Put your initiative on the map of the DAE!

We have set up a large scale gathering exercise of inspiring high-impact initiatives that help achieving the goals of the DAE.

If you carry out initiatives that help achieving the objectives of 1) better public services for business, 2) more and fast growing ICT entrepreneurs, 3) ICT enabled innovation, 4) e-commerce and 5) Digital Jobs and Skills, [put your initiative on the map of the DAE!](#) [1]

The initiatives with the largest impact will also be presented at DAA 2013.

About 10 high-impact initiatives (for each of the 5 objectives) between those presented on the map will be selected to join a series of workshops to discuss with the European Commission about the specific objectives.

This working tool will run until April 2014 to deliver insight and policy recommendations to the European Commission.

Bring your expertise and insight to help achieving the goals of the DAE!

Speaker
