## Digital Single Market

EventAmsterdam12 February 2013

# Advances in VPH Technologies and the VIGOR++ Tools

Menu

This workshop is the second in a series (visit also [Workshop 2012](#) page) that aim to explore latest advances and remaining challenges in the integration of clinical data and MRI image analysis, classification and visualization in the context of the Virtual Physiological Human concept. These are enabling the development of a multi-scale, personalized GI tract model-based diagnostic tool deployable on a cloud computing platform.
