Cybercrime: EU citizens concerned by security of personal information and online payments

A new Eurobarometer survey shows that Internet users are very concerned about cyber security: 89% avoid disclosing personal information online, and 74% agree that the risk of becoming a victim of cybercrime has increased in the past year. 12% of internet users across the EU have already experienced online fraud, and 8% have fallen victim to identity theft. Nonetheless, 53% have not changed any of their online passwords during the past year.
