

Digital Single Market

Press release 26 March 2012

Computer skills in the 27 EU Member States in figures

The increasing use of computers in the work place has led to computer literacy being a necessity in a large majority of professions. A sound understanding and knowledge of computer applications and programs is becoming more and more important in working life. On the occasion of the e-skills week, which will take place from 26-30 March 2012, Eurostat, the statistical office of the European Union, publishes data on university graduates in computing and computer skills of individuals. The European e-Skills week 2012 is a European campaign focused on raising the interest of young people in ICT (Information and Communication Technologies) as well as showing people how to get jobs and e-skills for life in the digital age.
