

Digital Single Market

ICT4FEV

Brochure18/12/2012

ICT4FEV was the first coordination and support action launched under the Green Cars Initiative PPP. The project has been very visible within the Green Car community, with excellent networking and involvement of key stakeholders. In particular, a wide range of views were taken into account for the major revision of the ICT FEV Roadmap, which has been linked with the general electrification roadmap. Many of the reports are being made available to the EV community and the wider public. Several of the activities are ongoing and will be continued in the follow-on project, SMART EV-VC.
