Monitoring the Digital economy and Society - 2016-2021 Framework

Document endorsed in December 2015 by the Digital Agenda High Level Group, after consultation of Member States representatives and the Eurostat working group on Information Society Statistics. The Framework is based on the analysis of past data collections, output from the Community Surveys on ICT Usage and e-Commerce in Enterprises, and on ICT usage in households and by individuals. It defines new areas and data sources to be exploited in the future, and proposes a list of key indicators.
