Contribute to the Scenario Exercise on the ethics of ICT for Ageing - VALUE AGEING Project

The VALUE AGEING project is a 4-year Marie Curie IAPP Action project funded by the European Commission's FP7 programme that focuses on the incorporation of EU Fundamental Values and ethical considerations in ICT for ageing. It has carried out a Scenario Development Exercise on which it is now inviting public comments. The objective of the scenario is to demonstrate how scenario design and analysis are a valuable tool to identify specific technology areas in which social, ethical and fundamental right considerations are most required. The online public consultation is open from May 1st through May 31st, 2013.
