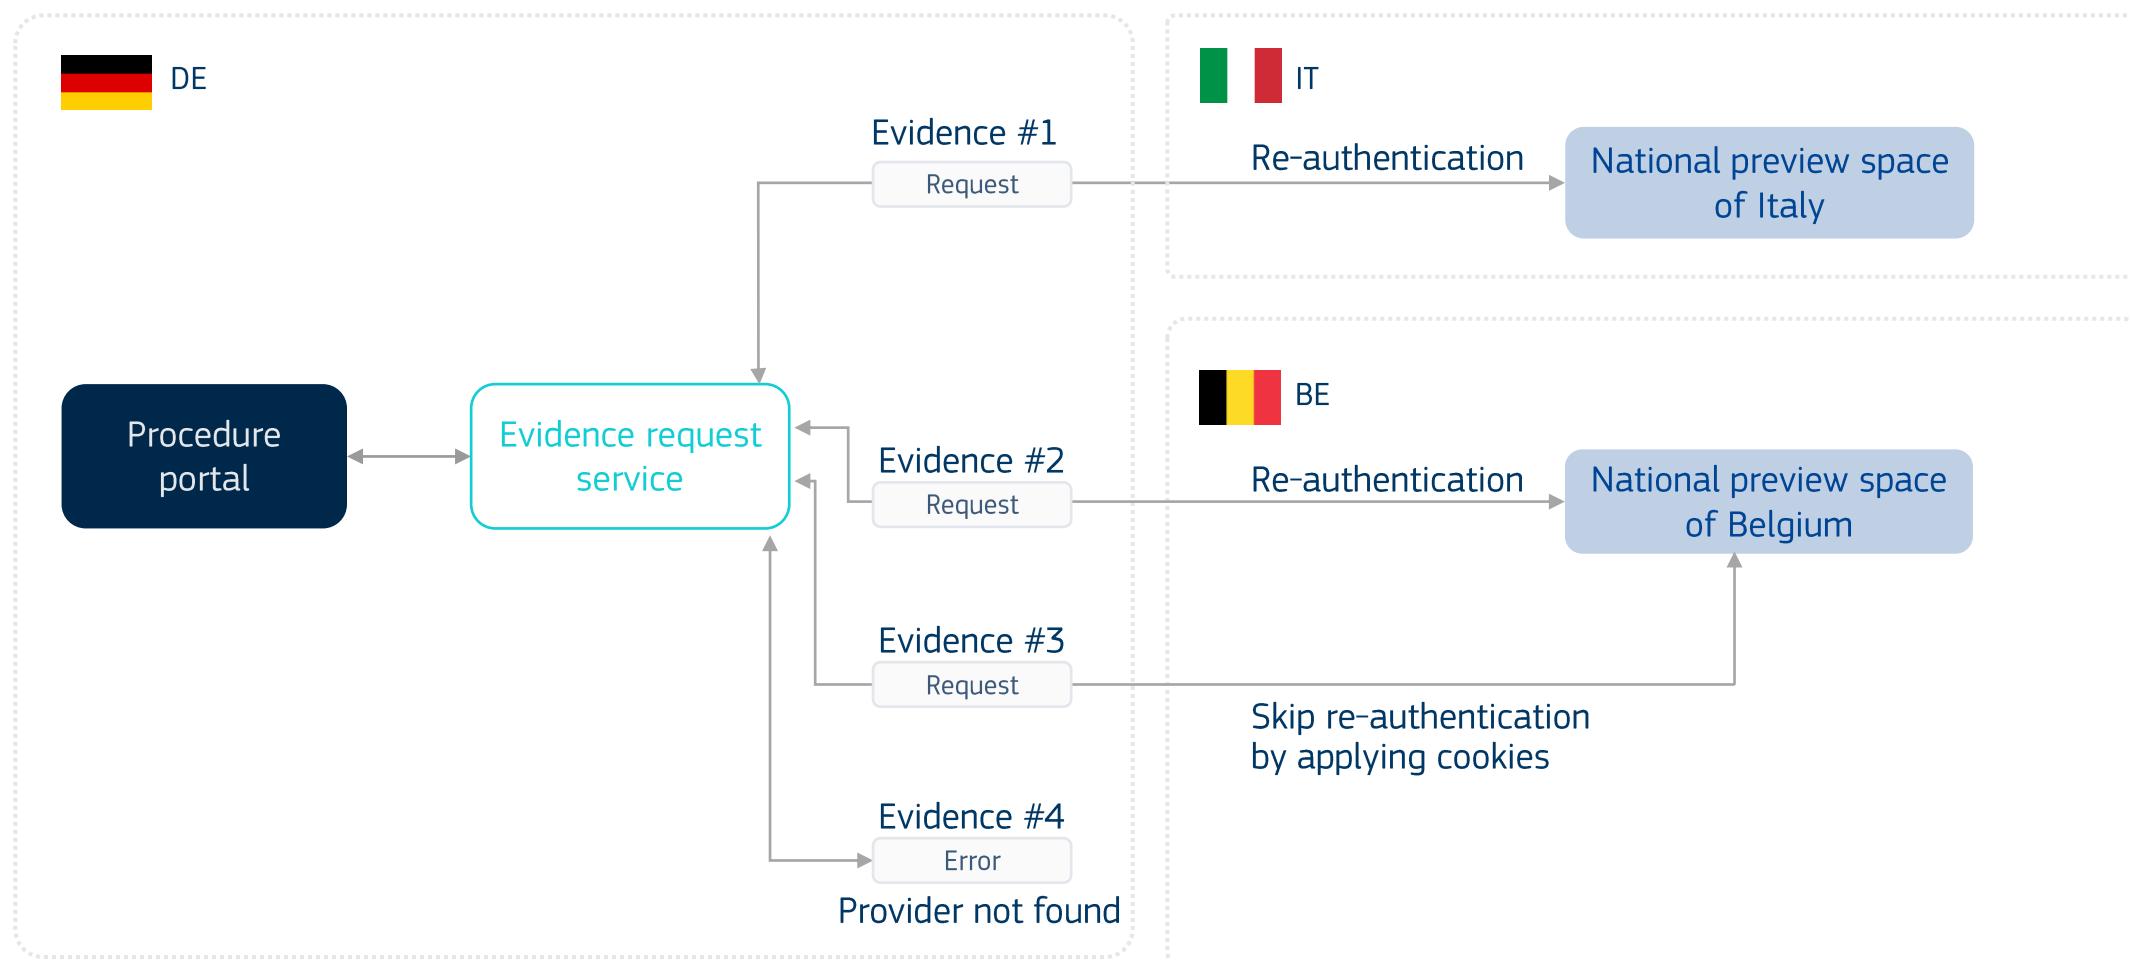

Bianca is **Italian**, she competed **secondary school in Italy**, she **moved to Belgium** where she completed a **bachelor degree and got married**. She is **disabled**. She wants to **apply for a study grant from Germany**.

To complete the procedure, the German portal asks Bianca, to provide:

- Secondary school diploma
- Bachelors degree
- Marriage certicate
- Disability certificate

## Evidence request service

A single national evidence request service enables the user to locate and request and collect all the evidence she needs from one platform

# #2 Locate evidence

Location: Procedure portal

**2. Bachelor's Degree Certificate**

Provide the following documents in order to meet the entry requirements for the master's level.

Secondary education diploma  
Marriage certificate  
Tertiary education diploma  
Disability certificate

**Note:** All the documents must be uploaded in German or English.

Select which documents you want to retrieve online

Secondary education diploma  
 Marriage certificate  
 Bachelor's certificate  
 Disability certificate

Secondary education diploma  
Marriage certificate  
Bachelor's certificate  
Disability certificate

Get documents online

**Note:** You will still have choice to upload your documents manually by removing it from the evidence requester portal

or

Upload your documents manually

Drop the file here

Cancel

## DO

1. Tell users what languages the evidence needs to be provided in
2. Users must actively select the evidence they want to retrieve via OOTS, by default the check box should be unselected
3. Let users learn more about how to retrieve and share their documents online. This can be achieved by a link and modal.

# #2 Locate evidence

Location:

Evidence request platform

The screenshot shows a user interface for collecting official documents. At the top, there's a header with the German flag and 'DE - Evidence Request Service' on the left, and a language selection bar with 'EN | Choose language' on the right. Below the header, a main title reads 'Collect the official documents you need, directly from public authorities across the EU.' followed by two bullet points explaining the service's purpose. A large section titled 'Documents you need to provide' lists four required documents: 'Secondary education diploma', 'Bachelor's Certificate', 'Marriage Certificate', and 'Disability certificate'. Each document entry includes a 'Locate evidence' button and an 'Upload manually' link. At the bottom of the page is a 'Share your documents' button.

