

Digital Single Market

Benchmarking of Budget and Capabilities for the deployment and operation of Digital Services Infrastructures - SMART 2012/0058

Reports and studies31/08/2012

In the framework of the Connecting Europe Facility initiative, EU Digital Services Infrastructures (DSIs) will be deployed and operated for delivering cross borders eServices to support the EU Digital single market. Learning from and comparing similar initiatives all around the world through benchmarking activities will bring comparative, coherent and realistic figures. The study will deliver a report showing in practical terms what are the costs and the main needs and requirements for the setting up an entity responsible for running the services. Contract signed with Gartner Belgium BVBA on 24/8/2012 under the DIGIT Framework Contract Nr DI-06690 "Information and Communication Technology Advice, Benchmarking and Consulting Services (ABCII)" - Lot 1.
