Video presentation of the eGOS project: e-Guidance and e-Government Services

The project aims at improving employability and guidance practitioners' capacity building through the activities of a prototype service that will enable the delivery of educational and vocational e-guidance services, also to cross-border mobility. This eGOS system enables decision makers in charge with educational, training and employment policies to reach also those citizens that, for different reasons, wouldn't be able to take benefit from traditional guidance services. The project is partially funded under the ICT Policy Support Programme (ICT PSP) as part of the Competitiveness and Innovation Framework Programme.