DE - Evidence Request Service

EN | Choose language

Collect the official documents you need, directly from public authorities across the EU.

- This service allows you to retrieve official documents about you or a company you represent, directly from official sources across the EU so you can use them to complete the online procedure.
- Not all official documents across the EU are available, yet. If the document you need to provide is not available through this service, you will have to contact the issuer directly to get a copy and then upload the file yourself.

**Documents you need to provide**

To complete the procedure: *Apply for a study grant*, please provide the following documents:

Secondary education diploma      Locate evidence      Upload manually

Bachelor's Certificate      Locate evidence      Upload manually

Marriage Certificate      Locate evidence      Upload manually

Disability certificate      Locate evidence      Upload manually

Share your documents

## DO

1. Give users again the possibility to choose not to use OOTS and upload documents manually. Make this option available for each document
2. The language on the buttons should be clear for users which action they are about to do (e.g. “Upload manually” instead of “Cancel” or “Remove”)

# #3 Evidence request

Location:

Evidence request platform

The screenshot shows a user interface for retrieving documents online. At the top, there's a header 'Retrieving documents online' followed by a placeholder text: 'Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua.' Below this, there's a section for a 'Secondary education diploma'. A dropdown menu is open, showing 'Select the country where your certificate was issued' with 'Italy' selected. There are two buttons: 'Cancel' and 'Locate evidence'. Below this section, there are three more document types listed: 'Bachelor's Certificate', 'Marriage Certificate', and 'Disability certificate', each with a 'Locate evidence' button and an 'Upload manually' link.

**Retrieving documents online**

Secondary education diploma

Select the country where your certificate was issued

Select country

Italy

Bachelor's Certificate

Locate evidence

Upload manually

Marriage Certificate

Locate evidence

Upload manually

Disability certificate

Locate evidence

Upload manually

Share your documents

## DO

1. After they choose to retrieve it online, let users select the country where the evidence was issued
2. List the countries and regions in alphabetical order. Provide a search bar as part of the drop-down menu to facilitate search
3. Make the user press a button to go further and allow for mistakes in the selection of the dropdown items
4. Label the button with the action that the button will trigger (e.g. "Locate evidence", "find certificate provider")

# #3 Evidence request

Location:

Evidence request platform

The screenshot shows a user interface for requesting evidence. At the top, a header reads "Retrieving documents online". Below it, a sub-header says "Documents available to request". A list item for "Secondary education diploma" is selected, showing its provider as "Ministero dell'Istruzione, dell'Università e della Ricerca". There are "Cancel" and "Request" buttons below this. Further down, there are sections for "Bachelor's Certificate", "Marriage Certificate", and "Disability certificate", each with "Locate evidence" and "Upload manually" buttons. At the bottom, a button says "Share your documents".

**Retrieving documents online**

Diploma educazione secondaria  
Provider: Ministero dell'Istruzione, dell'Università e della Ricerca

Bachelor's Certificate

Locate evidence Upload manually

Marriage Certificate

Locate evidence Upload manually

Disability certificate

Locate evidence Upload manually

Share your documents

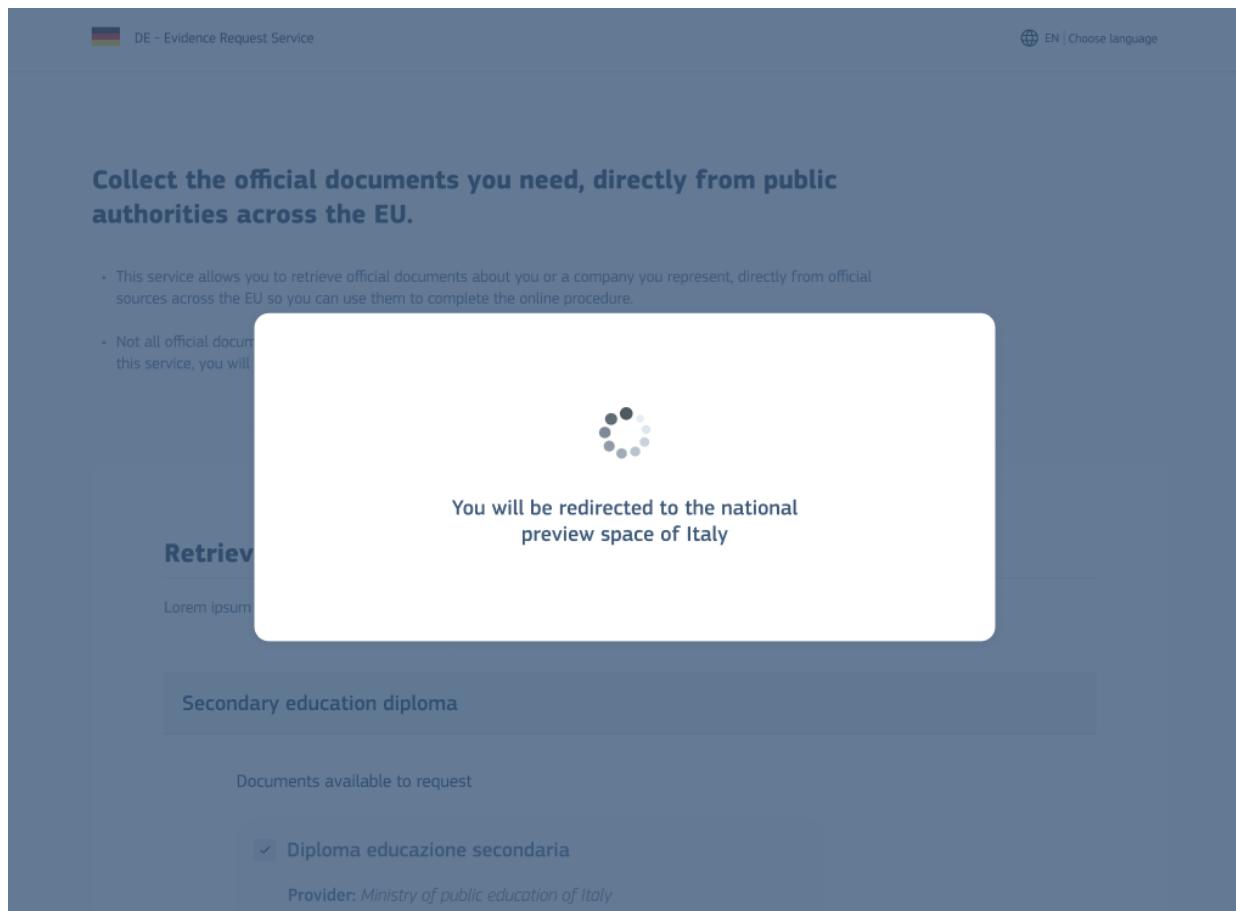

## DO

1. Show users what the evidence is called in the evidence provider member state and show the name of the evidence provider in the original language
2. If re-authentication is required, inform the user.

# #3 Evidence request

Location:

Evidence request platform

## DO

1. Show a modal/pop-up to inform the user where they are about to go to

# #3 Evidence request

Location:

Preview space

The screenshot shows a user interface for requesting evidence. At the top, there's a header with the Italian flag and the text "National preview space of Italy". On the right, there's a language selection bar with "EN | choose language". Below the header, the main content area has a title "Confirm the certificates you want to share" and a sub-section "Requester: German Evidence Request Service". The first step, "1. Select the certificate you want to share", shows a checkbox next to "Diploma educazione secondaria" and a link to "Secondary education diploma.pdf" (PDF, 77KB, 1 page). The second step, "1. Select the language of your certificate", has a dropdown menu labeled "Select language". At the bottom of the modal are "Cancel" and "Confirm" buttons.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis utrices maximus dui, ut imperdiet nibh dictum sit amet. Donec at risus dolor. Class aptent taciti sociosqu ad litora torquent per conubia nostra, per inceptos himenaeos.

Hyperlink Hyperlink Hyperlink

Hyperlink Hyperlink Hyperlink

Hyperlink Hyperlink Hyperlink

## DO

1. Display who the requesting and issuing competent authorities are
2. Display the document type (file format, file size) of the evidence and the title of the evidence in the original language from the evidence provider MS
3. Use a checkbox to let users actively select the evidence they want to request
4. Make the “Confirm” button available after users have selected the evidence provider
5. Where applicable, allow the user to select what language they want to share their evidence in.

