

Digital Single Market

Brochure03/10/2012

Net-Tech Future Magazine

Net-Tech Future Magazine is all about technologies that put ultrafast Internet connectivity at your fingertips. It sheds light on how communications technologies are shaping the future networks landscape, from developments in ultrafast broadband Internet to clever mobile networks, from network infrastructure and architecture to green technologies. With each EU-funded project showcase, it gives a glimpse not only of the 'what' but a little of the 'how' and 'why', and even 'what next' so you can see how these developments can make a difference to you, your organisation and your community.
