EventThessaloniki, Greece9 July 2013 to 12 July 2013

Workshop on Graphene and Related Materials (part of 10th International Conference on Nanosciences & Nanotechnologies)

The aim of this Workshop is to explore the state-of-the-art topics of graphene (fabrication, transfer, properties, applications, etc.). The workshop will bring together leading experts and young researchers involved in surface science studies of the structural and physical properties, in the production of graphene from metallic supports (including device fabrication), and in theoretical investigations.