# #3 Evidence request

Location:

Preview space

The screenshot shows a digital representation of a High School Diploma for Luca Fontana. At the top, there's a header with the Italian flag and the text "National preview space of Italy". On the right, there are language selection buttons ("EN | Choose language") and download/print options. The main content area displays the diploma's title "High School Diploma", the recipient's name "Luca Fontana", and a statement indicating he has completed the required course of study and is hereby awarded the diploma. Below this, there's a small note about the document being a placeholder. At the bottom, there's a footer with the same "National preview space of Italy" branding and some placeholder text.

## DO

1. If possible, give users the possibility to download the document.
2. Preview on mobile: open the PDF in a separate tab as most browsers can support viewing PDF files.

# #3 Evidence request

Location:

Evidence request platform

The screenshot shows a web interface for collecting evidence. At the top, there are language selection buttons for DE (Evidence Request Service) and EN (Choose language). Below this, a main heading reads: "Collect the official documents you need, directly from public authorities across the EU." A descriptive text follows, explaining the service's purpose and limitations regarding document availability.

**Retrieving documents online**

Three documents are listed under this section:

- Secondary education diploma: A PDF file named "Secondary education diploma.pdf".
- Bachelor's Certificate: A PDF file named "BachelorsCertificate.pdf".
- Marriage Certificate: A PDF file named "MarriageCertificate.pdf".

**Documents to be uploaded manually**

A note states: "Manual uploading is required for these documents" followed by a link icon. A single item is listed:

- Disability certificate

A "Share your documents" button is located at the bottom right of the main content area.

## DO

1. Divide the list of evidences into two sections: one for OOTS (online retrieval) and the other for manual upload
2. Give users the possibility to freely choose which documents to retrieve online and which to upload manually. Add a button to recover documents from the manual upload list to the OOTS list (e.g. Add “Retrieve online instead” button)

# #3 Evidence request

Location:

Evidence request platform

The screenshot shows a web interface for collecting official documents from EU authorities. At the top, there's a navigation bar with a German flag icon, 'DE - Evidence Request Service', and a language selection 'EN | Choose language'. Below this, a main heading reads: 'Collect the official documents you need, directly from public authorities across the EU.' A list of bullet points provides information about the service:

- This service allows you to retrieve official documents about you or a company you represent, directly from official sources across the EU so you can use them to complete the online procedure.
- Not all official documents across the EU are available, yet. If the document you need to provide is not available through this service, you will have to contact the issuer directly to get a copy and then upload the file yourself.

Below this, a section titled 'Retrieving documents online' lists several document types with their status and actions:

Document Type	Status	Action
Secondary education diploma	Available	Locate evidence
Bachelor's Certificate	Available	Locate evidence
Marriage Certificate	Available	Locate evidence
Disability certificate	Available	Locate evidence

At the bottom right of the interface is a button labeled 'Share your documents'.

## DO

1. Allow users to preview the document again
2. Let users freely delete and recover the retrieved documents from the list

# #3 Evidence request

Location:

Evidence request platform

The screenshot shows a user interface for retrieving documents online. At the top, a header reads "Retrieving documents online". Below it, a message states: "Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed do eiusmod tempor incididunt ut labore et dolore magna aliqua." A list of uploaded documents is shown:

- Secondary education diploma
- Bachelor's Certificate
- Marriage Certificate

For the "Disability certificate", a modal window is displayed with the title "Provider not found". It contains the message: "Online retrieval is not yet supported for [Certificate] in the selected country." It also states: "You will be able to upload the document manually on the procedure portal." A link "Learn more" is provided. At the bottom of the page is a "Continue" button.

## DO

1. If an evidence is not supported on the OOTS, display the error message and explain that users will have to upload the evidence manually

# #3 Evidence request

Location:

[Share your documents](#)

## Documents to be uploaded manually

Manual uploading is required for these documents 

- *Disability certificate*

# #2 Locate evidence

Location: [Procedure portal](#)

**Required documents**

- Secondary education diploma.pdf
- Bachelor's certificate.pdf
- Marriage certificate.pdf

To complete the procedure you need to upload the following documents

Disability certificate

It appears that the document you were searching for could not be located. Please upload your document manually in order to complete your application.

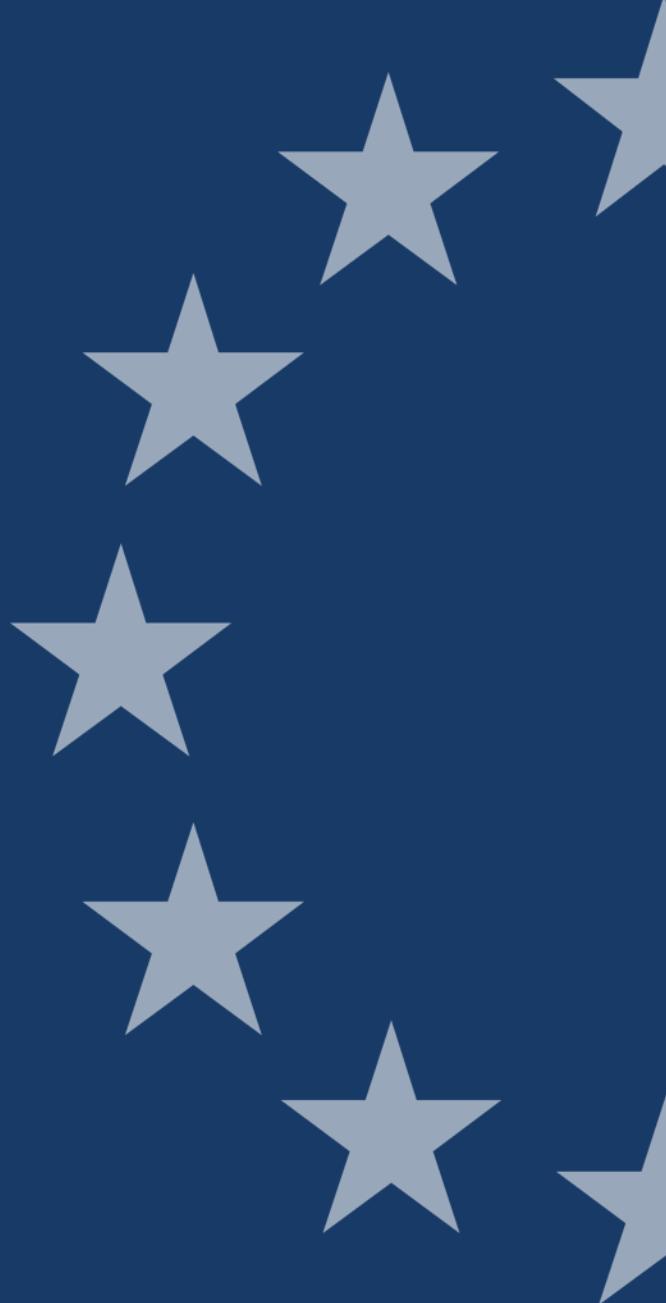

[Browse files](#)

[Cancel](#) [Submit](#)

## DO

1. Allow users preview the document again
2. If an evidence is not supported, explain why users have to upload the evidence manually

