Final results of the CLEAR project

CLEAR (Clinical Leading Environment for the Assessment of Rehabilitation protocols in home care) is a project funded under the ICT Policy Support Programme – CIP-ICT-PSP-2007.2.2 – ICT for Ageing Well. Under this project a large scale Pilot study has been conducted in four Member States of the European Union (Italy, Spain, The Netherlands, Poland) to demonstrate the feasibility of a Tele-rehabilitation service using Habilis, a general-purpose software platform.
