

Digital Single Market

Kieran Daly

Kieran Daly is CEO of Shimmer Research and has led the team at Shimmer since its inception in 2008. Shimmer designs and develops wearable sensors used in both research and commercial applications in over 60 countries. Kieran sits on the board of BioBusiness, an industry association that promotes the Life and Health Technology Sector in Ireland and is also a member of the Science Gallery Dublin Leonardo group. This is a group of up to 50 Irish and international thought leaders from business, science, arts, design and media who provide input into Science Gallery's programme.

Kieran studied Computer Applications at the Cork Institute of Technology before going on to complete a Master's Degree in International Business at Trinity College Dublin in 2007. He also holds diplomas in both Quality Management and International Selling from Dublin Institute of Technology. Prior to

Shimmer, Kieran worked with Irish SME Realtime Technologies as well as U.S. multinationals ACT Manufacturing and Solectron.