# Q&A

# **Data Service Directory and Evidence Broker**

Jerry Dimitriou

# Evidence Broker

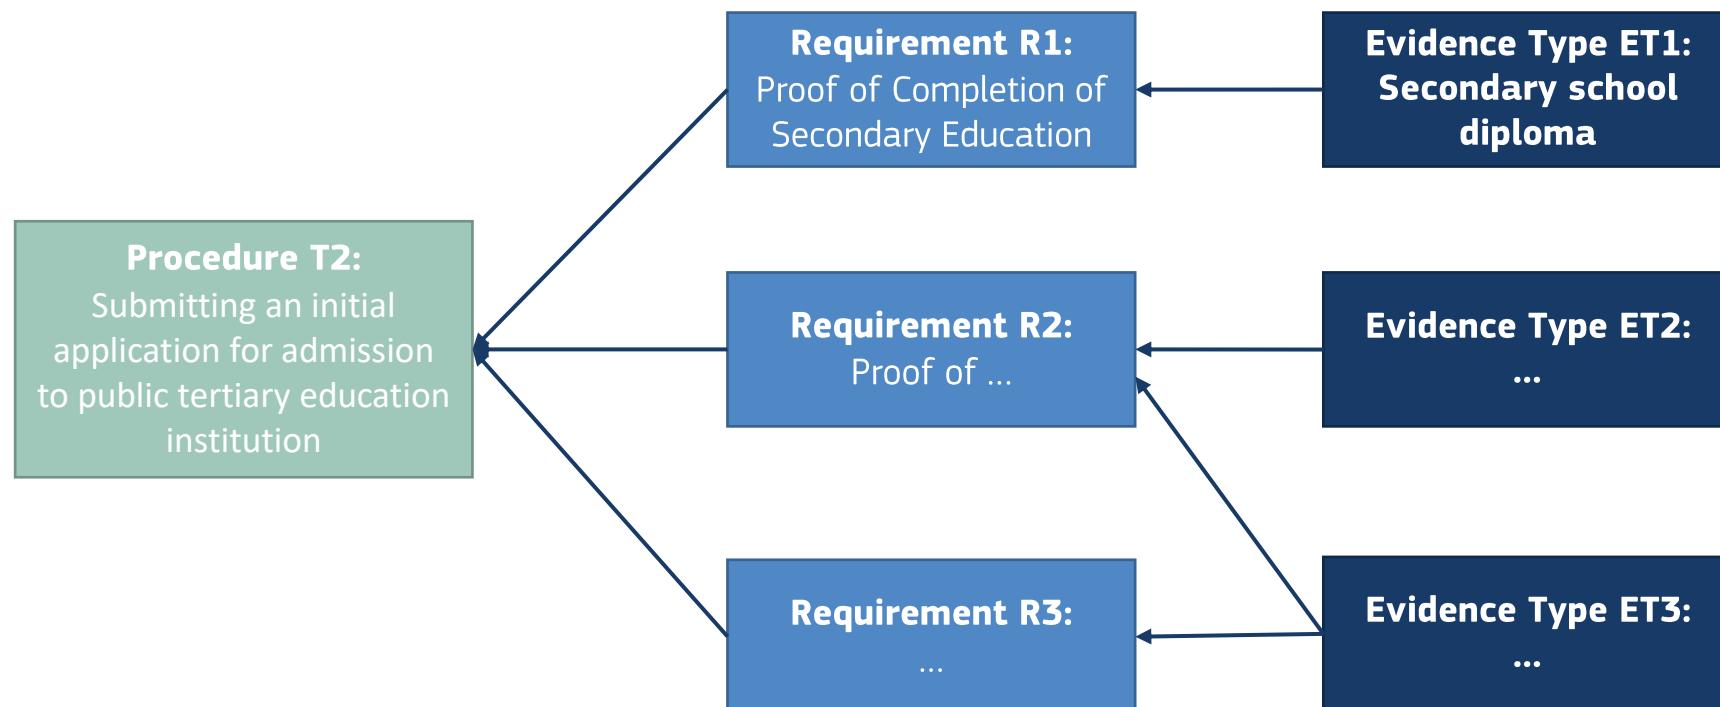

## Overview

- Publishes which **evidence types** Member States can provide to prove a particular **requirement** of a **procedure**;
- The Evidence Broker allows the Evidence Requester to look up the evidence types fulfilling requirements for a specific procedure to request from the Evidence Provider
- The functionality requires four main classes of Information:
  - The **Procedure** to which the requirements apply, based on the SDG Annex II list
  - The **Requirements** of procedures, commonly agreed notions that evidence types must fulfil.
  - The **Evidence Type**, providing the semantic information and description of the evidence types and the jurisdictions this evidence type cover

# Evidence Broker

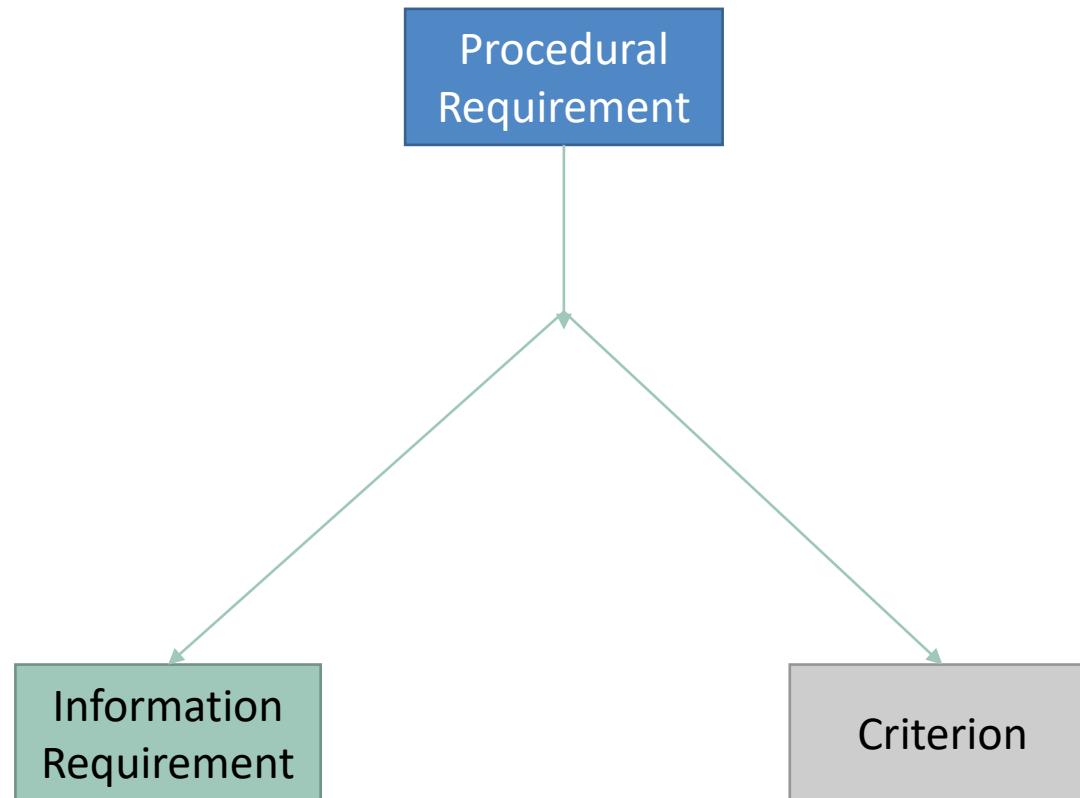

## Defined Mapping Process

- ‘Evidence’ means any document or data, including text or sound, visual or audiovisual recording, irrespective of the medium used, required by a competent authority to prove facts or compliance with **procedural requirements** (*Article 3(5)*)

