Computer skills in the 27 EU Member States in figures

The increasing use of computers in the work place has led to computer literacy being a necessity in a large majority of professions. A sound understanding and knowledge of computer applications and programs is becoming more and more important in working life. On the occasion of the e-skills week, which will take place from 26-30 March 2012, Eurostat, the statistical office of the European Union, publishes data on university graduates in computing and computer skills of individuals. The European e-Skills week 2012 is a European campaign focused on raising the interest of young people in ICT (Information and Communication Technologies) as well as showing people how to get jobs and e-skills for life in the digital age.
