

Digital Single Market

EU - US eHealth Marketplace - see who is speaking and attending!

News Article20/09/2012

With just under 5 weeks to go until the EU-US eHealth Marketplace in Boston, Massachusetts on October 23 - 24, we're delighted to report that plans are at a very advanced stage. Many people have already secured their places and are looking forward to this prestigious event. The goal of the eHealth Marketplace is to encourage a multi healthcare sector, multi member state mission from Europe to meet with companies, health providers, research institutions and others from across the USA to encourage business relationships, research and other collaborations. Pre-arranged matchmaking opportunities are available. When registering, don't forget to opt into the matchmaking opportunities (you can request 1-2-1 meetings), also feel free to add your organization logo, profile and your photo.