# Evidence Broker

## Requirement Types

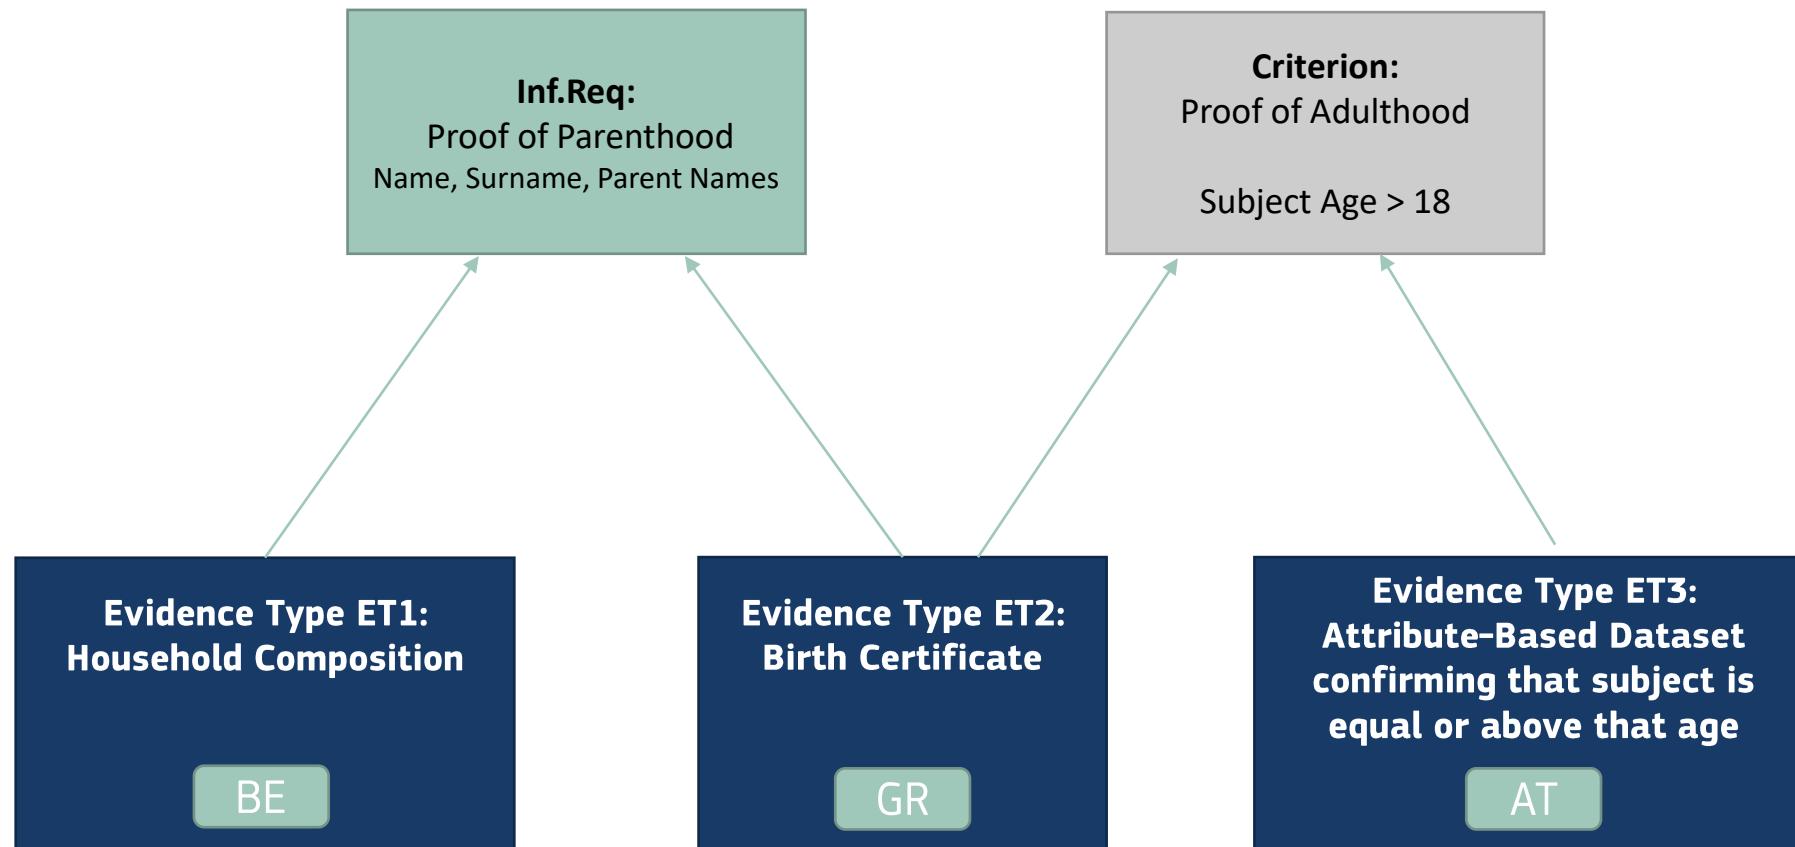

***Information Requirement*** is to be seen as a **request for data** that proves one or more facts of the real world, or that leads to the source of such a proof.

***Criterion*** is to be seen as a condition that will be evaluated (Yes/No Answer)

# Evidence Broker

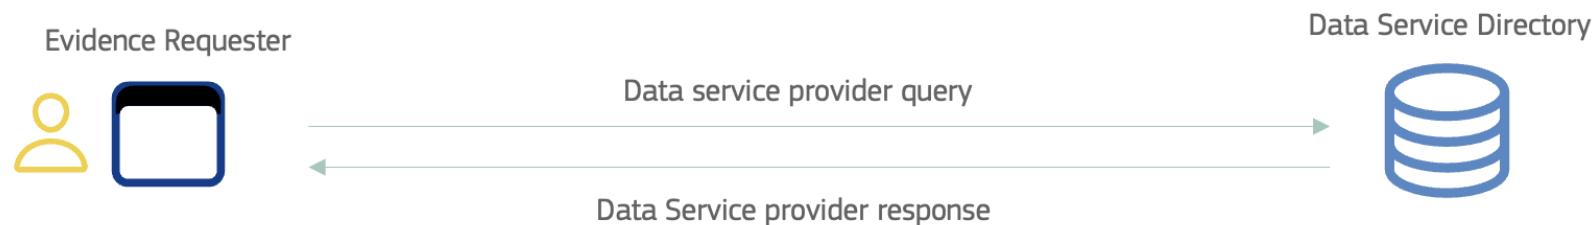

Requirement Types and mapping to Evidence Types examples

# Data Service Directory

## Overview

- Handles and maintains a catalogue of **Evidence Providers** with the **Evidence Types** they provide upon request through their **Data Services**.
- An Evidence Provider that serves Evidence of a specific evidence type MUST register this capability in the DSD by registering as an Evidence Provider with its Data Services.
- The **DSD** is used in the **Evidence Exchange** process by the **Evidence Requesters** (Procedure Portals) to discover **the Evidence Providers** that can provide **the pieces of Evidence** they require, together with the **required metadata** and attributes imposed by the Data Services.
- A query is sent to the Data Service Directory (DSD) with the **evidence type identifier** (provided by the Evidence Broker) and Member State / Jurisdiction information.
- The DSD returns the **Evidence Provider metadata**, combined with the **Data Service specific information** (Delivery Access point Identifier, exchange protocol supported etc)

