

Digital Single Market

4th European Conference on ICT for Transport Logistics

Events

13/10/2011 to 14/10/2011

Thessaloniki, Greece

ICT is the most important enabler and driver of efficiency in transport logistics. The conference will translate results from conceptual research into practical solutions. Shippers, logistics providers and authorities will see for themselves the tangible benefits which ICT system interoperability brings to logistics operations. EURIDICE, Europe's Intelligent Cargo research flagship project, will showcase, in cooperation with other logistics projects, how ICT can help the sector to increase energy efficiency, reduce lead time and generate cost savings. The target audience of the conference includes everybody involved in ICT for transport logistics.

Organiser

The University of Applied Sciences Vorarlberg (FHV), the Hellenic Institute of Transport (HIT) & the Centre for Research and Technology Hellas (CERTH)
