Call for tenders 26 June 2013

Study on "Use of commercial mobile networks and equipment for "mission-critical" high-speed broadband communications in specific sectors" (SMART 2013/0016)

The Study is focussed on the role which commercial mobile networks and the economies of scale for commercial equipment can currently play in high-speed broadband communications.

Commercial mobile networks and equipment in the future will play a decisive role in ensuring the provision of "mission-critical" high-speed broadband communications in the following sectors in Europe:

1. Public safety and protection, civil protection and disaster relief (PPDR),
2. Utilities – intelligent energy management systems - smart energy grids,
3. Transport - intelligent transport safety and transport management systems.

Official Journal reference: 2013/S 122-208386

Further information and the relevant documentation can be [found in TED](#) [1].