# Data Service Directory

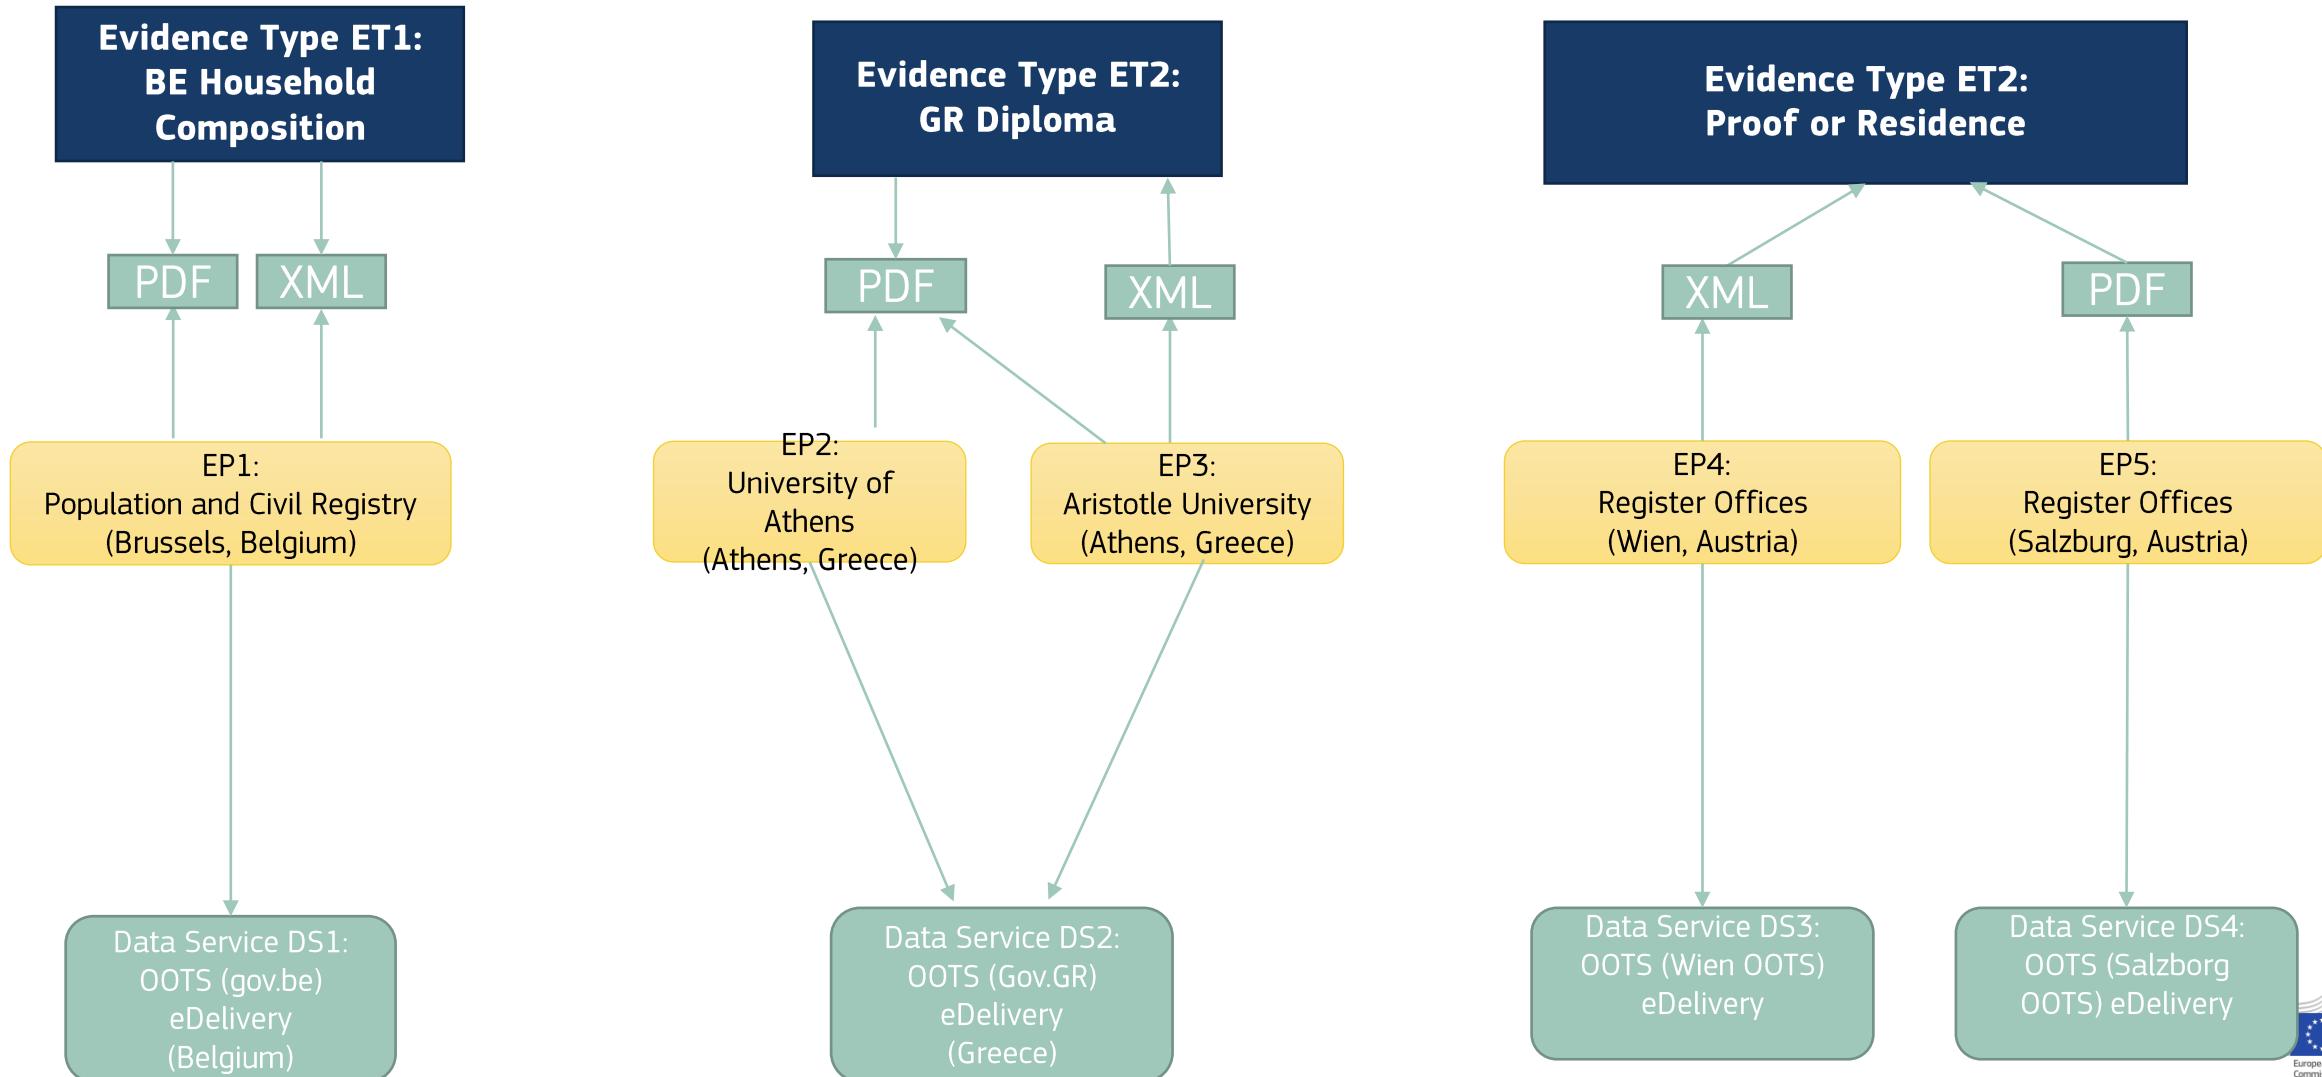

Explanation & examples

The main functionality of the DSD is to publish Data Services of Evidence Providers that provide distributions of Evidence Types and make them discoverable through query APIs. The functionality requires four main classes of Information:

- The **Data Service Evidence Type**, providing the semantic information and requirements for retrieving an evidence type from a Data Service.
- The **Distribution Metadata** of an Evidence Type, describing the format, and the semantic and syntactic conformance, under which the Evidence Type can be distributed.
- The **Evidence Provider**, describing the details of the Provider of the Evidence Type.
- The **Data Service**, describing the technical endpoint and supported technical protocols from which Evidence Types can be retrieved from their Evidence Providers

## Get List of Requirements Error Response

The exception has the following properties that are profiled for each expected error of the query.

- **xsi:type**: The type of the error, selectable from a predefined set of error classes of the Query Interface of the Common Service.
- **severity**: The severity of the error, selectable from a predefined set of error classes of Query Interface of the Common Service.
- **message**: A string describing the error in Human Readable form.
- **code**: A code for the error, specified by the Common Service Technical Design documents.

```
<query:QueryResponse xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"

    status="urn:oasis:names:tc:ebxml-regrep:ResponseStatusType:Failure">
    <rs:Exception
        xsi:type="rs:ObjectNotFoundException"
        severity="urn:oasis:names:tc:ebxml-regrep:ErrorSeverityType:Error"
        message="No Data services were found based on the given parameters"
        code="DSD:ERR:0001">
    </rs:Exception>
</query:QueryResponse>
```

