Launch of the European collaborative portal on ICT Assistive Technologies and inclusive solutions

There is a growing concern throughout Europe about the difficulties faced by the organisations involved in the Information and Communications Technology (ICT) Assistive Technology (AT) field. ATIS4all collaborative portal is the result of an EU-funded project, which aims to benefit all the key actors in the chain value of ICT ATs and accessibility products (from research centres to the end-users). It is an open and collaborative portal that offers reliable information on ICT ATs, inclusive solutions and R&D initiatives, and fosters online discussion, exchange of knowledge, expertise and sharing of information among its different portal members.
