Choose your Building Block

A Building Block is an open and reusable digital solution. It can take the shape of a framework, a standard, a software, or a software as a service (SaaS), or any combination thereof.

Building Blocks are endorsed by the European Commission and ensure that your digital service will be fully compatible with others on the market. We offer support and guidance on your journey to an interoperable, EU-compliant final product. What’s your challenge?

eDelivery

Exchange electronic data and documents in an interoperable and secure way

Learn more

eID

Offer services capable of electronically identifying users across Europe

Learn more

Once-Only Technical System (OOTS)

Reduce administrative burden on citizens and businesses

Learn more

eSignature

Create and verify electronic, paperless signatures

Learn more

eInvoicing

Send and receive electronic invoices with automated processing, in line with the European standard