# Data Service Directory

## Error Response Codes

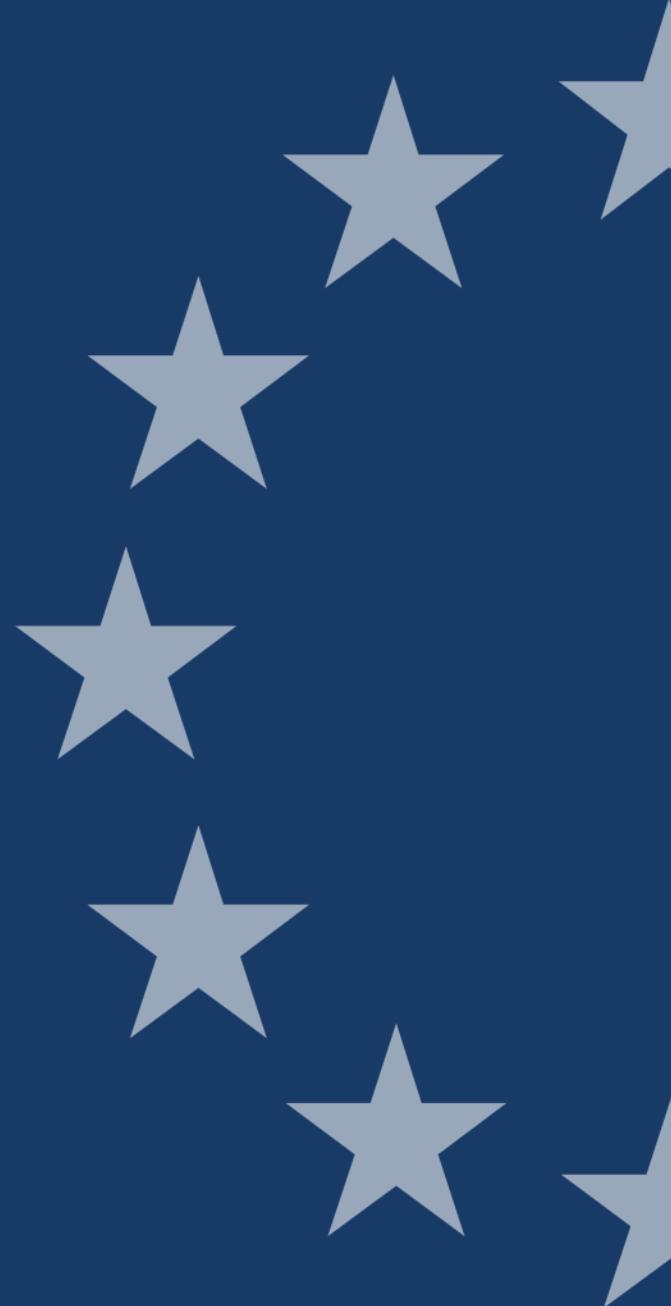

#	Error Title	Type	code	Message
1	Data Services Not Found	rs:ObjectNotFoundException	DSD:ERR:0001	No Data Services were found based on the given parameters
2	Evidence Type Not Found	rs:ObjectNotFoundException	DSD:ERR:0002	The Evidence Type requested cannot be found
3	Bad Query Parameters	rs:InvalidRequestException	DSD:ERR:0003	The query parameters do not follow the query specification
4	Unknown Query	rs:InvalidRequestException	DSD:ERR:0004	The requested Query does not exist
5	Additional Parameters Required	rs:ObjectNotFoundException	DSD:ERR:0005	The query requires the included extra attributes to be provided by the user
6	Incorrect Parameter Value	rs:InvalidRequestException	DSD:ERR:0006	Incorrect provided value for requested parameters

