Workshop on Graphene and Related Materials (part of 10th International Conference on Nanosciences & Nanotechnologies)

Events

09/07/2013 to 12/07/2013

Thessaloniki, Greece

The aim of this Workshop is to explore the state-of-the-art topics of graphene (fabrication, transfer, properties, applications, etc.). The workshop will bring together leading experts and young researchers involved in surface science studies of the structural and physical properties, in the production of graphene from metallic supports (including device fabrication), and in theoretical investigations.

Organiser

10th International Conference on Nanosciences & Nanotechnologies
