Digital Single Market

Call for tenders 23 May 2012 to 13 July 2012

A comparative analysis of potential options for a roadmap-based initiative on next generation computing (SMART 2012/0052)

The aim of the study is to present and evaluate potential options and approaches for a road map-based research and innovation initiative on next generation computing – advanced computing systems and technologies. The findings and recommendations of the study will help to define the strategy and content for relevant domains in the Work Programmes under Horizon 2020.