# Q&A

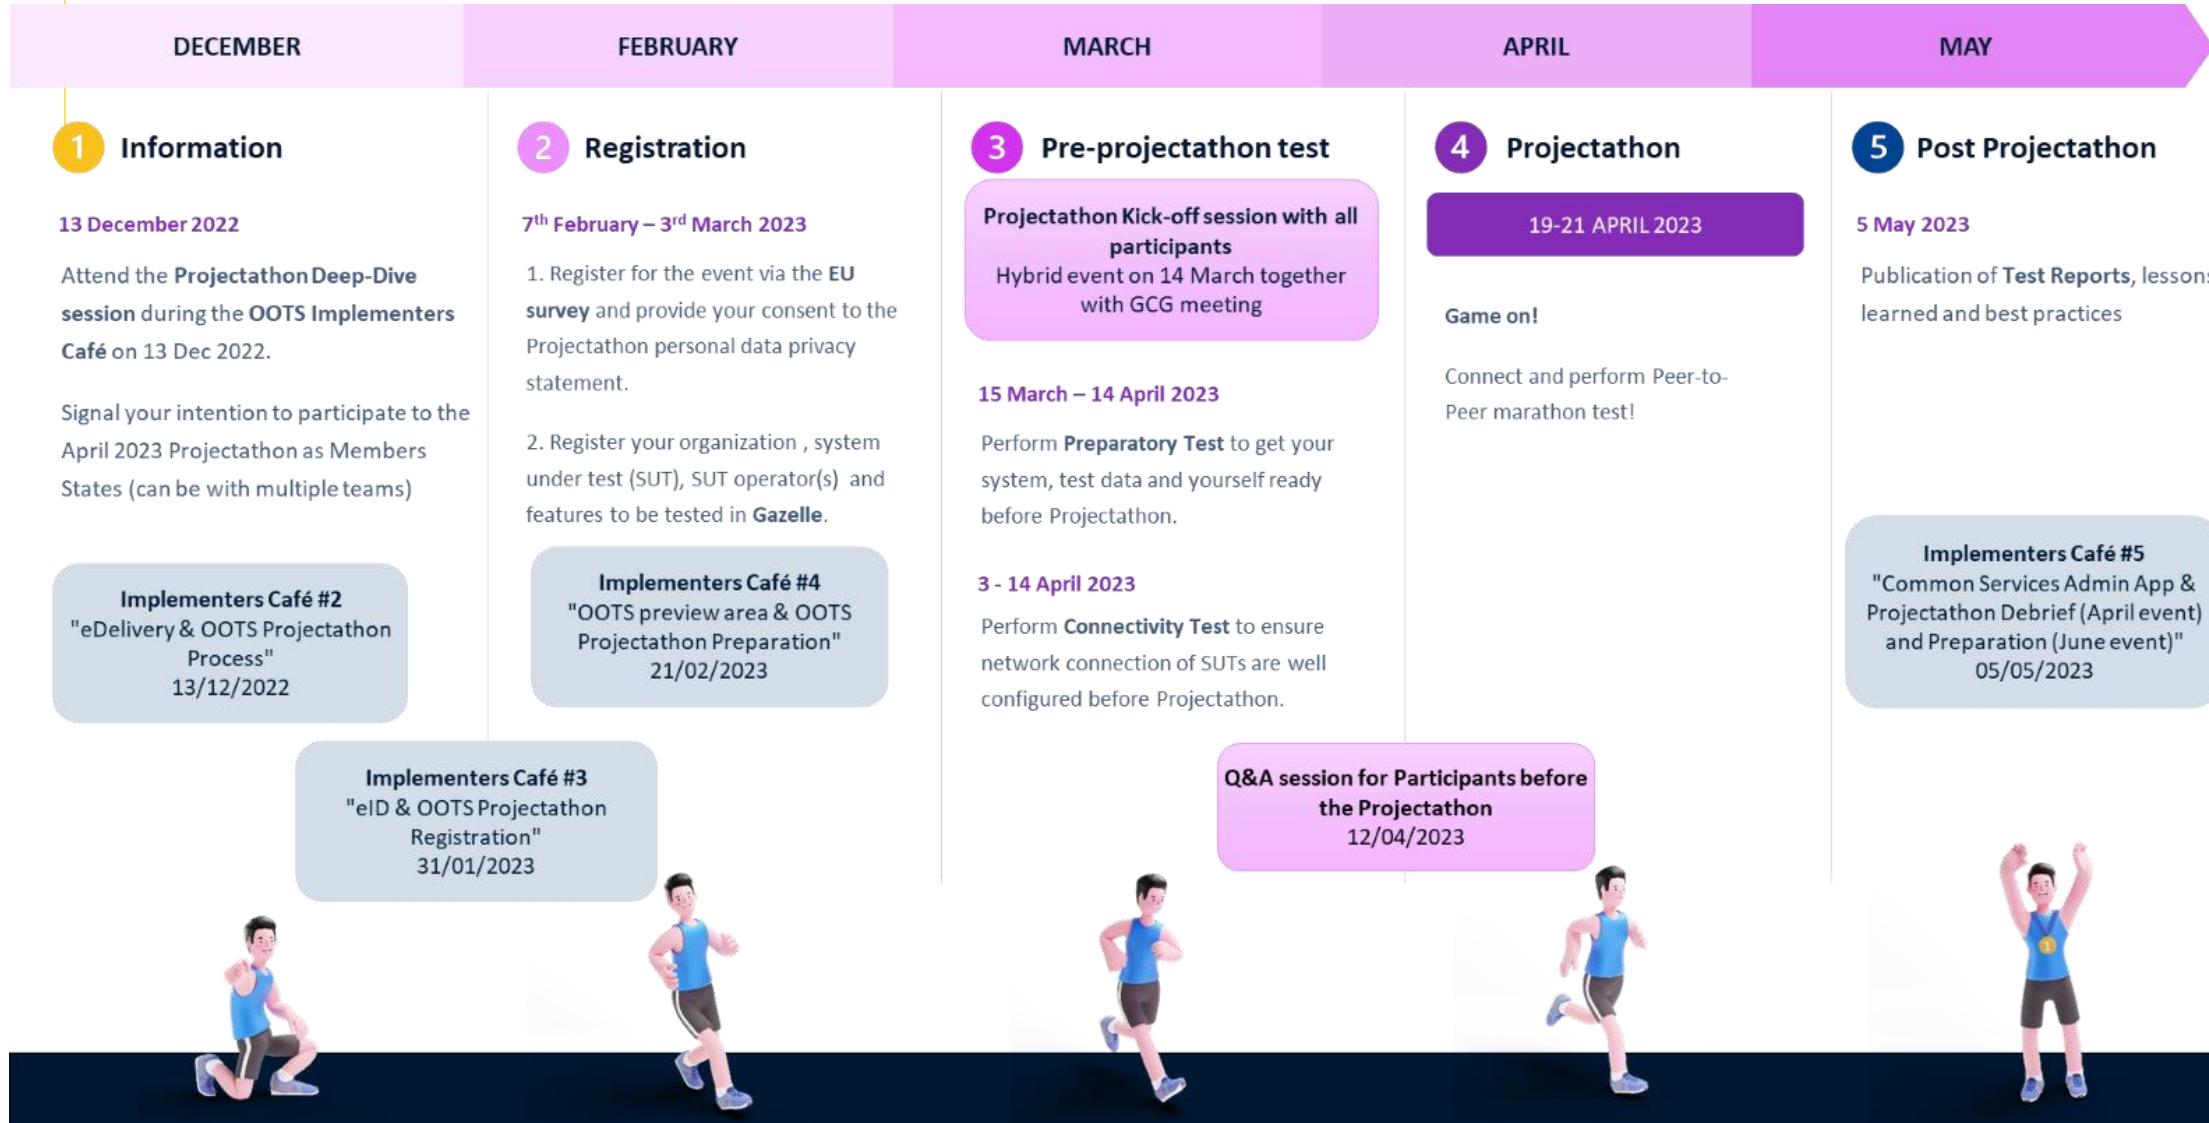

# **OOTS Projectathon preparation**

Marie-Laure Watrinet (DIGIT-  
EXT), Maarten Daniels (DIGIT-EXT)

# Projectathon: we are now in stage 2 - Registration

# Projectathon registrations

- Registrations are open and several Members State already registered one or more team members (32 registrations on 20/02)
- In case you did not yet pre-register, you can do so by mailing [EC-OOTSSUPPORT@ec.europa.eu](mailto:EC-OOTSSUPPORT@ec.europa.eu) or via  
[https://ec.europa.eu/eusurvey/runner/OOTSP projectathon\\_pre\\_registration\\_042023](https://ec.europa.eu/eusurvey/runner/OOTSP projectathon_pre_registration_042023)
  - Following this action, you will get an invitation mail with the necessary steps to complete as part of the actual registration
- Be sure to consult the [OOTSP projectathon Playbook](#) version 1.0 as well for preparation and participation details
- All participants should join the Projectathon Kick-off session, a **hybrid** event taking place on **14/03** after the Gateway Coordination Group meeting
  - Here we will explain the **pre-event** Preparatory Tests and Connectivity Tests
  - Be reminded that all SUTs need to be **available online on the public internet** with a **stable IP** between/during the Connectivity Tests and the actual event.

# Projectathon registrations - tips

- Please check your spam folder for registration mails (for invitation mail, also for mail to register to the EU Survey and to register to Gazelle)
- About Gazelle registration:
  - Every participant that has an account in Gazelle should already be registered via the EU Survey
  - When creating an organisation in Gazelle, the organisation keyword should include the country code (for instance: FR\_KEREVAL)

# Microsoft Teams Implementers Space

- A Microsoft Teams Implementers Space is available to facilitate preparation of and participation to the Projectathons
- Access to it can be requested via selecting the relevant item in the **Service Desk**

# Projectathon preparation: test case flows

- Last meeting [M10](#) we continued the test scenario discussion
- Version 0.7 is available in the [T&D Document Repository](#)
- Germany commented that their prototypes are built around Legal Persons. This results in 2 tracks we suggested and can further explore
  - Firstly, the current natural person test cases only require static data, meaning that all supporting data (identity data, evidence related data in EB, EP data in DSD) is preconfigured at both sides based on the test configuration package to be provided. As a result, you don't need to integrate real base registries for the moment, but can test the OOTS flows using statically configured data.
  - Secondly, if you prefer that we anyway add test scenarios that cover legal persons and if there are other Member States that can support these scenarios as well (so we have sufficient test partners for these cases), then we still want to discuss these scenarios more into detail with you and the relevant other Member States with the goal to analyse whether we can still add them to the April Projectathon.
    - In case this second option is chosen, then the sub-question becomes whether, for the April Projectathon, we should decide whether to:
      - Create test data variants for legal persons while keeping the existing test cases, functionality and interfaces
      - Create additional test cases that cover legal person-specific features

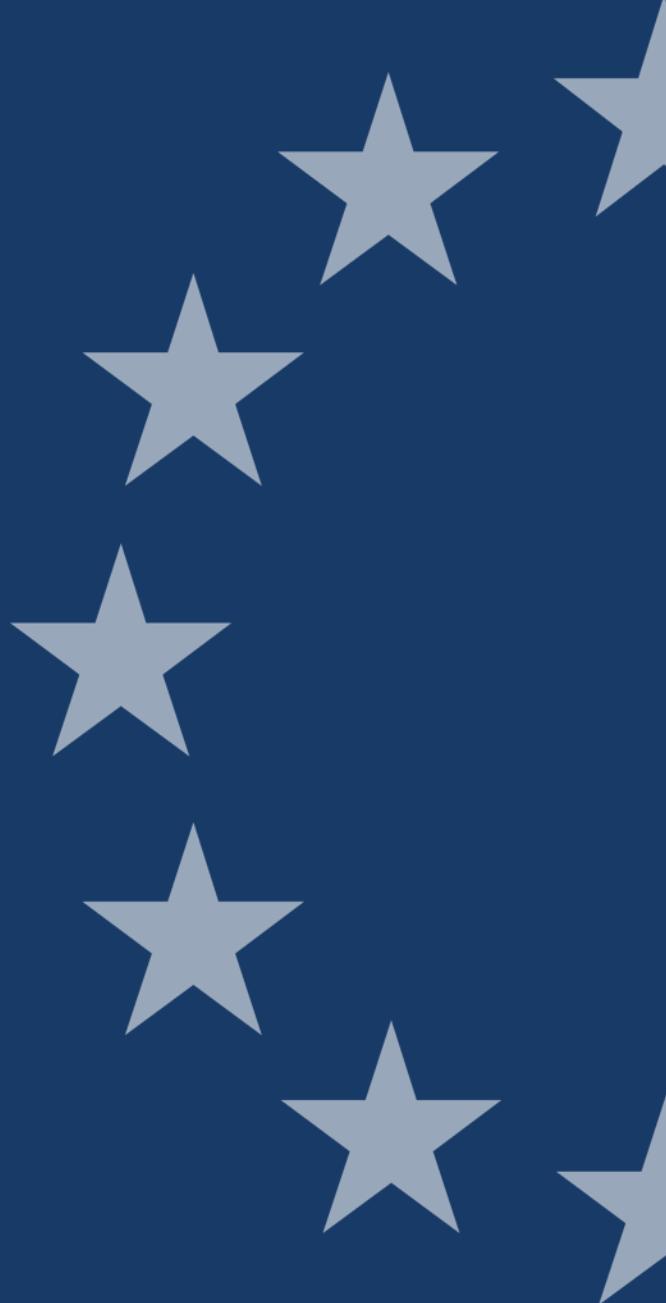

# Projectathon preparation: component updates

- Which components should be tested in the first Projectathon?
  - **Common Service client: EB requests, DSD requests, DSD conversations**
  - **eDelivery Access Point**
    - In case you do not yet have an Access Point up and running, [contact us](#) so we can still repeat (e.g. in March) the sample Access Point hands-on session that was held on 26/01/23
  - **Data Service**
  - **Preview Space**
  - ID Requester: notified eID (at ER side) and/or other EP accepted identification scheme (at EP side)
  - Common Service LCM client?
  - Country specific Common Service server? EB or DSD?

# Test data sets

- We are checking what is the data set needed to cover the April Projectathon
  - We start from the basis provided by the EM SG
  - We, across the relevant SGs complement it with test data to cover the mandatory data fields and to enable a basic evidence flow
  - We gradually enrich and enhance the data to enable increasingly more complex test cases
    - This effort provides value to and requires input from all SGs
    - This effort does not stop at the first Projectathon and continues to evolve as we prepare for upcoming Projectathons and get closer to the Go Live of the OOTS

# Q&A

## Next steps

1. Complete the satisfaction survey for this meeting (it really does help).
2. Sign-up to the OOTS Projectathon Collaborative Space (introduce yourself in the "Forum" function) and access useful materials and MS Teams.
3. We invite all Projectathon participants to join us for the Projectathon Kick-Off Meeting on 14/03/2023 (for Projectathon participants).
4. Join us for the **#5 Implementers' Café in May 2023**. You will receive an email with the session's topics and how to register.

# Further questions?

We're here for you at  
[EC-OOTS@ec.europa.eu](mailto:EC-OOTS@ec.europa.eu)
