The Grand Coalition for digital job creation: Closing the gap by 2020

The Grand Coalition for digital jobs is an EU wide multi-stakeholder partnership helping to address mismatches and fill vacancies of ICT practitioners to boost employment.

This document outlines the terms of reference for the Grand Coalition (GC) by drawing on expert input from key industry (ICT and non ICT) stakeholders and relevant Commission services. It helps identify the issues at stake and presents what needs to be done and by whom in order to fulfil the mission of the GC - bringing together supply and demand in the ICT world to realise the largely under-tapped employment creation potential of this technology.
