2013 Global Symposium for Regulators (GSR) and the Global Regulators-Industry Dialogue (GRID)

The Global Symposium for Regulators (GSR) brings together heads of national telecom/ICT regulatory authorities from around the world and has earned a reputation as the global annual venue for regulators to share their views and experiences on the most pressing regulatory issues they have identified.

GSR also fosters a dynamic Global Industry-Regulators Dialogue (GRID), between regulators, policy makers, industry leaders and other key ICT stakeholders.

This year's GSR edition is dedicated to the "4th Generation regulation: driving digital communications ahead". There are several interesting topics on the agenda: digital dividend, infrastructure investments, universal service funds or broadband interconnection charges. Both GSR and GRID are organised under the auspices of the International Telecommunication Union.
