Measuring the Impact of eInclusion Actors in Europe

Consultation period

29/01/2013 to 28/02/2013

The European Commission's Institute for Prospective Technological Studies (JRC-IPTS), in collaboration with DG CONNECT, is conducting the MIREIA project which aims at better understanding the role of e-Inclusion intermediary actors. Within the framework of this research, an Online Survey to 'map' eInclusion actors that operate in Europe has just been launched. The survey is addressed to those organisations whose activities include reducing gaps in ICT usage and promoting the use of ICT to overcome exclusion, and improve economic performance, employment opportunities, quality of life or social participation and cohesion. The survey has been extended until 28 February.
