PatientVille - The Danish Health Care Journey

Audiovisual13/06/2012

The PatientVille exhibition tells the story of a chronically ill patient that suffers from a heart disease, and demonstrates how eHealth supports coherence in the patient's course of treatment. The journey included a demonstration of care and how data is shared between the pre-hospital sector (ambulance), hospital, municipality, general practitioner, pharmacy, and the patient's own home. PatientVille also included a demonstration of cross-border e-prescription (epSOS) at a Danish pharmacy.
