e-Skills: European guidelines and quality labels for new curricula

Call for tenders

31/07/2012 to 28/09/2012

The goal of this service contract is to develop European guidelines and quality labels for new curricula fostering e-leadership skills based on market needs and best practices including industry led initiatives. The guidelines and quality labels should be compatible with the European quality assurance reference framework for vocational education and training. A pilot demonstration of the implementation of the proposed European guidelines and quality labels should be organised as well as a dissemination campaign.
