Engage! Towards cross-border experimentation with European Stakeholders

As the phase 1 of Future Internet Public-Private Partnership is drawing to a close, we are gearing towards the initiation of its second phase, and also mobilizing stakeholders all over Europe for phase 3 preparations, this is the right moment to engage and share the overall vision, objectives and outcomes of this strategic European programme. It is time now for European stakeholders – SMEs, developers, cities, regions, industry and end-users to engage in the phase 2 and phase 3 of the FI-PPP programme and benefit from it.
