What is OurSpace?

OurSpace is the first digital platform where you can express your thoughts on politics, society, economy and debate with decision-makers and young people across Europe.

[1]

OurSpace puts the power of European Union's decision-making in the hands of the youth by providing them with a useful set of online tools to have a say in EU politics.

Our Future is being shaped by decisions taken today. Here is YourSpace to talk, write, share, participate, vote, debate, propose, and contribute over what is decided for you, BUT without you.

Have Your Say in the EU!

On OurSpace you can debate about issues that affect young Europeans every day such as: education, environment, mobility of young people, labour market, debt Crisis, unemployment, public spending.

Politics is what is around you. It is made for you. You should make it.

Have Your Say! Get Involved
