

Digital Single Market

EventsBerlin, Germany

24/09/2013 to 26/09/2013

OpenNebula Global Conference

This event will be a meeting point for OpenNebula cloud users, developers, administrators, builders, integrators and researchers and give an opportunity to discuss and collaborate with other projects. The OpenNebula Project is an open-source project delivering a feature-rich, customizable and open solution to build enterprise clouds and virtualized data centers.

With thousands of deployments worldwide, OpenNebula has a wide user base that includes leading companies in banking, technology, telecom and hosting, and research and supercomputing centers.
