

## Digital Single Market

# 112 in Slovakia

112 is one of the emergency numbers in Slovakia.

The average time to answer a 112 call is 9 seconds. In addition to Slovak, the calls can be answered in Czech and in certain areas in Russian, Hungarian and Polish.

According to the latest E-communications household and telecom single market survey, 69% of Slovaks know they can use 112 everywhere in the EU.

The European emergency number 112 is not the only emergency number in Slovakia:

- 150 - fire and rescue
- 155 - emergency medical service
- 158 - police

There is no specific help for disabled people.
