FI-WARE project - General video

Do you want to know how the FI-WARE project will introduce a generic and extendible ICT platform for Future Internet services?

The FI-WARE platform is being developed as part of the Future Internet PPP initiative launched by the European Commission in collaboration with the ICT Industry. The platform – also referred to as the “Future Internet Core Platform” or “FI-WARE” – aims to meet the demands of key market stakeholders across many different sectors, strengthen the innovation-enabling capabilities in Europe and overall ensure the long-term success of European companies in a highly dynamic market environment. It will deliver a novel service infrastructure, building upon elements (called Generic Enablers) which offer reusable and commonly shared functions making it easier to develop Future Internet Applications in multiple sectors – building a true foundation for the Future Internet. Discover the [video](#) [1].
